INTRODUCTION

Altair[®] Monarch[®] is the world's most-used self-service data preparation solution. It is the fastest and easiest way to extract data from any source – including turning unstructured data, such as PDFs and text files, into rows and columns. Once data are extracted, you can clean, transform, blend, and enrich the data using a click-based interface, free of coding and scripting, and export to various platform for reporting and visualization. Then, you can automate the entire process, so you never have to do it again.

Monarch offers the following features:

- □ Access any complex data
- Easy, click-driven data prep with 80+ pre-built functions without the need for scripting or macros
- Blend and join disparate data.
- □ Eliminate manual work and human error.
- Unmatched report trapping of PDF and text-based reports.
- Automate repeatable work with reusable "recipes"
- Export to various business intelligence or analytics platform
- □ Auditable through a full change history and complete lineage

This guide will take you through the installation and activation process of Monarch version 2023.x.

SYSTEM REQUIREMENTS

To install Monarch successfully, we suggest that your system meet or exceed the recommended specifications. Administration rights and permissions are required to install Monarch.

MONARCH 32-BIT VS. 64-BIT

Monarch is available as a 32-bit or 64-bit application. By default, the bitness of the application is matched with the bitness of Microsoft Office, specifically the Access Database Engine (ADE) component, if this suite is available prior to the installation of Monarch. You can select which bitness to apply during Monarch installation. However, note that mismatches between the bitness of the application and the bitness of the ADE component may cause Monarch to be unable to read and write Microsoft Access data sources.

ALTAIR MONARCH 2023	–
	Welcome
	Altair Monarch® 2023 64-bit installation
	Welcome to the Altair Monarch® 2023 Installation program.
Altair	The installation process is straightforward and should take less than 5 minutes.
Monarch	Once Monarch is installed, you will be prompted whether you want to start a trial, or license the product.
	The Altair Monarch Installation wizard will now guide you through the installation process.
	Choose installation bitness: O 32-bit
	Click Next to continue.
	Next

If the ADE component is not installed prior to installing the application, Monarch will install ADE according to the Monarch bitness selected.

MINIMUM REQUIREMENTS

- Windows 10/11 64-bit; Windows Server 2019/2022
- .NET Framework 4.8/4.7.2 (Full Installation)
- □ Microsoft SQL Server 2017 LocalDB version 14.0.3238.1, Microsoft SQL Server Express 2016/2017/2019
- □ Microsoft Access DB Engine Runtime 2013
- 4 GB RAM
- 1.5 GB disk space for installation when prerequisites are in place
- □ 5 GB disk space for installation on a clean machine or when upgrading from .NET Framework 4.5
- □ Sufficient disk space for temporary workspace if dealing with large reports
- Pentium 4 CPU
- Google Chrome, Mozilla Firefox, Microsoft Edge (Chromium version)

RECOMMENDED SPECIFICATIONS

- Windows 10 64-bit
- INET Framework 4.8 (Full Installation)
- Microsoft SQL Server 2017 LocalDB version 14.0.3238.1
- Microsoft Access DB Engine Runtime 2013
- B GB RAM
- 1.5 MB disk space for installation when prerequisites are in place
- □ 5 GB disk space for installation on a clean machine or when upgrading from .NET Framework 4.5
- □ Sufficient disk space for temporary workspace if dealing with large reports
- □ 2.0 GHz or faster processor
- Google Chrome (latest version)

RUNNING THE SETUP PROGRAM

The Altair Monarch installer will guide you through the installation process via a series of screens. Each screen will require a prompt to advance to the next screen.

INSTALLING MONARCH

Steps:

1. After downloading the installer, run (or double-click on) the install program.

A series of prompts will lead you through the installation process.

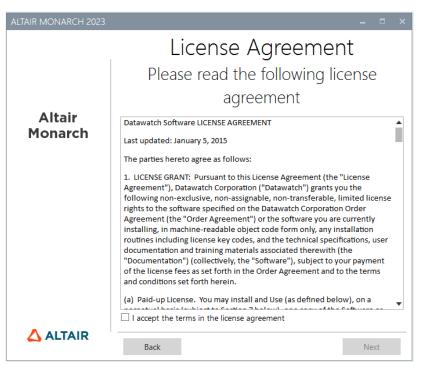

2. The first of these prompts introduces you to the installation program and reminds you of the need to either activate your copy of Monarch or use Monarch on a trial basis after you finish installing the application.

ALTAIR MONARCH 2023	– = ×
	Welcome
	Altair Monarch® 2023 64-bit installation
	Welcome to the Altair Monarch® 2023 Installation program.
Altair	The installation process is straightforward and should take less than 5 minutes.
Monarch	Once Monarch is installed, you will be prompted whether you want to start a trial, or license the product.
	The Altair Monarch Installation wizard will now guide you through the installation process.
	Choose installation bitness: 32-bit • 64-bit
	Click Next to continue.
	Next

You must select a Monarch bitness to install before proceeding to the next screen.

