# [1] ALTAIR PANOPTICON WORKBOOKS

## THE WELCOME PAGE

The *Welcome* page is the first screen that displays when you log on to Panopticon Real Time. This page can also be accessed by clicking the **Altair Panopticon** logo on the header.

**Altair Panopticon™** Workbooks Webhooks Alerts V

### Welcome, viewer

**Recent Workbooks** [See All Workbooks](#)

**Axis Graphs**  
Organization\  
Viewed 2 months ago

**How to Conflate Time Series Datasets**  
Organization\  
Viewed 2 months ago

### Getting Started

**Explore**

Panopticon lets you organize your workbooks and data in folders. Click to explore all the content available within your organization.

[Explore Workbooks](#)

**Quick Start**

Get familiar with concepts and features of the Panopticon web client in just a few minutes.

[Open Quick Start](#)

**Documentation**

Find user guides, release notes, fact sheets, and installation instructions here.

[Open Documentation](#)

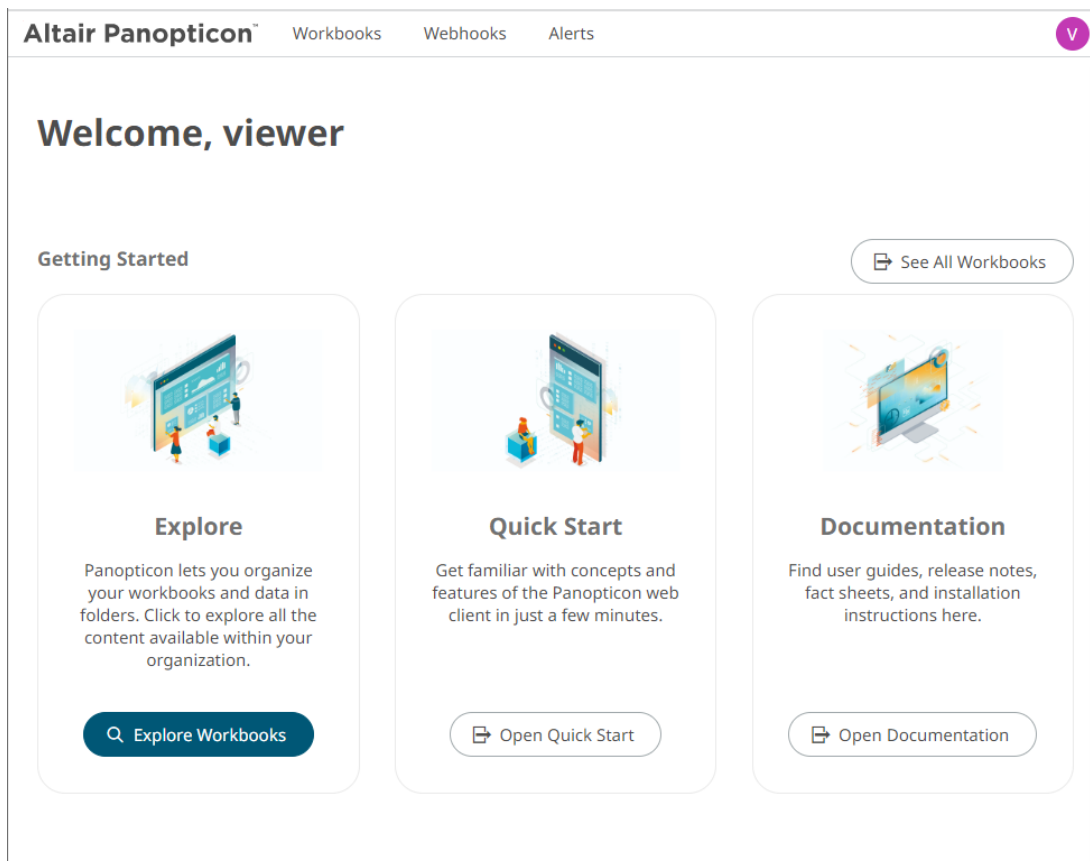

From this page you can:

- ❑ Click  to go to the *Workbooks* page
- ❑ Open recently viewed workbooks (if available)
- ❑ [Explore workbooks available in your organization](#)
- ❑ [Open the Analyst User Guide](#)
- ❑ [View online documentation and help](#)

If there are no recently viewed workbooks, header.

