RELEASE NOTES

Altair Monarch

Version 2021.1

Monarch Classic

Issue ID	Resolved Issue
MOD-3659	Report Index - navigation doesn't always go to the correct location when multiple reports are loaded
MOD-3667	Home page - Recent Projects renders incorrectly when Windows High Contrast mode is on
MOD-3671	Monarch Utility - Error - Non-negative number required. Parameter name: Count when performing search & replace
MOD-3788	Changing a runtime parameter value doesn't properly update values of dependent fields
MOD-3804	Monarch Utility - Manage References - Current Datasource reference is blank for a Workspace saved in via "Open in Monarch Classic"
MOD-3921	Report Verify - Dotted red box is sometimes positioned incorrectly
MOD-3923	Report Verify - After a data conversion verify failure one cannot do ADJUST LEFT or ADJUST RIGHT
MOD-3948	Excel Export Design - Show Tables dialog does not display rows of table names
MOD-3962	Report Verify - Zoomed report viewer results in field offset error
MOD-4012	Report Design - Edit Field - Advanced - Change END FIELD ON, "None of the above" to "Any template hit"
MOD-4022	Report Verify never finishes after starting an Adjust All procedure
MOD-4039	Monarch Utility - incorrect default help page
MOD-4042	UseLegacyPdf registry setting is not respected when adding pdf reports to a new model/project
MOD-4044	Unable to open 'License Server' credentials dialog
ENHANCEMENT	New Light and Dark themes replacing previous legacy themes. Note Report & Summary are not dark due to coloring requirements
ENHANCEMENT	Improved sizing in Summary Add/Remove Fields window
ENHANCEMENT	Ability to edit a Project and Model description
ENHANCEMENT	Monarch Utility - Command Line support for clearing Workspace credentials
ENHANCEMENT	Monarch Utility - Command Line support for clearing Project / Model credentials
ENHANCEMENT	Monarch Utility - Command Line support for sample line redaction

Issue ID	Resolved Issue
DPS-3989	Column widths in summary grid expand slightly when selecting a column
DPS-6309	Preview grid is truncated when the connection dialog displays error messages in various Connectors
DPS-6376	Report Verify - Dotted red box is sometimes positioned incorrectly
DPS-6936	Spurious Unsaved Changes prompt after entering Report Design and pressing Accept
DPS-7386	Report Trapping: Page number becomes zero when switching between reports
DPS-7552	Copying from a Summary with a Filter applied does not copy the filtered values
DPS-7571	ODBC PostgreSQL Table Preview not loading
DPS-7574	Slow performance when changing the value of "Show named ranges when opening an Excel workbook"
DPS-7575	Slow performance when sending tables from the Excel Explorer window to preview data using the PREVIEW SELECTED button
DPS-7587	Incorrect sorting when multiple sort keys contain null values
DPS-7590	Manage Summaries and Manage Filters dialogs - error when clicking OK after editing a summary or filter and then deleting it
DPS-7597	PDF Table Extractor - Ad-hoc table is not included in the tables copied using Extract Selection
DPS-7598	Importing Lookup values from a Date/Time column causes a crash if any of the values in the column is null
DPS-7602	Lookup Values table date time picker doesn't show clock when an input column has a custom format that only shows time
DPS-7653	Summary - Active measure selection and drill level for a given summary not persisted between workspace loads
DPS-7666	SAS Transport Importer fails to import some .xpt files which are created by the SAS Transport Exporter
DPS-7671	Value Filter dialog - Some date/time formats do not properly validate
DPS-7672	Some custom DateTime formats cause erroneous UI behavior
DPS-7683	Worksheet Design - Spanning cells above trapped area may cause incorrect field coloring
DPS-7688	Changing locale in Application or Current Workspace Settings dialogs doesn't update conversion options contained in changes
DPS-7689	Incorrect error message when connecting to MongoDB using IPv6 and no credentials defined
DPS-7695	Date/Time and Numeric columns in the Summary grid may have the wrong alignment
DPS-7706	Worksheet Design - Context menu gesture carousel is missing a horizontal scrollbar

Data Prep Studio

Issue ID	Resolved Issue
DPS-7707	Worksheet Design - Information on status bar clips at high screen resolutions
DPS-7712	Worksheet Design - Cancelling sometimes warns of specious changes
DPS-7715	Syntax error on SELECT DISTINCT in the Connector Preview Dialog Window
DPS-7722	Analyze - Only one table can have a Summary applied - others switch to No Summary
DPS-7740	Hang after updates are made in Report Verify in certain circumstances
DPS-7743	Hang after clicking Adjust All Fields in Report Verify in certain circumstances
DPS-7748	Dotted red box disappears after Adjust Right when verifying
DPS-7754	Crash when exiting Manage Summaries after editing a Summary to work with new column names
DPS-7797	Summary measure formats are not retained when changing the underlying column format in Prepare
DPS-7805	MySQL - Arithmetic operation resulted in an overflow error in Preview Data with certain data types
DPS-7806	Report Design - XPS file is not loaded correctly
DPS-7807	Report Verify - Box jumps when verifying floating traps
DPS-7811	Summary Export - With "No Summary" selected, any filter choice will revert to "No Filter" if you swap views and return
DPS-7841	Error if unknown export types exist in the Registry
DPS-7884	Slow performance opening a Workspace under certain conditions
ENHANCEMENT	Changes color hint and count on Table icon
ENHANCEMENT	Allow CSV to be loaded in Worksheet Design
ENHANCEMENT	Allow Sort Transforms to be discarded without affecting the table hierarchy
ENHANCEMENT	Show Tables dialog for Excel, Access and SAS exports
ENHANCEMENT	Append data option for Qlik QVX export
ENHANCEMENT	Improved IP V6 Support for various Connectors
ENHANCEMENT	Copy/Paste Trap in Worksheet Design
ENHANCEMENT	Summary Measure Format configuration