Once a bitness has been selected, subsequent installations or upgrades will apply this selection automatically; the installer will no longer ask you to select a bitness.

3. The second prompt requires you to accept the Monarch end-user license agreement before proceeding with the installation.

4. The third prompt allows you to specify whether Microsoft Access Database Engine should be installed with the application.

ALTAIR MONARCH 2023		-		×
	Prerequisites			
	Configure Prerequisites			
Altair Monarch	 ✓ Microsoft SQL Server LocalDB ✓ Microsoft Access Database Engine 			
	Back	Ne	xt	

Deselecting the Microsoft Access Database Engine option displays a warning icon. Hovering over this icon shows the following message.

If you wish to proceed with the installation, click Next.

5. The fourth prompt asks you to specify a folder in which to store application files and whether the sample lesson files should also be installed. It also asks whether to install the Altair License Management Utility.

This utility provides users with comprehensive Altair licensing functionality, including the ability to obtain HostIDs, manage license borrowing and returns, and manage product activation, both online and offline.

INSTALLING AND USING MONARCH IN A CITRIX ENVIRONMENT

System Setup

When deploying Monarch in a Citrix environment, Monarch is ideally installed in a machine that belongs to one delivery group and the License Server is installed in another machine that belongs to another delivery group. Such a setup will ensure increased security when Monarch is used by all authorized users. Both delivery groups must be within the same domain.

Supported Citrix Versions

Monarch may be used on all server and client applications currently supported by Citrix. More information on this topic may be found <u>here</u>.

Installation

Installing Monarch in a Citrix environment is no different from installing Monarch in a Windows environment. An Installation Wizard will guide system administrators during the installation process.

When Monarch is installed in a specific machine, all of the samples files, including reports, models, and data, are installed in the default location applied in Windows environments (typically C:\Users\Public\Public Documents\Altair Monarch).

Activation

Installations of Monarch in Citrix can be activated via an Altair License Management System (i.e., <u>managed licensing</u> or <u>on-prem license server</u>) or <u>Monarch License Server</u>. Activation using a standalone license file or activation key/code is currently not supported for Monarch installations in Citrix.

Activation is performed in the Citrix virtual machine in which Monarch is installed.

Post-Installation Steps

Once installed, Monarch must be published using Citrix Studio to allow other users access to it.

Citrix Studio can be used to add Monarch Classic, Data Prep Studio, and Monarch Utility as applications.

CONFIGURING PROFILE MANAGEMENT

The Monarch application uses LocalDB to cache the logon data of users. This database is stored in a user's local profile. During a Monarch session, UPM actively works in the server to cache the data in the user's local profile. In some cases, Monarch is unable to detect the location of LocalDB and, therefore, cannot launch properly. The following steps describe how to specify user profiles via an ADM template file and the location of LocalDB to allow Monarch to launch.

Steps:

1. Using Citrix WEM Console, go to Policies and Profiles > Citrix Profile Management Settings and check Enable Profile Management Configuration.

Deployment

Two steps are generally necessary to deploy Monarch in a Citrix environment:

- □ Create a Machine Catalog
- Create a Delivery Group

The following sections describe the details of each of these steps. In these sections, we assume that Monarch has been installed in a machine that is to be added to a machine catalog.

CREATING A MACHINE CATALOG

A machine catalog is a virtual or physical machine that can be assigned to a user to allow access to one or several applications.

Steps:

1. Login to the server where Citrix Studio has been installed. Log in as an Administrator and make sure you have administrative rights before proceeding.

The Machine Catalog Setup Wizard displays.

Introduction Machine Catalogs are collections of physical or virtual machines that you assign to users. You create Catalogs from Master Images or physical machines in your environment.
You create Catalogs from Master Images or physical machines in your environment.
Important: The Master Image or physical machine that you use to create a Catalog must have a Virtual Delivery Agent installed. Also, ensure that the operating system is up-to- date and that applications are installed. Before you begin, make sure that you: • Identify the types of desktops and applications your users need • Choose a Catalog infrastructure (for example, whether to power manage virtual machines) • Have a technology for creating and managing machines (such as Machine Creation Services or Citrix Provisioning) • Prepare your environment, including the Master Image, computer accounts, and network interface card configuration. Learn more

3. Click Next on this Wizard.

From the Operating System options that display, select **Server OS**.

Studio	Operating System
Studio Introduction Operating System Machine Management Master Image Virtual Machines Computer Accounts Summary	 Select an operating system for this Machine Catalog. Multi-session OS The multi-session OS machine catalog provides hosted shared desktops for a large-scale deployment of standardized Windows multi-session OS or Linux OS machines. Single-session OS The single-session OS machine catalog provides VDI desktops ideal for a variety of different users. Remote PC Access The Remote PC Access machine catalog provides users with remote access to their physical office desktops, allowing them to work at any time. There are currently no power management connections suitable for use with Remote PC
	Access, but you can create one after completing this wizard. Then edit this machine catalog to specify that connection.