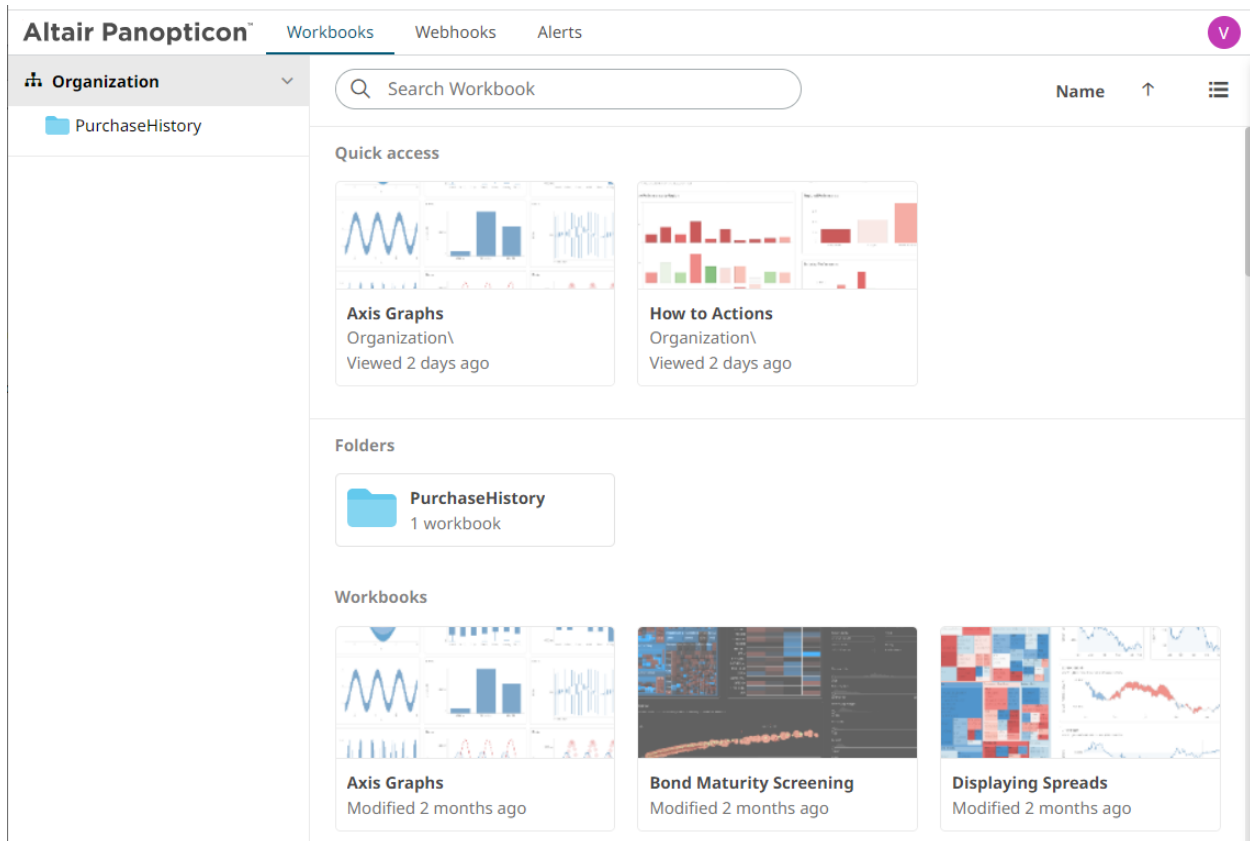

is displayed parallel to the *Getting Started*

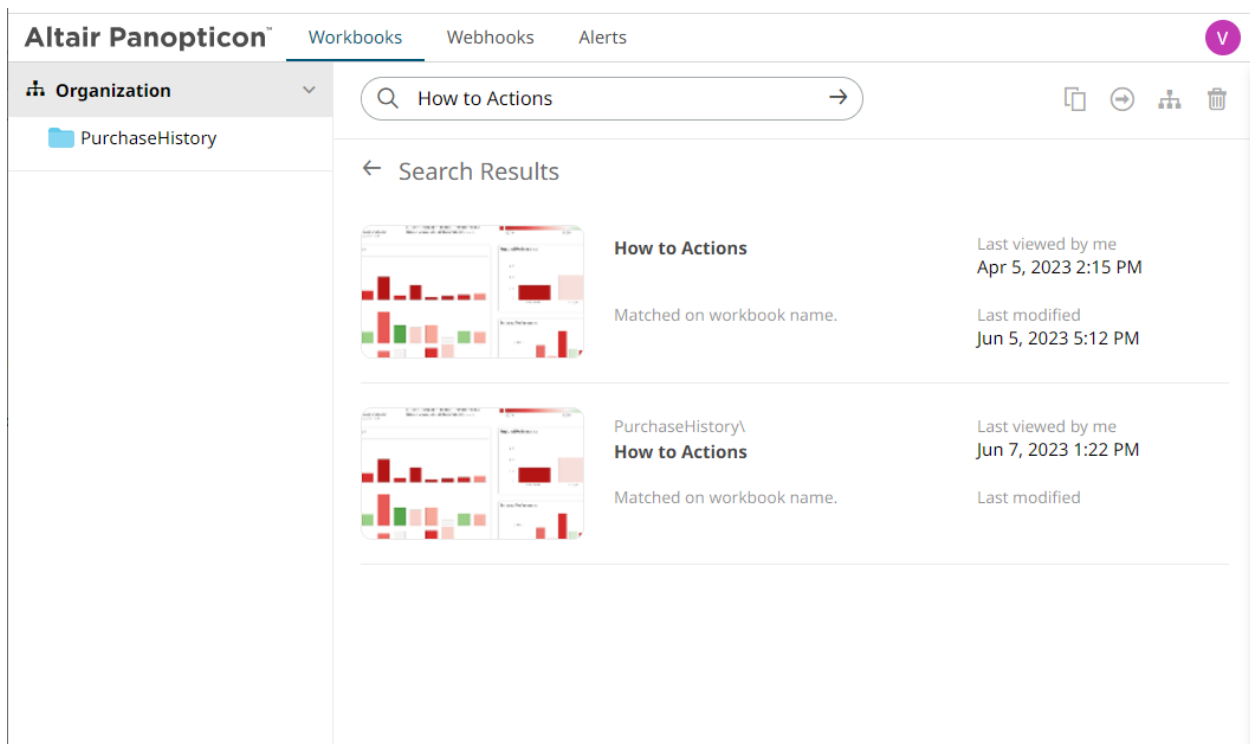

## ACCESSING WORKBOOKS

The **Workbooks** page lists available folders and uploaded or published workbooks in *Grid View*.

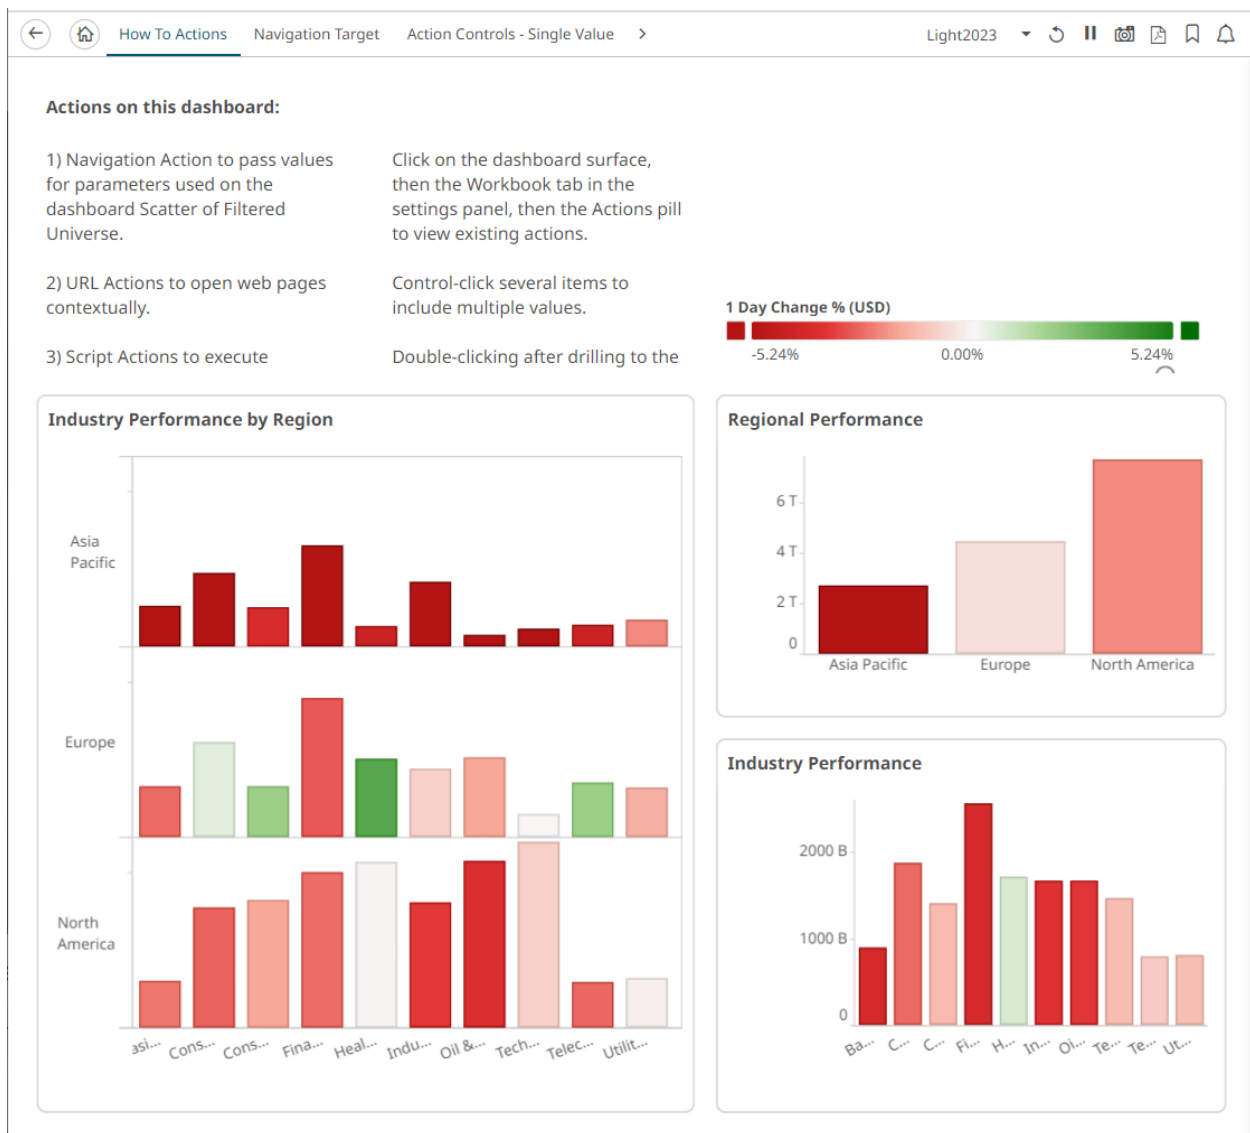

- ❑ The *Folders* include their names and the number of available workbooks.
- ❑ The *Workbooks* include their titles, thumbnail images, and when they were last updated.

Enter text in the *Search Workbooks* box to filter the workbook thumbnails.

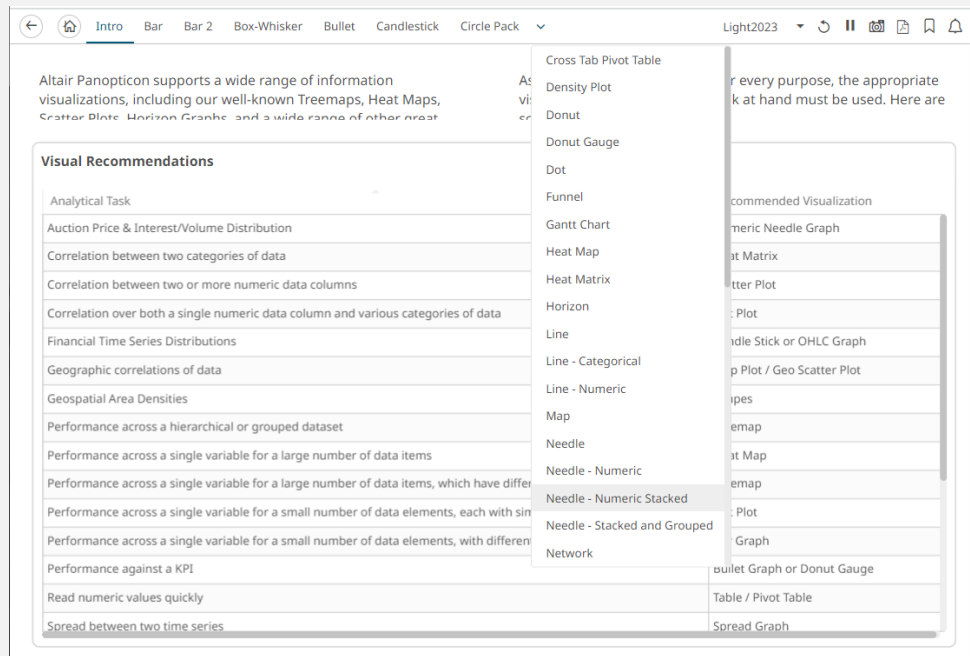

Clicking on the workbook thumbnail opens it on the *Open Workbook in View Mode*:

## NOTE

The  signifies there are more dashboards in a workbook that can be opened. Click this icon to expand the drop-down list and display all of the available dashboards and select one to display.

