RELEASE NOTES

Panopticon

Version 2023.1

New Features

Data Framework

Feature ID	Description
DDTV-18974	Support for data access control and row level security
DDTV-20060 DDTV-20487	New UTC function returns the current UTC Date/Time in default or provided format
DDTV-20771	New Sibling Rank Percent aggregation
DDTV-20413	New Cumulative Sum Percent aggregation
DDTV-20764	Ability to view the location of source data table of joined data tables
DDTV-20323	Data type symbol displayed in the Calculated Columns editor

Visualization

Feature ID	Description
DDTV-20440	Support for Box visualization in X-Axis and Y-Axis graphs
DDTV-20758	Support for mouse wheel scroll for text domains in X-Axis and Y-Axis graphs

Server Improvements

Feature ID	Description
DDTV-18376 DDTV-20230 DDTV-20474 DDTV-20374 DDTV-20417	Server Repository Performance Improvements - Use incremental repository index to commit - Build a cache of data table usage on server - Framework for code that scans the repository - Cache workbook metadata on server - Search index should look the same as other cached content
DDTV-20245	New `bookmark.show_shared` property to enable/disable sharing of bookmarks

Data Connectivity

Feature ID	Description
DDTV-20091	Ability to set the File Encoding to use in Text and Web Data connectors
DDTV-20838	Support for empty request body for POST requests in Web Data connector
DDTV-20675 DDTV-20615	GET set as the default request method in Web Data connector

Web Designer/UX

Feature ID	Description
DDTV-20356	Support for Data Log access in dashboards
DDTV-18997	Ability to view the location of workbooks under the Quick Access section
DDTV-17638	Support for multiple actions to have the same title
DDTV-20268	Updating default style applies to general and specific Parts
DDTV-20341	Ability to rearrange dashboard templates

Dashboarding

Feature ID	Description
DDTV-19249	Ability to display the variable name in Color and Shape Legends
DDTV-20043	Support to display Dashboard Part ID property
DDTV-20388	Ability to copy and paste other dashboard parts into a Tabbed panel
DDTV-20311	Option to hide the Maximize button in the Panel part

Analytics	
Feature ID	**Description**
DDTV-20717	Support for table column filtering
DDTV-20428	Support for multi-select filtering in Alert Events
DDTV-20124	Ability to configure multiple criteria sets (OR-conditions) within a single alert definition
DDTV-20272	Column format applied to Alert triggered values, notification, and email
DDTV-20276	Support for column filtering in the Alert dialog

Deprecated Features

Issue ID	Description
DDTV-20960	Ability to set Timeout value in Kdb+tick connector
DDTV-20598	Ability to set the File Logging Level from the System Settings tab
DDTV-20821	Ability to set the Server Metrics Publisher from the System Settings tab
DDTV-20767	`subscription.parameter.user.force` property
DDTV-20313	`connector.dolphindb.subscription.host` and `connector.dolphindb.subscription.port` properties

Fixed Issues

Issue ID	Description
DDTV-19519	Units check in functionality for Anonymous user
DDTV-20088	Action is kept in the list even after renaming the scope dashboard
DDTV-20709	Link data table in Data Library created before removing read permission in a folder continues to work
DDTV-20754	Users can get a copy of a data table that they only have Read-Only permissions
DDTV-20750	Data Library data tables become invisible after renaming the folder
DDTV-20946	Columns are not displaying in toggle data mode in X-Axis and Y-Axis graphs
DDTV-20937 DDTV-20936	Kdb + Tick connection error
DDTV-20956	Visual tables not sorting time bucket columns correctly
DDTV-19597	Parameters not working if a bookmark is also selected in a scheduler task
DDTV-20713	Copy Data not working in X-Axis and Y-Axis graphs
DDTV-20915	Navigation Action from an axis graph works on context menu but not on double-click
DDTV-20770	Shape Legend only displays after saving the workbook
DDTV-20748	Right side key value lost when doing Full Outer Join
DDTV-20918	Inverted sign colors in the Band Member graph in X-Axis and Y-axis graphs
DDTV-20827	Unable to connect to RapidMiner REST Endpoint with Web Data connector
DDTV-20763	Same name for data tables in Workbook and Data Library is not allowed
DDTV-20765	Workbook using Data Library data table still finds data after bundle export without including the linked data table
DDTV-20833	Shape Legend in Runtime Selectable mode with Axis graph and one Shape variable does not display anything
DDTV-20752	Moving Joined data table to another folder automatically moves the source data tables
DDTV-20749	Error message and log generated when moving Joined data table and source data tables

DDTV-20794	Role Anonymous listed for all users logged in to the server
DDTV-20753	Data table from bundle import shows unsaved changes in Editor despite no changes made
DDTV-20820	Unable to install Panopticon unless an XML license file is available in vizserverdata folder
DDTV-20785	Update link to User Community
DDTV-20772	Constant Reference Line and Reference Band require integer values
DDTV-20705	Calculated column function REGEX_EXTRACT_GROUP not available in Data Library data table editor
DDTV-20743	New aggregates not available in Columns/Default Aggregation drop-down in Data Library
DDTV-19614	Source column options in the Data Table editor does not match server logic for bucketing/binning columns
DDTV-20394	Morphing visualizations removes titles
DDTV-20076	Text at the top section is cut off in Email Image scheduler type
DDTV-20925	Time Filter font size is not applied
DDTV-13714	No validation for the invalid URL in Image Box and spinner continuously running
DDTV-20644	JavaScript error when deleting Filter Box through Delete keyboard button
DDTV-20790	Tab Panel header style not applying to tabs which are in drop-down
DDTV-19604	Text not aligned properly for Email HTML formatted data scheduler type
DDTV-20554	Dashboard tabs do not scroll to show the selected tab after changing the workbook font style
DDTV-18836	Pin Details not working when drilling down to the last level in Dot Plot visualization
DDTV-20506	Link between visualization and Color Legend within a panel is lost after doing copy, paste, undo, then redo