4. In the Machine Management screen that displays, select **Another service or technology** if the machine for which a catalog to be created is not managed by Citrix Provisioning Services or Machine Creation Services (e.g., a virtual machine). Click **Next** afterward.

Studio	Machine Management
 ✓ Introduction ✓ Operating System 	This Machine Catalog will use: Machines that are power managed (for example, virtual machines or blade PCs) Machines that are not power managed (for example, physical machines)
Machine Management	Deploy machines using:
Machines	Citrix Machine Creation Services (MCS)
Summary	MCS is not available when using physical hardware. Resources: xstok5630334861049856-root-bCAE3UXb8P5s (Zone: Primary) Citrix Provisioning Another service or technology I am not using Citrix technology to manage my machines. I have existing machines already prepared.
	Note: For Linux OS machines, consult the administrator documentation for guidance.

5. In the Machines screen that displays, click Add computers and, in the Select Computers dialog that displays, locate and select the Computer Active Directory account of Citrix Server. Click OK when you are finished. In the present example, CITRIX\CONNECTOR2\$ is added as a machine account. This machine has Monarch installed in it.

Studio	Machines
	Import or add machine accounts:

ACTIVATING MONARCH

After installation, you can use Monarch by either opting to run a trial version of the software, which is valid for 30 days, or activating it. Without activation, you will be unable to use Monarch beyond the allowed trial period.

Once you have activated Monarch, you can only use it on the machine on which you have activated it. You will need to deactivate Monarch if you wish to use it on another machine.

THE ALTAIR MONARCH LICENSE MANAGER

The main interface used to activate Monarch is the Altair Monarch License Manager (License Manager). The License Manager launches the first time you run Monarch, during which you are asked how you would like to activate your install, or when you opt to deactivate your Monarch install.

🔍 Altair Monarch License Manager	—		\times
Altair Monarch 2023: Choose License Method	<u>Info</u>	<u>About</u>	<u>Help</u>
	-		
Before you can use Altair Monarch 2023 you need to specify a license type. Please choose f following options:	rom t	he	
🔿 Start Trial			
O Connect to a Monarch License Server			
Connect to an Altair License Management System			
	V	2W	Y W
Mr. North Marine Marine			V
Cancel <	Back	Nex	t >

You can switch from one type of licensing to another at any time you wish by using the Monarch License Manager. You could, for example, switch from your trial license (without completing the trial period) to using Altair Units or a volume license key file. To do so, simply launch the Monarch License Manager and select any of the other licensing options available to you.

ACTIVATION METHODS

You can activate Monarch by connecting to an Altair License Management System or Altair Monarch License Server, using a Volume License Key File, or specifying an Activation Code.

Activation through an Altair License Management System allows you to use Managed Licensing (Altair Units), an Altair Activation Key or License File, or local licensing (on-prem license server or standalone license file) to activate your copy of Monarch.

- □ Activation through a **Monarch License Server** may be performed if you have access to a license file located on an Altair Monarch License Server. In this case, credentials to access this server must be provided.
- Activation through a Volume License Key File is done when your license file is located in some local folder or network. In this case, the path to this file must be provided. Note that this option is a legacy licensing method and <u>must be enabled</u> before it can be used.
- Activation through an Activation Code can be done if you have access to a Nalpeiron activation code. Note, however, that this activation method is not generally recommended as future releases of the software may render this option deprecated. Note that this option is a legacy licensing method and <u>must be enabled</u> before it can be used.

Each of these activation methods will be discussed in this guide.

ACTIVATING MONARCH THROUGH A FIREWALL

In some cases, a firewall rule must be created to allow activation of Monarch using the License Manager with an internet connection (e.g., the firewall of your machine is activated). The Activation Server for Monarch versions 2020+ is located at **184.106.60.185 (hostname: my.nalpeiron.com)**.

USING MONARCH IN TRIAL MODE

The first time you install Monarch, you may use a trial version of the software free for 30 days. Afterward, you must activate Monarch through any of the ways described in this guide if you wish to continue using it. To use a Trial version of Monarch in the present example, select the **Start Trial** button in the *Choose License Method* screen of the License Manager. The following screen displays:

🔍 Altair Monarch Lic	ense Manager	-		×

Supply the information required and then click Finish.

When using Monarch Classic in trial mode, a popup displays to remind you of how many days remain in your trial.,

🕅 Altair Monarch Classic – Trial Mode	×
Trial Mode. Hours left: 23	
Activate or Buy Continue Trial	

Select **Continue Trial** to proceed with your trial. If you wish to activate or buy a new copy of Monarch, select the **Activate or Buy** button. Doing so will take you back to the *Choose License Method* screen.