The opened workbooks are then displayed on the *Quick Access* panel.

## SEARCHING FOR WORKBOOKS

Search for workbooks that may be located in different folders.

### Steps:

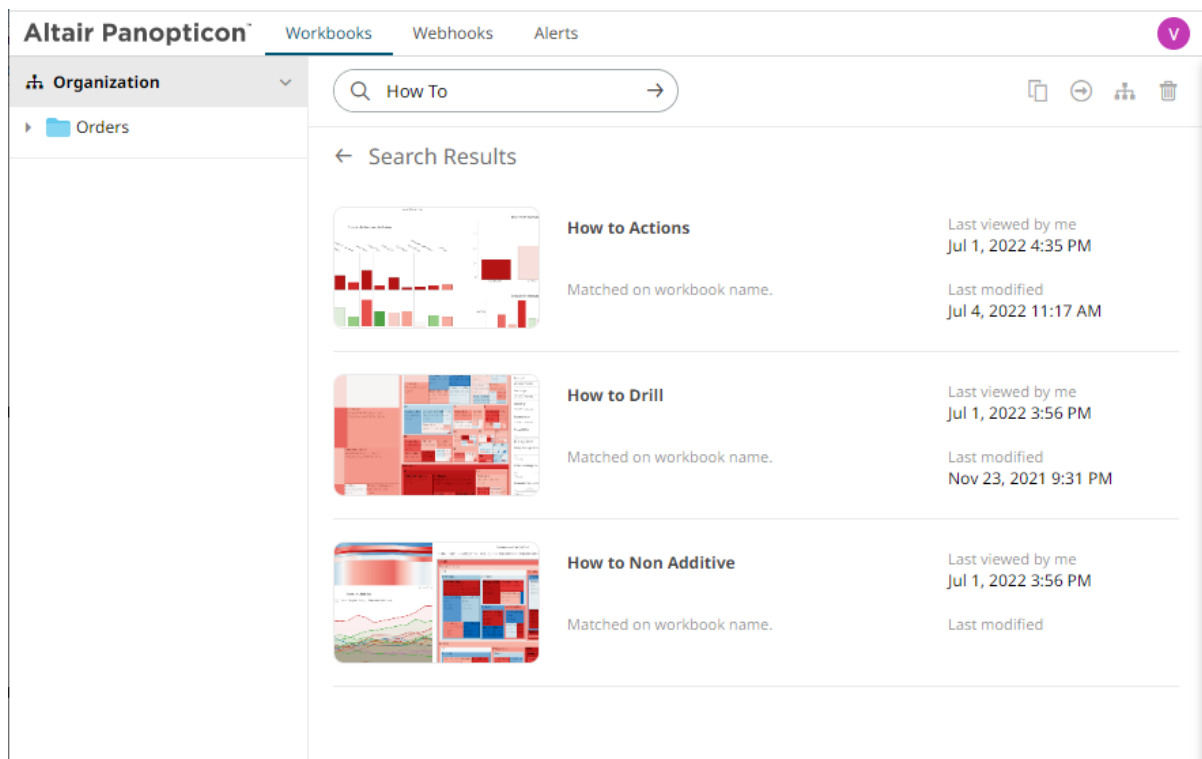

1. On the *Workbooks and Folders Summary* layout, click on a workbook folder then enter a workbook name or dashboard name in the *Search Workbook* box.
2. Click  .

The following information are displayed for each workbook:

- Folder where the workbook is located.
- What the search match was based on: workbook or dashboard name.
- Date/Time when the workbook was last viewed
- Date/Time when the workbook was last modified

You can also enter one or more characters into the *Search Workbook* box then click **Enter**. The list of workbooks that matched the entries will be displayed.

Click on a workbook thumbnail to open and display it on the web browser.

To go back to the *Workbooks and Folders Summary* layout, click .

## Folders and Workbooks Display View

Workbooks can be displayed either on a *List* or *Grid View*.

On the *Toolbar*, click **List View** , the folders and workbooks are displayed in a standard listing.

## Sorting Workbooks

Sorting workbooks can be done by *Name*, *Last Viewed/Last Published*, or *Last Viewed by Me*.

### Steps:

On the *Folders and Workbooks Summary* layout, either:

- ❑ click the **Sort By** option on the *Toolbar* of the *Grid View*

By default, the sorting is by **Name**.

- Name
- Last Modified
- Last Viewed By Me

Then click the *Sort Order*:

-  Ascending
-  Descending

- ❑ click on the **Name**, **Last Viewed By Me**, or **Last Published** column header of the *List View*

# WORKBOOK ELEMENTS

- ❑ Each workbook may contain several dashboards.
- ❑ Each dashboard in a workbook may contain multiple visualizations, legends, and filters.
- ❑ Each dashboard shows up as a tab at the top of the screen. Click on the dashboard tab you want to use.

Users can interact with the workbook using the visualization right-click [context menu](#), [header controls](#), shelves, variables and cross tab options.

Context Menu

The visualizations in a workbook provide the following right-click menu options:

⚡	News on Company
⚡	Reuters Stock Quote
	New Alert
	Include Item
	Exclude Item
	Clear
	Drill Down

Time Series Visualization Context Menu of the Time Axis

**Table visualization context menus depending on where you click on the visualization**

Context Menu	Description
<a href="#">Filter</a>	Allows filtering of a table column. <b>NOTE:</b> Applies only to the table visualization not the whole dashboard.
<a href="#">Automatic Parameterization</a>	Run an automatic parameterization.
<a href="#">Actions</a>	Run a workbook action on the visualization.
New Alert	Create an <a href="#">alert</a> .
<a href="#">Visualization Filtering</a>	Allows visualization filtering. Options include: <ul style="list-style-type: none"> <li>Filter Include</li> <li>Filter Exclude</li> <li>Filter Clear</li> </ul>
<a href="#">Drilling</a>	Allows drilling into visualizations. Options include: <ul style="list-style-type: none"> <li>Drill Down</li> <li>Drill Up</li> <li>Drill to Top</li> </ul>
<a href="#">Data Export</a>	Allows exporting of data. Options include:

	<ul style="list-style-type: none"> <li>• Copy Image</li> <li>• Copy Data</li> <li>• Export Raw Data</li> <li>• Copy Cell Data</li> </ul>
<a href="#">Zooming</a>	Allows zooming in and out of visualization sections.
<a href="#">Show Shelves</a>	Available when <b>Enable Shelves</b> is enabled in the visualization's <i>General</i> settings. Either check <b>Show Shelves</b> in the context menu or tap the <b>Shelves</b> slider in the <i>General</i> settings to display cross tab, breakdown, and variable shelves in the visualization.
<a href="#">Pinning</a>	Allows pinning of the <i>Details</i> pop-up. Options include: <ul style="list-style-type: none"> <li>• Pin Details</li> <li>• Unpin</li> <li>• Unpin All</li> </ul>

The additional time series visualization context menu options include:

Setting	Description						
<a href="#">Set Snapshot Here</a>	Available in the time series visualization context menu when the Snapshot Grid Line is rendered or set to <b>Dotted</b> , <b>Dashed</b> , or <b>Solid</b> in the Time Axis variable.						
Set Axis Range	<p>Allows setting of the time axis range:</p> <div><table><tr><td>Min Range</td><td>minutes</td><td>0</td></tr><tr><td>Increment Step</td><td>minutes</td><td>0</td></tr></table></div> <ul style="list-style-type: none"><li>Min Range The minimum time axis range. Supported units are milliseconds, seconds, minutes, hours, days, months, quarters, and years.</li><li>Increment Step Controls how much the time axis span is extended at the point when the latest value is at the end of the current time axis span. Supported units are milliseconds, seconds, minutes, hours, days, months, quarters, and years.  This setting helps in seeing how a real-time data set grows from left to right along the time axis, giving a better impression and understanding of the progress.</li></ul>	Min Range	minutes	0	Increment Step	minutes	0
Min Range	minutes	0					
Increment Step	minutes	0					

The additional Table visualization context menu options include:

Context Menu	Description
<a href="#">Adjust Columns</a>	Adjust column width in the table visualization.
<a href="#">Hide / Unhide Columns</a>	Hide or display columns in the table visualization.
<a href="#">Show Hierarchy Column</a>	Display the hierarchy column.
<a href="#">Expand / Collapse Hierarchy</a>	Expand or collapse sections of the hierarchy.

Show Grand Total	Determines whether the Grand Total aggregate row is shown in the table.
Show Sub Totals	Determines whether Sub Total aggregate rows are shown in the table.
Show <Column>	Display the breakdown column.

## Table Column Filtering

Instead of using a *Filter Box*, you can right-click on a table column header and select **Filter** to perform filtering.

The dialog box that displays will depend on the data column type.

- ☐ For numeric columns:

Enter the numeric range filter then click either:

- **Include** to include the entered range, or
- **Exclude** to exclude the entered range.

- ☐ For text columns:

This text entry box is the same as the filter in **Include/Exclude** mode.

- ☐ For time columns:

Enter the time range filter then click either:

- **Include** to include the entered range, or
- **Exclude** to exclude the entered range.

When a filter is applied on the table columns,  filter icons appear at these places:

- ☐ To the right of the table column header

- ☐ Table Header Control

- ☐ Dashboard toolbar

- ☐ Table Column Filter dialog

Clicking  will remove the filter.

Also, **Show Active Filters**  icon displays on the Table Header Control. This allows [viewing of all the active filters](#) on the dashboard and its visualizations.

## Automatic Parameterization

Determines whether parameters are to be automatically updated or the setting will be inherited from the workbook property.

Workbook designers set this property in the *Dashboard and Workbook Settings* pane.

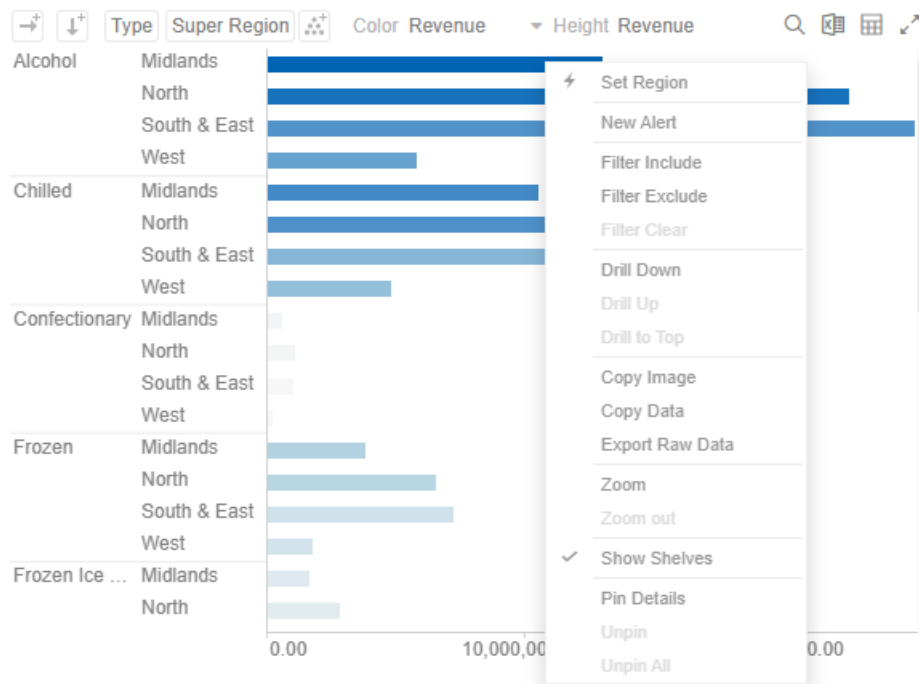

- ☐ On

When turned on, parameters can be automatically updated within a dashboard by right-clicking on a visualization item and selecting it from the context menu with the blue lightning  icon.

The dashboard parameter values to be passed will include all possible data table values of the selected visualization.

For example, if there are Region and Industry dashboard parameters, and the associated data table of the visualization has a Region but no Industry column, then the *Automatic Parameterization* option will only include:

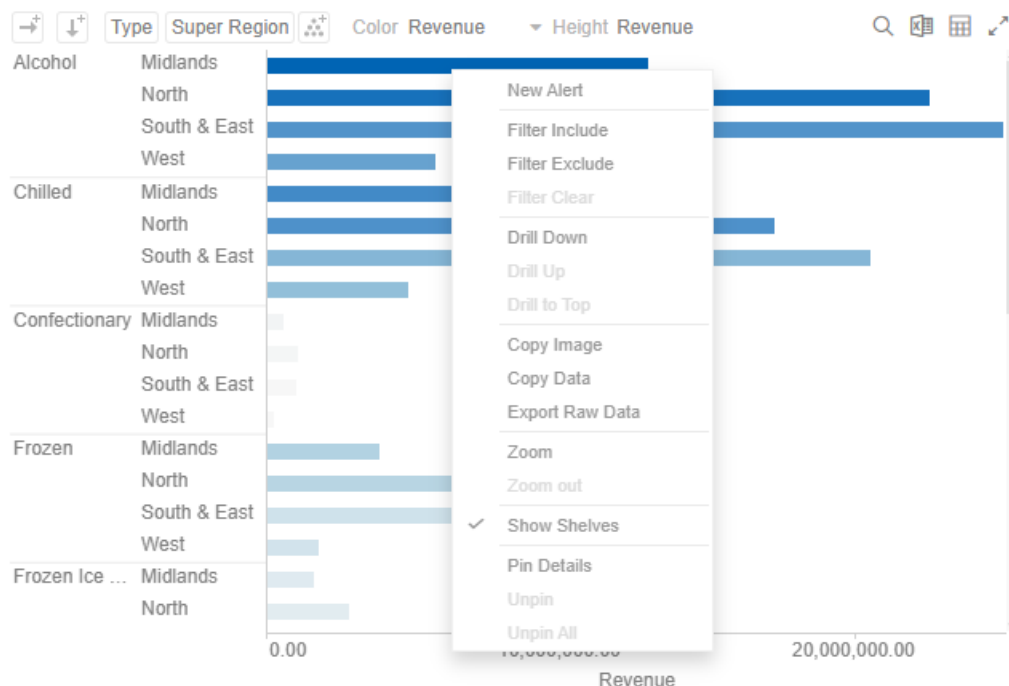

However, if the associated data table of the visualization has Region and Industry columns, then the *Automatic Parameterization* option will include both:

☐ Off

Automatic parameterization on the visualization based on the dashboard parameters is turned off.

In some circumstances, it may be appropriate to disable this automatic parameterization, and instead utilize more configurable navigation [actions](#).

☐ Inherit

The automatic parameterization is inherited from the workbook property.

## Action

Actions allow Panopticon workbooks to be more interactive:

- ☐ Link information in dashboards to external systems
- ☐ Use Navigation Actions to pre-filter dashboards
- ☐ Open web pages contextually through URL Actions
- ☐ Execute JavaScript functions in context using Script Actions

Actions use parameters to pass selected text values to external applications, to JavaScript functions and to other dashboards.

All methods provide the ability to view a summary data set, select particular items of interest and then jump to another data set focused on these particular items. This focused data set may be presented through another tab within the workbook (Navigation Action) or through an external system (URL Actions & Script Actions).

Actions are exposed to the user through the right-click context menu, with the **Action** icon to the left of the Action name.

Within the Panopticon workbook, the focused data set is achieved through the use of parameters in the data set.

Parameters values, must be text and are specified either through:

- ☐ Default values on the creation of the parameter in the data table
- ☐ Values specified as a result of right-clicking on an item and executing an action
- ☐ Values specified externally, when a workbook is accessed via the web browser, and the parent web page includes the specified values as inputs
- ☐ In the specific case of the parameter **\_user\_id**, the authenticated username is retrieved.
- ☐ In the other special case for the parameters **\$TimeWindowStart**, **\$TimeWindowEnd**, and **\$Snapshot**
- ☐ Other special cases for parameters used for zooming allow for **\$XAxisValueMin**, **\$XAxisValueMax**, **\$YAxisValueMin**, and **\$YAxisValueMax**

Typically, actions are created once the workbook design has largely been completed, with visualizations added to each **Dashboard** (tab), some being open to all data, and some being parameterized, visualizing data based on the default parameter values.

For a more detailed information about actions, refer to the [Altair Panopticon Web Authoring Guide](#).