In Monarch Data Prep Studio, the number of days/hours remaining in your trial displays in the middle of the screen and persists in upper right-hand corner of the application window.

Trial License Expires: 05.31.2023

Once your trial period has expired, you must activate Monarch using any of the options described in <u>Activation</u> <u>Methods</u>. Note that you can activate Monarch even if your trial period has not expired.

ACTIVATION VIA AN ALTAIR LICENSE MANAGEMENT SYSTEM

The Altair License Management System provides you with several options through which you can activate your copy of Monarch. Using a single interface, you can activate Monarch via Managed Licensing (i.e., Altair Units), an Activation Key (online activation) or License File (offline activation), or Local Licensing (i.e., on-premise license server or standalone license file).

To access these options, launch the Altair Monarch License Manager, select the **Connect to an Altair License Management System** option in the Choose License Method screen, and then click **Next**. The Altair License Server Connection screen displays.

Managed Licensing

Altair Units is a cloud-based license management system that enables greater flexibility with your Altair licenses. Integrated with Altair One, Altair Units allow you to seamlessly access your Altair licenses with just an internet connection.

Steps:

- 1. Launch Google Chrome and then go to the Altair One Admin Portal at <u>https://admin.altairone.com/</u>. Log in with your credentials.
- 2. Once logged in to the portal, navigate to User Profile > Authorized Machines.

🛆 Altair Altair One Admin Portal	× +				• - • ×

Activation Key

An Altair Activation Key is similar to the traditional Monarch activation code and is used to activate the software on a machine with access to an Altair License Activation System (ALAS). This key will be provided to you if your copy of Monarch was properly purchased.

Steps:

- 1. In Altair Monarch License Manager, select the **Connect to an Altair License Management System** option in the **Choose License Method** screen and then click **Next**.
- 2. Select the **Activation** tab in the Altair Units License Configuration screen, and then enter the activation key provided to you in the field provided for it.

- 3. Select the appropriate license store from the options provided. The license store type defines the scope and storage folder for activated licenses.
 - Selecting User saves the license to the "C:\Users\[User]\AppData\Local\.altair_licensing\[ComputerName]\licenses" folder.
 - Selecting System saves the license to the "C:\ProgramData\altair\licenses" folder.
- 4. Click the **Status** button if you wish to view a list of all ALAS activated licenses currently stored in all licenses stores on your machine, along with their status.
- 5. If you wish to enable license checkout (i.e., allow users to "check out" or "borrow" their license so that they can work with the Monarch applications offline), enter a maximum number of hours users can check out their license into the **Advanced** > **Borrowing Duration** field.
- 6. Choose an **Optimization** type (ideally **LMX** or **Auto**) from the options available.
- 7. Click Activate.

If your Altair activation key is valid, the following message displays.

S Information	×
License was activated and stored license store.	in the User
	ОК

8. Click **Connect** in the Altair Units License Configuration screen.

Monarch is successfully activated.

License File

You can activate Monarch using an Altair license file if the machine in which the software was installed does not have access to an ALAS. In this case, the license file must have been generated using the HostID file created for the machine without internet access (hereafter referred to as **Machine A**) by a machine with access to this activation system (hereafter referred to as **Machine B**). Note that this method requires you to have a valid Altair Activation Key. Once created, this license file can be used by **Machine A** to activate Monarch.

The steps described here assume that a valid license file for **Machine A** had previously been created by **Machine B** and should be performed by **Machine A**. A more detailed discussion on this procedure is provided <u>here</u>.

Steps:

- 1. Select the Activation tab in the Altair Units License Configuration screen and then click the Import License File button.
- 2. Use the dialog that displays to navigate to the folder containing your license file and select it.

🔍 Import License File	-		×
License File to Import		Brows	e
License Store: ()	User 🔹		
	CUSers\admin\AppData\Local\altair_licensing\DESKTOP-PRMNUBG\licenses~?fA?\??\C:\Users\admin\	AppData\L	<u>ocal</u>
Import		Close	

- 3. Select the appropriate license store from the options provided. The license store type defines the scope and storage folder for activated licenses.
 - Selecting User saves the license to the "C:\Users\[User]\AppData\Local\.altair_licensing\[ComputerName]\licenses" folder.

- Selecting System saves the license to the "C:\ProgramData\altair\licenses" folder.
- 4. Click the **Status** button if you wish to view a list of all ALAS activated licenses currently stored in all licenses stores on your machine, along with their status.
- 5. If you wish to enable license checkout (i.e., allow users to "check out" or "borrow" their license so that they can work with the Monarch applications offline), enter a maximum number of hours users can check out their license into the Advanced > Borrowing Duration field.
- 6. Choose an **Optimization** type (ideally **LMX** or **Auto**) from the options available.
- 7. Click the **Import** button and, when the dialog closes, click the **Connect** button.