## Visualization Filtering

Visualizations themselves can be used as filters by selecting items, and right-clicking to display the context menu with these three options:

- ☐ **Include Item** filters the dashboard to include the selected items.
- ☐ **Exclude Item** filters the dashboard to exclude the selected items.
- ☐ **Clear** removes any visualization filters.

### NOTE

In the Web client, the *Include Item* and *Exclude Item* options are disabled when there is no breakdown, or the root is selected in visualizations.

For time series visualizations, an additional option is available.

**Exclude Time** filters all the series to exclude the time point/s.

When a visualization filter is applied, filter icons appear at the left of the filter column title  and on the  toolbar of the dashboard. Clicking  or  will remove the filter.

Also, **Show Active Filters**  icon displays on the toolbar. This allows viewing of all the active filters on the dashboard and its visualizations.

## Viewing Active Filters

Information on active filters applied on the dashboard and its parts can be viewed.

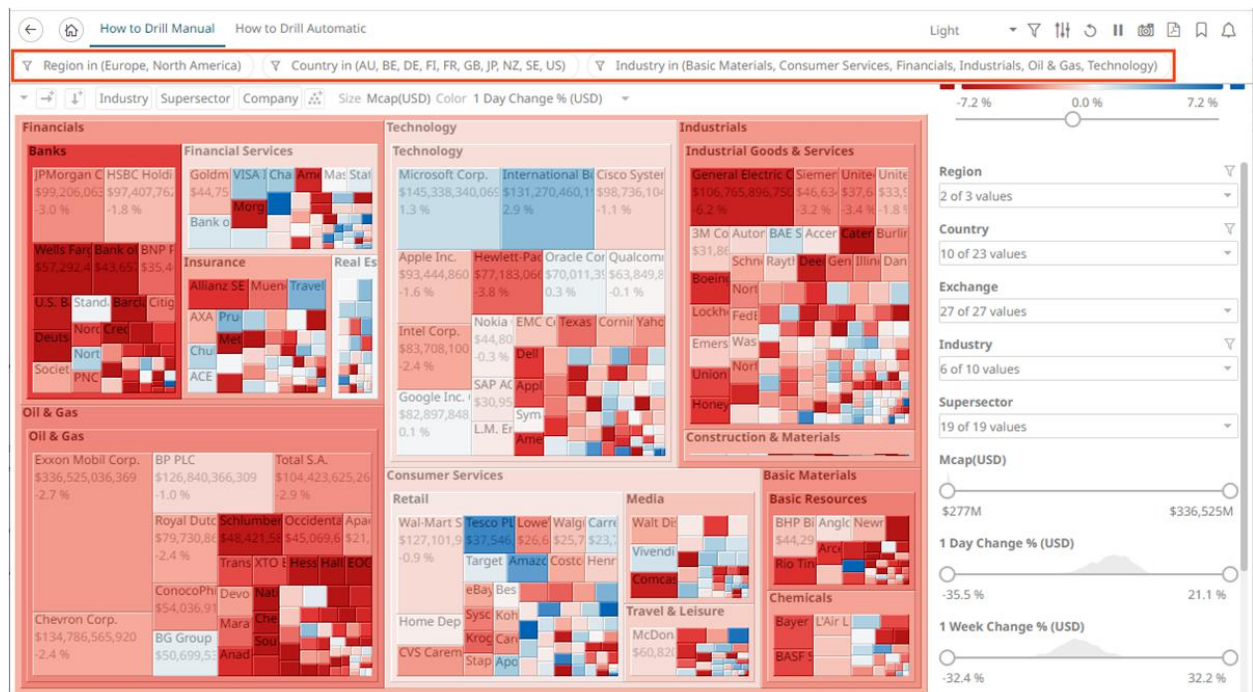

These filters can be done through:

- ☐ Filter controls
- ☐ Visualization filter

### Steps:

1. Click the **Show Active Filters** icon on the toolbar.

All of the predicates of the active filters are displayed. For this sample, there are three active filters.

2. Hover on any predicate to display its details.

#### Predicate 1:

Region in (Europe, North America)

Full Predicate: Region in (Europe, North America)  
Applies to: Portfolio Performance Map  
Generated by: TextFilter for Region in

#### Predicate 2:

Country in (AU, BE, DE, FI, FR, GB, JP, NZ, SE, US)

Full Predicate: Country in (AU, BE, DE, FI, FR, GB, JP, NZ, SE, US)  
Applies to: Portfolio Performance Map  
Generated by: TextFilter for Country in

### Predicate 3:

▼ Industry in (Basic Materials, Consumer Services, Financials, Industrials, Oil & Gas, Technology)

Full Predicate: Industry in (Basic Materials, Consumer Services, Financials, Industrials, Oil & Gas, Technology)

Applies to: Portfolio Performance Map

Generated by: TextFilter for Industry in

Property	Description
Full Predicate	Predicate details.
Applies To	Parts in the dashboard where the predicate is applied.
Generated By	Source of the predicate which include the filter column data type in the filter control or global filter.

3. To clear any predicate in the list, click .

### Drilling into Visualizations

Visualizations themselves can be used to drill into lower or upper details by selecting items, and right-clicking to display the context menu with three options:

- ☐ Drill Down – Drills down to the lower level of the selected value.

#### NOTE

Drilling without filter (or soft drill) is turned on for all aggregates that refer to:

- Nodes above the node like the parent or root
- Siblings of the node

Applicable to the following aggregates in the *Aggregate* drop-down list:

- Sibling Rank
- Percent of Total
- Percent of Weight Total
- Percent of Parent
- Percent of Weight Parent
- Percent of Total Change
- Cumulative Sum
- Cumulative Sum By Max

- ☐ Drill Up – Enabled when the lower level of the selected item is displayed. Click to drill to the upper level.
- ☐ Drill to Top – Drills to the top level of the selected value.

Drilling into visualizations can also be done by double-clicking on a value.

## Data Export

The data in a visualization can be exported and copied to a clipboard for future use in another application. In addition, the raw data of the visualization can also be exported.

Visualization Level data is exported by right-clicking on the visualization to display the context menu with two options:

For the Table visualization, **Copy Cell Data** is also available which allows copying of a single cell.

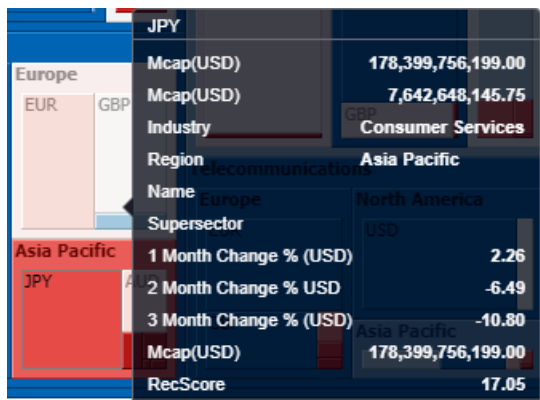

The data exported will be what appears on screen, or in a linked table. Specifically, all the columns that appear in the Detail pop-up, including:

- ☐ Only those items that are visible (for example, items that have not been filtered)
- ☐ Same Visible detail (or depth) level displayed in the visualization.

If **Export Raw Data** is selected, all the data from the source data table is exported, and not just the actively displayed nodes within a visualization.

Right-clicking and selecting **Copy Image** on the context menu displays the **Copy to Clipboard** button.

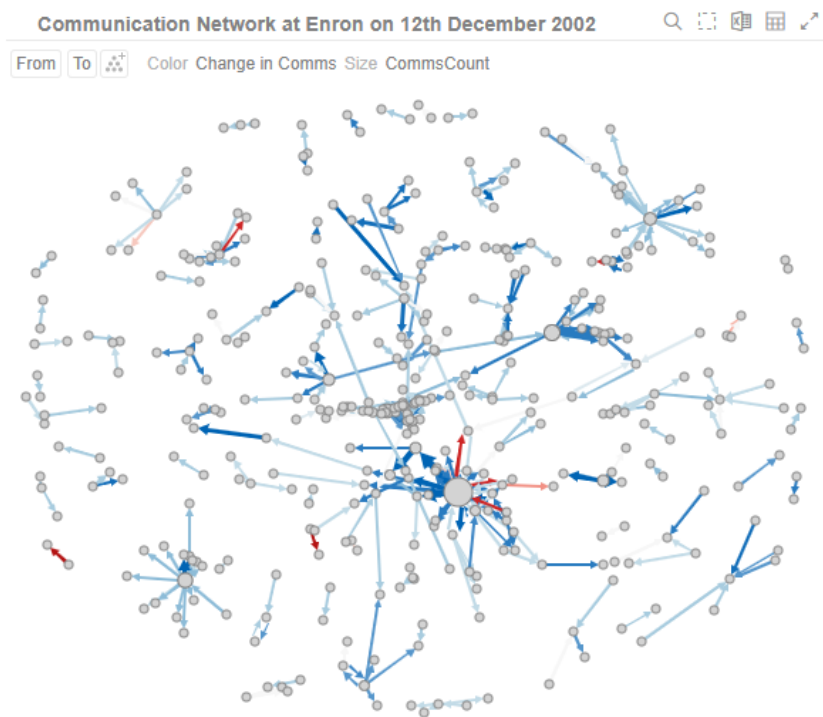

Click  **Copy** to copy and paste the whole dashboard image to another application.

## Rubber Band Zoom and Selection

Rubber Band Selection allows multiple items to be selected or lassoed by defining an area with the mouse. When selected, the mouse pointer is displayed as a crosshair. Clicking and dragging the mouse defines the selected area in grey. Once confirmed the selected items are highlighted. This selection option is available in the Network Graph visualization.

## Before

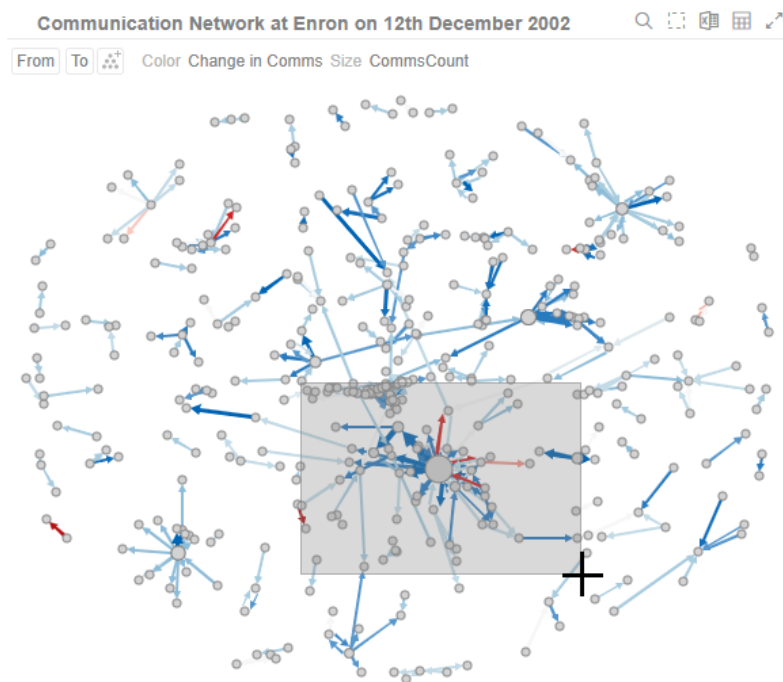

Before selection

Click the **Rubber Band Selection** icon on the header control. The mouse turns into a crosshair .

## During

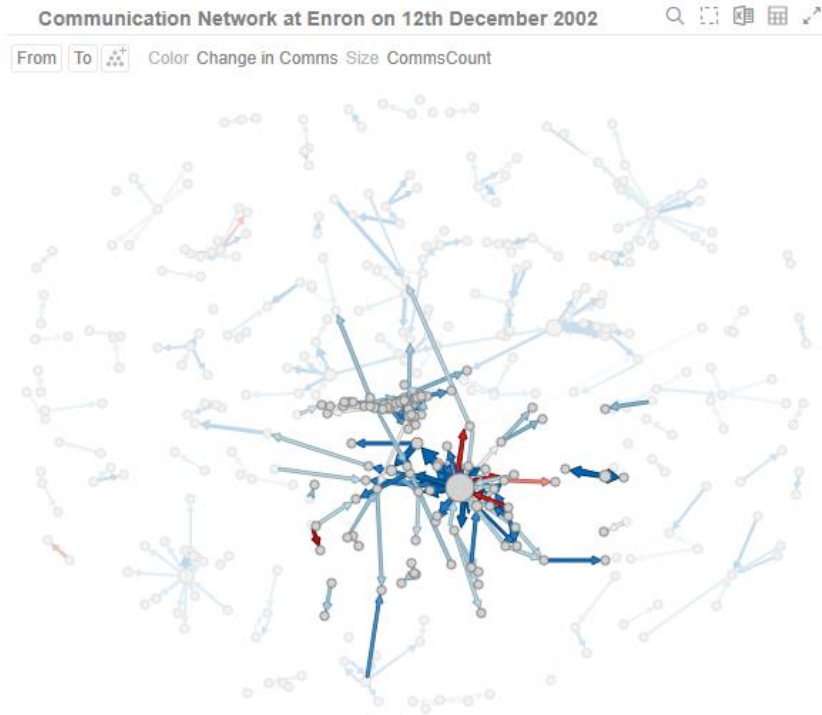

Mouse pointer has been dragged to define an area of interest.

During selection

### After

The selected items are highlighted.

After selection

To unselect, click on any part of the visualization.

Rubber Band Zoom is supported for visualizations that have:

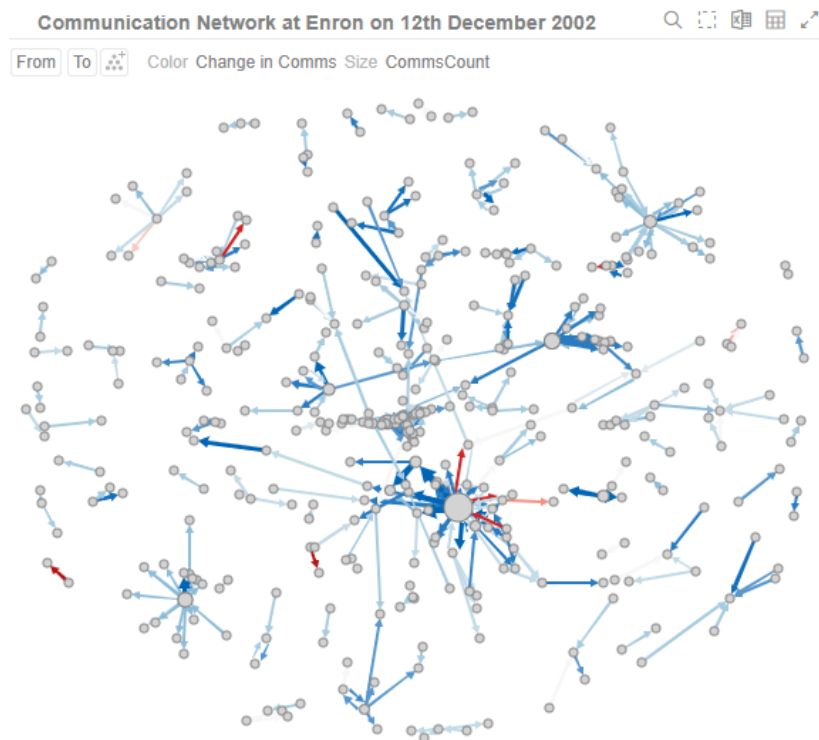

- ☐ Numeric X and Y axes
- ☐ Date/Time X and Y axes

These are Candle Stick, Line Graph, Needle Graph, Network Graph, Numeric Line Graph, Numeric Needle Graph, Numeric Stacked Needle, OHLC Graph, Order Book, Price Band, Scatter Plot, Spread Graph, Stacked Needle Graph, Timeseries Combination, and Timeseries Scatter Plot visualizations.

### NOTE

When the cross tab consists of two Text axes, Rubber Band Zoom is not available.

## Before

Before zooming

You can either:

- select **Zoom** in the context menu, or

- click the **Rubber Band Zoom**  icon on the header control

The mouse turns into a crosshair .

### During

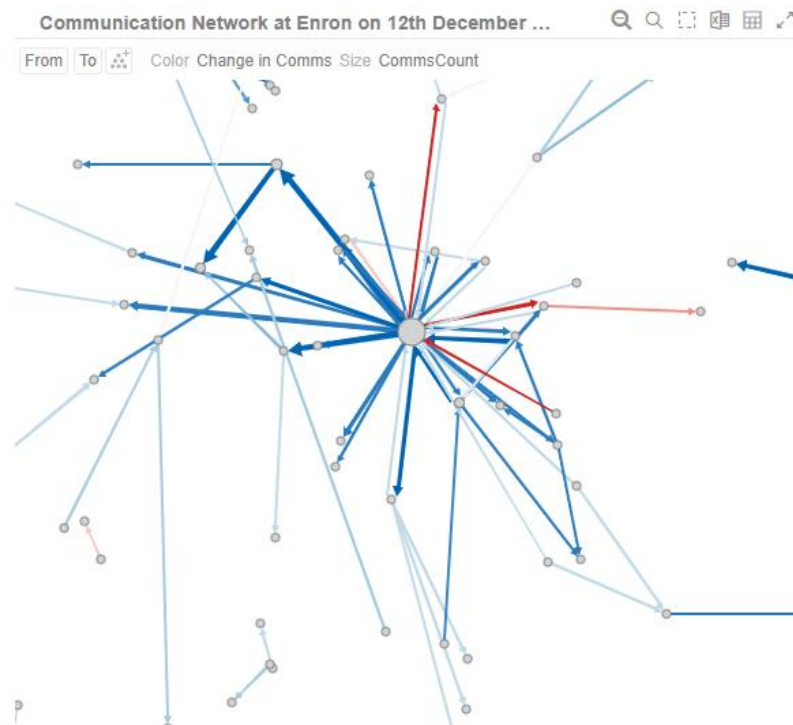

Mouse pointer has been dragged to define an area of interest.