Monarch is successfully activated.

Local Licensing

If you opt to use Local Licensing, you can activate Monarch via an on-prem license server or standalone license file (including a student license).

Steps:

1. Select the Local Licensing tab in the Altair Units License Configuration screen.

🔍 Altair Monarch License Manager		-		\times
Altair Monarch 2023: Altair Units License Configuration	<u>Settin</u>	<u>as Info</u>	<u>About</u>	<u>Help</u>

	Cancel	< Back	Con	nect

- 2. At this point, you can activate your Monarch install in one of two ways:
 - Enter the path to a valid On-premise License Server (with the default port 6200) into the field provided.
 - Enter the path to a valid **Standalone License File** into the field provided.
- 3. If you wish to enable license checkout (i.e., allow users to "check out" or "borrow" their license so that they can work with the Monarch applications offline), enter a maximum number of hours users can check out their license into the Advanced > Borrowing Duration field.
- 4. Choose an **Optimization** type (ideally LMX or Auto) from the options available.

5. Click **Connect** when you are done.

Monarch is successfully activated.

STUDENT LICENSES

Monarch offers a "student edition" of the application, which is activated using a standalone license following manual approval. This license is provided for educational purposes to students who wish to explore the technology or need the application to work on homework assignments.

The student edition of Monarch has the following limitations:

- Activation is supported via the Altair License Management System licensing method only.
- □ Monarch Automation is not available.
- Only 10 rows can be exported in Monarch Classic and Data Prep Studio.

Advanced Licensing Methods

The Altair License Management system provides an alternative utility that you can use to activate Monarch. This utility is installed along with your Monarch installation, typically in C:\Program Files\Altair Monarch 2023\security, and provides comprehensive Altair licensing functionality, including the ability to obtain HostIDs, manage license borrowing and returns, and perform online and offline activation, among others. You can access this utility by clicking **Advanced Licensing Tools** in the Altair Units License Configuration screen of the Altair Monarch License Manager and then launching the **almutil_gui** application in the folder that displays.

LICENSE FILE

As explained <u>here</u>, you can activate Monarch using an Altair license file if the machine in which the software was installed does not have access to an ALAS. Note that this method requires you to have a valid Altair Activation Key. The license file in this case will be generated using the HostID file created for the machine without internet access (hereafter referred to as **Machine A**) by a machine with access to this activation system (hereafter referred to as **Machine B**). Once created, this license file can be used by **Machine A** to activate Monarch. The steps below explain how this procedure is done using the Altair License Utility.

Steps:

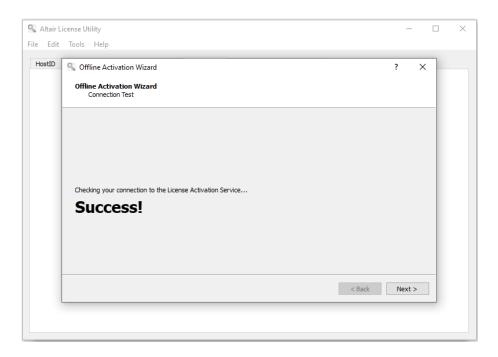

1. Generate a HostID file for **Machine A**. A HostID is a unique machine value that can be used to lock a license file to a specific host.

In **Machine A**, select the HostID tab of the Altair License Utility and then click the **Export to File** button. Your HostID details are saved to an XML file at a location of your choosing. This location must be accessible to **Machine B**.

	Tools Help

		11411020014241002						
		11411020014241002						

2. Generate a license file for Machine A.

In **Machine B**, launch the Altair License Utility and then select **Tools** > **Offline Activation Wizard**. The wizard displays, and your connection to the License Activation Service will be checked.

- 3. Click **Next** and then follow the prompts that display. When asked to supply the HostID file, use the file generated in Step 1.
- 4. Click **Activate** when you are finished to activate Monarch. In the final screen of this wizard, you will be asked to select a location in which to save your license file. Select a location that is accessible to **Machine A**.
- 5. In Machine A, select Tools > Import License File in the Altair License Utility toolbar.
- 6. Navigate to the location of the license file generate in Step 4 and select a store location. Click **Import** when you are finished.

🕄 Suco	cess X
	C:/1/comp1_offlineLic was succesfully imported in to the User license store
	ОК

- 7. Using Machine A, launch the Monarch License Manager, select the Connect to an Altair License Management System option in the Choose License Method screen, and then click Next.
- 8. In the Altair Units License Configuration page, select the **Activation** tab and then click **Test Connection**. This step checks whether the license imported in Step 6 was indeed imported correctly.
- 9. If the result is positive, a popup displays.

ACTIVATION USING A MONARCH LICENSE SERVER

Monarch 2023 can be activated via the Monarch License Server. You can also implement a license server "mirror" to use as a failover server in case your target license server fails.

Activating Monarch via the Monarch License Server

Steps:

- 1. From the *Choose License Method* screen of the License Manager, ensure that the **Connect to a Monarch** License Server button is selected and then click Next. The *License Server Connection* screen displays.
- 2. Enter the name of the License Server you wish to connect to into the corresponding field. Ensure that your port is correctly specified.

Altair Monarch Lic	ense Manager		—		\times
Altair Monarch	2023: License Server Connection	Setting	<u>is Info</u>	<u>About</u>	<u>Help</u>

M. MAAMA	mmm	Cancel	< Back	Conr	nect

Select the server name you wish to connect to and then click $\ensuremath{\text{OK}}$.

- 3. Enter a valid instance name into the **Instance Name** field.
- 4. Click **Connect** when you are done.

Upon successful connection, the following screen displays.

🔍 Altair Monarch License Manager	—		\times
Altair Monarch 2023: License Information Settings	<u>Info</u>	About	<u>Help</u>
Product successfully licensed. Licensing Method: License Server	nfigu	The Licen	Se
		Finis	h

5. Select Finish when you are done.

You can choose to change the license method for your Monarch install by selecting the **Configure License** button. Doing so returns you to the *Choose License Method* screen.

You may now run and use Monarch.

Implementing License Server Mirroring

You can specify a "failover" license server that will automatically be activated and provide licensing authentication should the main server fail, for example, due to a power outage or hardware malfunction. This functionality requires two License Servers that share the same database. Your system administrator may help you set up these license servers if necessary.

Notes:

- □ You can specify up to two failback license servers at a time.
- Both servers must be running at the same time.
- Switching between the main and fallback license servers occurs only if the main license server is unreachable. If the main server is reachable but some issue, for example, a communication issue is found, an server connection error message is returned.

Steps:

- 1. After completing Steps 1 and 2 above, go to the Failover Servers section of the wizard and then click Add.
- 2. In the Failover License Server Configuration dialog that displays, provide the information of the license server you intend to use as a failover server.

Sealover License Se	erver configuration X
Server Name:	▼ Port: 51515 ★
Instance Name:	Monarch 2022
License Server	Connection Security Information
Scheme: htt	p
	Test connection OK Cancel

Similar to Step 2 above, you must provide:

Name of the license server you wish to use as a failover server

You can enter the server name manually or browse for it by clicking on the drop-down button located to the right of the field. Clicking **Browse for all** will open a Search window that will show all available servers in your network. The instance name of the failback server is automatically defined as the instance name specified for the main server.

- Port number of the License Server service. Here, Port 51515 is defined as the default License Server port but this value can be altered to a custom port.
- 3. Test the connection if you wish by clicking the **Test Connection** button.
- 4. Click OK on the Failover License Server Configuration dialog to save the details of your failback server.

At this point, you can:

Click on the **Test Connection** button to check the connection to the failback server selected.

- Click on the Edit button to modify the details of the failback server selected.
- Click on the Delete button to delete the details of the selected failback server.
- 5. Click the **Connect** button.

You will be connected to the License Server and the required license will be granted.

Using Monarch With Monarch License Server

When you use Monarch activated with a license server, the following dialog box displays.

	License Server ×
M License Server - win-hi2hek58iaq - Monarch 2022 X	User Name
User Name:	Password:
Password:	Use Windows Authentication
 Windows Authentication Save user credentials 	Save user credentials
OK Cancel Change Password	OK CANCEL CHANGE PASSWORD

To continue using Monarch, you will need to specify the username and password of a valid user.

ACTIVATION USING A VOLUME LICENSE KEY FILE

Monarch 2023 can be activated via a volume license key file.

Steps:

1. From the *Choose License Method* screen of the License Manager, ensure that the **Use a Volume License Key File** button is selected and then click **Next**. The *Volume License Key File* screen displays.

4. Select Finish when you are done.

You can choose to change the license method for your Monarch install by selecting the **Configure License** button. Doing so returns you to the *Choose License Method* screen.

You may now run and use Monarch.

ACTIVATING MONARCH USING AN ACTIVATION CODE

The Activation Code is also referred to as a License Code, License Key, or License Number. It is an 18-digit code that you must specify in the **Activate License** screen of License Manager to activate Monarch. This key should have been provided to you if your copy of Monarch was properly purchased.

IMPORTANT: Activation codes for Monarch 2023 require an internet connection for periodic license verification.

- □ For Monarch installations activated by online activation, the license check is performed every 14 days.
- For Monarch installations activated by offline activation, the license check is performed every 30 days.
- For Monarch installations on a virtual machine, the license check is performed every 24 hours.