During selection for zooming

### After

Selected items is zoomed in and the **Zoom Out** icon has is displayed.

After zooming

To revert to the original state of the visualization you can either:

- ❑ click the **Zoom Out**  icon at the top right of the visualization
- ❑ select **Zoom Out** in the context menu

## Zooming In and Out with Mouse Wheel

You can use the mouse wheel to zoom in and out on the visualization.

Examples:

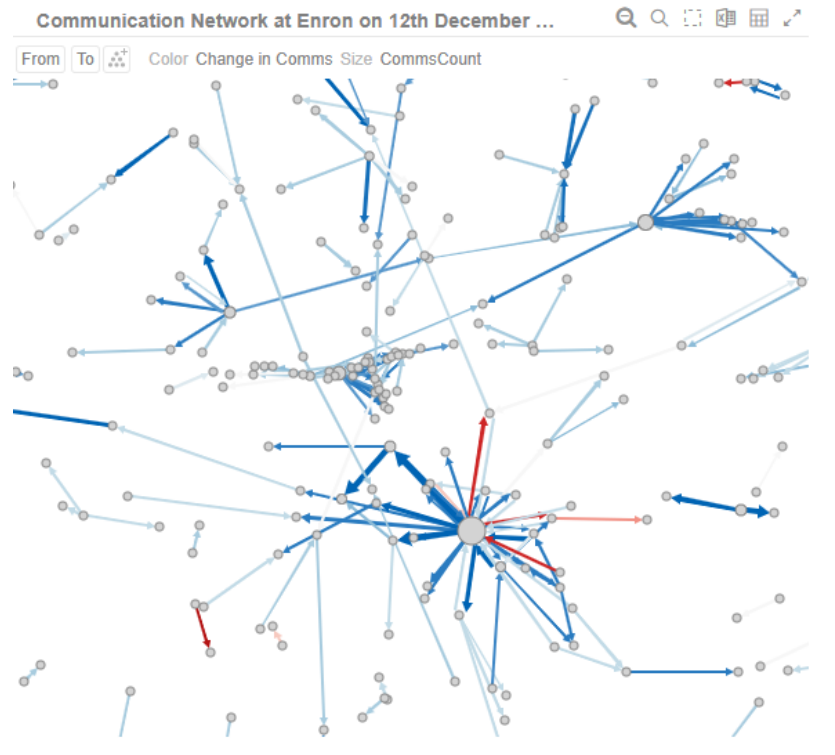

### No Zoom

No zoom

### Slight Zoom

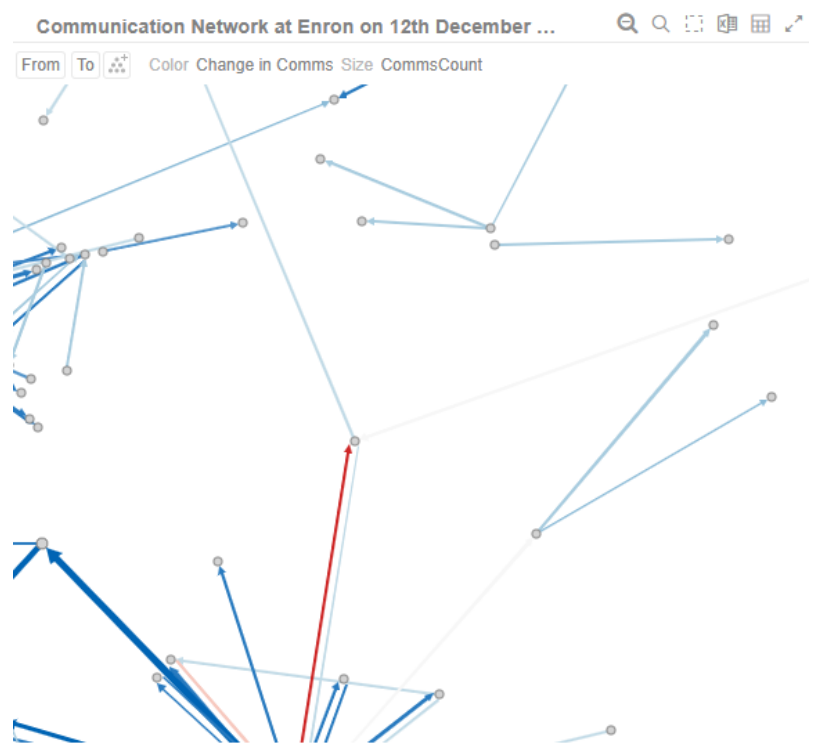

One mouse wheel rotation.

Slight zoom

### Detailed Zoom

Several mouse wheel rotations.

Detailed zoom

## Panning Around Within the Zoomed Area

Clicking on the zoomed area turns the mouse pointer into . Drag the mouse to pan around the zoomed area.

## Variable Visibility

Variable visibility defines whether the visualization cross tab, breakdown, and variable shelves are displayed.

This function is often useful in creating simple views for public websites or executive dashboards.

By default, *Show Shelves* is turned off.

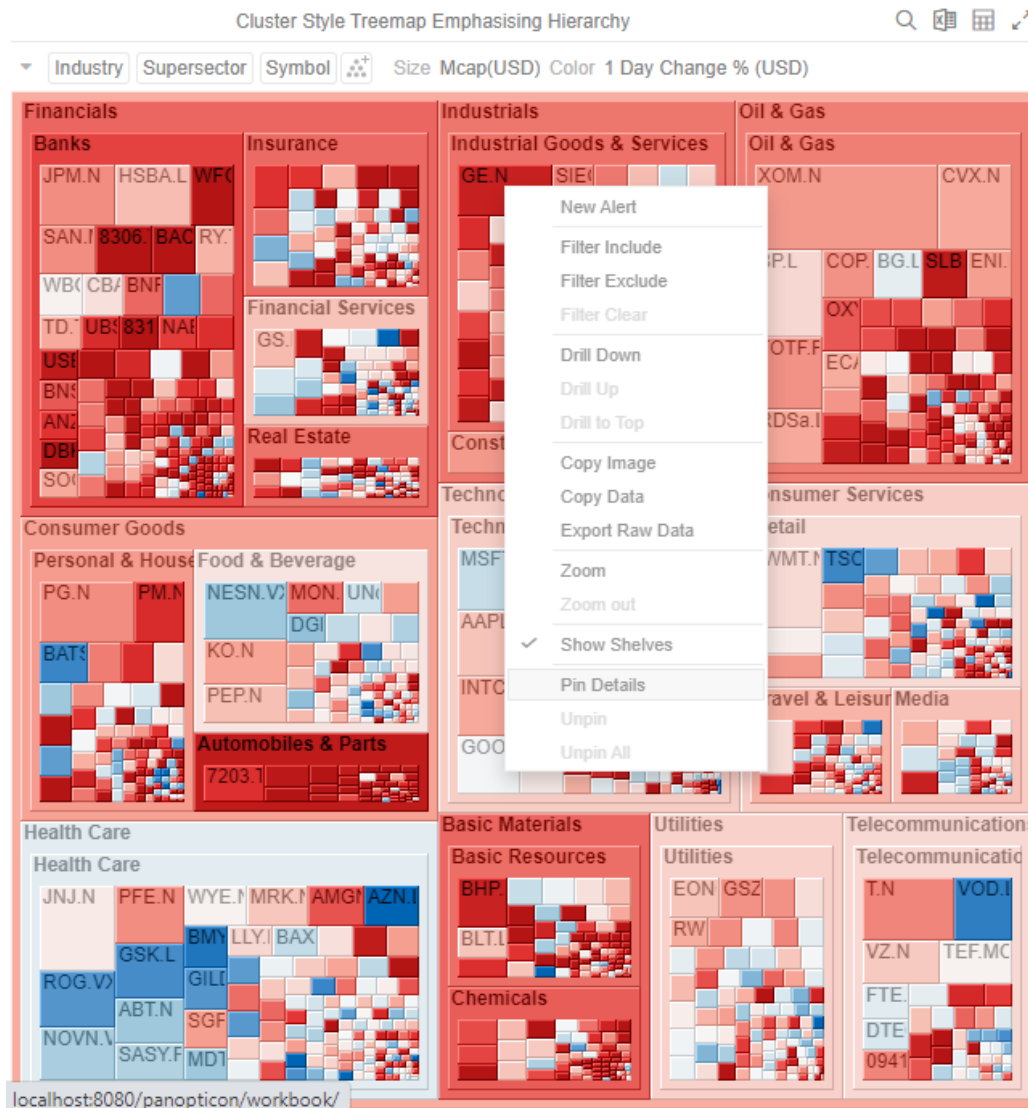

Click *Show Shelves* to select. The shelves are displayed on the visualization.