When a license lease (i.e., the time between two verification instances) is about to expire and no internet connection is detected, the following message displays:

License Lease Ex	piry Warning - 21 Hours Remaining	23
	en unable to verify the license recently. Please ens to the internet to avoid the license becoming inval	
Do you wish to try	and verify the license now?	
	Yes No	

If you wish to verify your license, ensure that you are connected to the internet prior to clicking "Yes" on the dialog.

If your license expires and no internet connection is detected, the following message displays:

icense Verification Error	23
PRODUCT LICENSE VERIFICATION ERROR	
The license verification for this product expired on: 12/11/2022 2:02 PM Please ensure that you are connected to the internet in order to verify t license.	

To continue using Monarch, simply connect to the internet to verify your license.

If an internet connection is not available, contact Altair Support via the support portal, chat, or phone.

Activating Monarch Online

Steps:

1. Launch the Altair Monarch License Manager.

You may now run and use Monarch.

Activating Monarch Offline

In cases where reliable internet is unavailable, you may activate Monarch offline. Using this method, you will need to enter information to and from the Activation dialog boxes and Trusted Activation Center on the web. You will also need the assistance of your systems administrator or Altair Support.

Steps:

- 1. Launch the License Manager and then select Activate Altair Monarch 2023 using an Activation Code. Click Next when you are finished.
- 2. In the Activate License screen that displays, enter your activation code into the field provided and then select the **Offline Activation** button to display the *Offline Activation* screen. The following note displays.

3. Click **OK** to proceed with offline activation.

Errors, warnings, info and debug	

Accepted values include Off, Only Errors, Errors and warnings, and Errors, warnings, info, and debug.

You must restart the application for the settings specified in the Settings window activation come into effect.

Specifying HTTPS Settings

Some firewall rules prohibit HTTP traffic. In this case, you must enable HTTPS connections via Monarch License Manager.

Steps:

- 1. From the Choose License Method screen, ensure that the Activate Altair Monarch 2023 using an Activation Code button is selected and then click Next. The Activate License screen displays.
- 2. Click Settings at the lower left-hand corner of the screen.
- 3. In the Activation Settings window that displays, select the **Security** tab.

🔍 Activation Settings	- 🗆 X
Proxy Daemon Proxy Logging Security	┌ Status
Use HTTPS	License Status:
	No License. (Returned license to server)
	Computer ID:
	DdNj0EMQ9ymHV6tlFHn0
	Filechck.dll Version:
	3.7.110.14

4. Ensure that the **Use HTTPS** box is ticked to allow HTTPS connections.

DEACTIVATING MONARCH

If you wish to use Monarch on a different machine, you will first need to deactivate Monarch on the current machine and then reactivate the software on a new machine.

There are three ways you can deactivate your copy of Monarch:

- Deactivate Monarch using the Altair License Management System
- Use the built-in License Manager that is installed together with Monarch
- Deactivate over the website
- Department Phone or e-mail Altair Support

DEACTIVATING MONARCH USING THE ALTAIR LICENSE MANAGEMENT SYSTEM

If you activated your copy of Monarch using an Altair Activation Key, you can deactivate your Activation Key via the Altair License Management System.

Steps:

- 1. In Altair Monarch License Manager, select the **Connect to an Altair License Management System** option in the **Choose License Method** screen and then click **Next**.
- 2. Select the Activation tab in the Altair Units License Configuration screen, and then click Deactivate.

CONFIGURING LOGGING

Log files for License Manager are typically located in C:\Users\Administrator\AppData\Local\Temp.

To modify the location of log files and the amount of information found in these files, click **Settings** on the upper righthand corner of the License Manager.

The License Manager Settings dialog displays.

🔍 Altair Monarch Licer	ise Manager Settings	×
Logging Securit	y Advanced	
Logging Level:	Off	•
Logging Director	у:	
C:\Users\admin\/	AppData\Local\Temp Brows	se
ОК	Reset to defaults Cano	cel

Using the drop-down provided in the Logging tab, select a logging level using the following table as a guide:

Value	Description
Off	Logs no events.
Error	Logs all exceptions.
Warning	Logs events that have occurred or may occur and cause an otherwise normally running application to malfunction.
Information	Logs events indicating successful application execution regardless of whether the application is working properly or not.
Verbose	Logs low-level events for both user code and servicing Used for debugging purposes

You can also select a new folder in which to store log files by clicking on the **Browse** button. Doing so launches a *Select Folder* dialog that you can use to specify a new log file location.

CONFIGURING SECURITY PROTOCOLS

Previous versions of License Manager only allowed the SSL 3.0 and TLS 1.0 security protocols by default (.NET 4.5 application defaults). The current version of License Manager allows implementation of other protocols, including TLS 1.1 and TLS 1.2.

To configure which security protocols to enable, launch the **License Manager**, click on the **Settings** link located on the upper right-hand corner of the dialog and then click the **Security** tab from the Settings dialog that displays.

Altair Monarch License Manager Settings		×
Logging Security Advanced		
Enabled protocols		
SSL 3.0	✓ TLS 1.0	
✓ TLS 1.1	TLS 1.2	
OK	Reset to defaults	Cancel

By default, all protocols are enabled. Uncheck the boxes to the left of the security protocols you with to disable. Note that TLS1.2 must be enabled to successfully register trial user information.

Click **OK** to save your changes, **Reset to defaults** to reverse your changes, or **Cancel** to close the dialog without saving your changes.

DISABLING/ENABLING LEGACY AND NALPEIRON LICENSING METHODS

The default licensing options for Monarch are an Altair License Management System and Monarch License Server. If you wish to enable legacy licensing options (i.e., activation code and volume license key file), click **Settings** on the upper right-hand corner of the License Manager and then select the **Advanced** tab.

Tick the box for **Display legacy licensing methods** and then click **OK**.

Nalpeiron				
Disable Nalpeiron licensing method 3				
Display legacy licensing methods 3				
Note: changed settings will be applied after application restart.				
OK Reset to defaults Can	icel			

If you would like to reset the application defaults, click the **Reset to defaults** button. To cancel any changes, click Cancel.

Restart Monarch License Manager. Legacy licensing methods will display in the Choose License Method screen.

In some instances, using Nalpeiron licensing may lead to issues that prevent other licensing methods from functioning as they should. When this happens, you may wish to disable the Nalpeiron Licensing method for your Monarch installation.

To do so, click **Settings** on the upper right-hand corner of the License Manager and then select the **Advanced** tab.

Tick the box for **Disable Nalpeiron licensing method** and then click **OK**.

S Altair Monarch License Manager Settings	×
Logging Security Advanced	
 Disable Nalpeiron licensing method ? Display legacy licensing methods ? 	
Note: changed settings will be applied after application restart.	
OK Reset to defaults Cancel	

If you would like to reset the application defaults, click the **Reset to defaults** button. To cancel any changes, click **Cancel**.

Restart Monarch License Manager. When Nalpeiron licensing is disabled and legacy licensing options are enabled, the option to license Monarch using an activation code no longer displays in the Choose License Method screen of the Monarch License Manager.

VIEWING COMPUTER INFORMATION

The name and domain name of the computer from which License Manager is launched can be viewed by clicking on the **Info** link located at the upper right-hand corner of all major License Manager screens.

The following dialog displays:

🔍 Computer Details		×
Machine name:	desktop-prmnubg	B.
Domain machine name:		
	ОК	Copy to clipboard

Click the **Copy** button located to the right of each field in the dialog to copy the information and then paste it where necessary.

UPGRADING MONARCH

Monarch upgrades may be considered a minor upgrade, an example of which could be installing Monarch version 2022.1 after installing Monarch version 2022, or a major upgrade, an example of which could be installing Monarch version 2023 after initially installing Monarch version 2022.

The upgrade process may generally be summarized as follows.

Steps:

- 1. Determine what type of upgrade you wish to implement. You will not require a new license or activation code when making minor upgrades. However, when making a major upgrade, a new license or activation code is required.
- 2. If you wish to perform a major upgrade, obtain a new Monarch license or activation code. Fill out the form that displays when you click **Contact Support** in the <u>Altair Community</u> page. Select Licensing from the categories available and request for a new license or activation code. Remember to include your old activation code or attach your old license file to your ticket. Our support staff will initiate the process of generating a new code or license file for you and guide you through the rest of the upgrade process.

If you wish to perform a minor upgrade, skip Step 2 and move on to Step 3.

- 3. Download a newer version of Monarch from the Altair Marketplace.
- 4. Run the installer and activate your copy of the application as usual.

You can install a newer version of Monarch via one of two ways:

- Install the new version over the existing application. This option is preferred when performing a minor upgrade. If you upgrade a previous Monarch version that was activated via an activation code or license key file, the upgraded version is automatically activated using this code or file.
- Uninstall the old version and then install the new application. This option is preferred when performing a major upgrade.

When uninstalling a previous version of Monarch activated with an activation code, the Uninstall Wizard asks whether your license should be deactivated.

If you intend to perform a <u>minor upgrade</u>, select **No** to enable automatic activation when your Monarch is upgraded.

CONTACTING ALTAIR SALES

The **Contact Altair Sales** option is displayed in the *Choose License Method* screen of the License Manager when Monarch is being used in Trial mode or when the Trial mode has expired and you have not activated the software.

If you would like to contact Altair Sales, select the **Contact Altair Sales** button in the *Choose License Method* screen of the License Manager and then select **Next**.

Contact details for Altair Sales display.