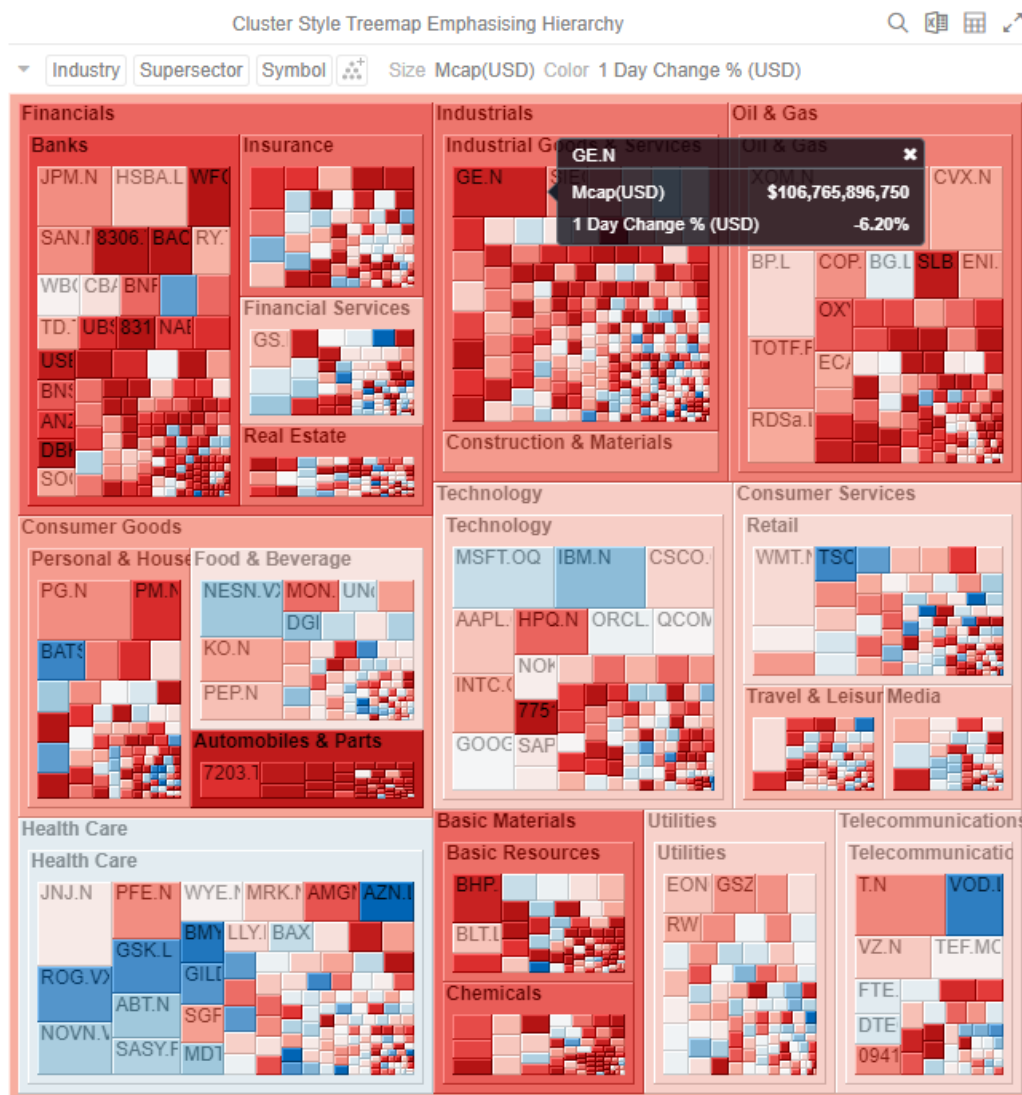

## Pinning Details Pop-up

Pinning keeps *Details* pop-up displayed in visualizations which supports easy tracking of some items of interest.

Right-click on a visualization item and select **Pin Details** in the context menu.

The *Details* pop-up is displayed and pinned.

Repeat until you pin all of the *Details* pop-up that you want to display.

## NOTE

The *Pin Details* option in the context menu is disabled once the details of a visualization item or data point is pinned.

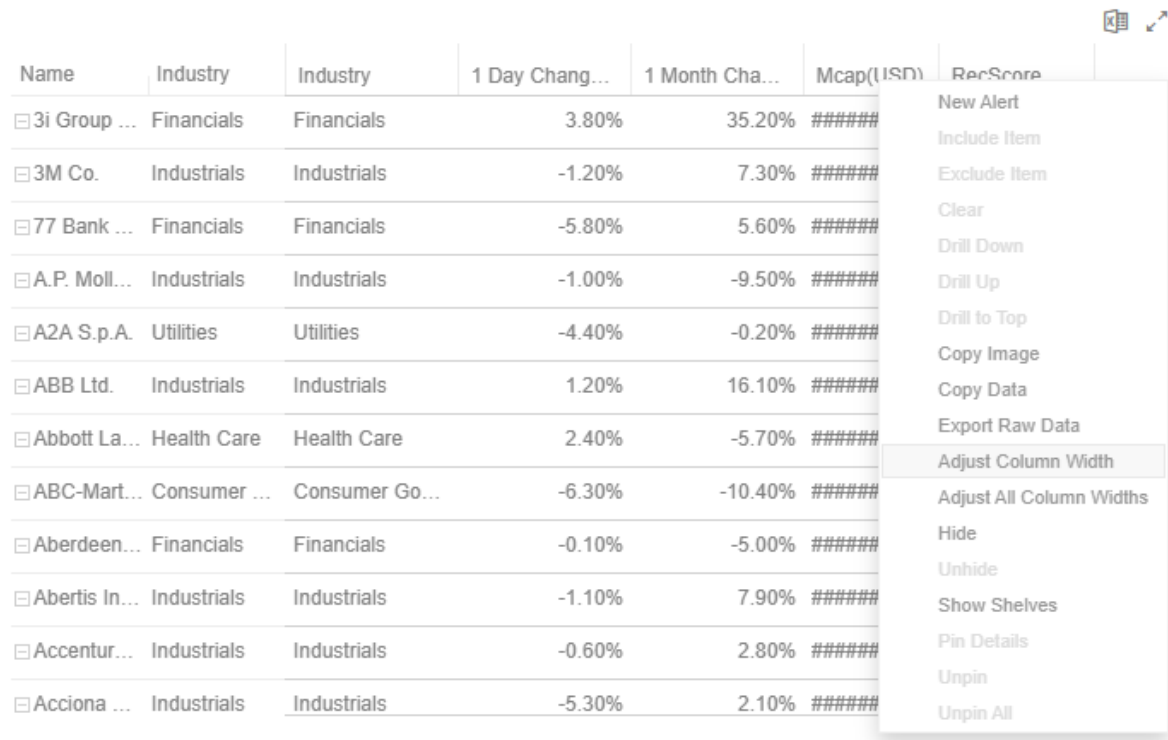

To unpin, you can either click  or right-click on the item and select **Unpin** on the context menu. Select **Unpin All** in the context menu to remove all of the pinned *Details* pop-up.

## Adjust Column Width in the Table Visualization

For the table visualization, the width of the columns can be automatically adjusted to fit the contents of a column or all of the columns.

Right-click on a column name and then select either:

- ☐ Adjust Column Width

Name	Industry	Industry	1 Day Chang...	1 Month Cha...	Mcap(USD)	RecScore

## Visual Table Sorting

The table visualization additionally supports easy column sorting. Clicking on the column heading will sort on that column throughout the selected hierarchy. Clicking again will reverse the sort order (Ascending → Descending).

## Setting Snapshot Time in a Time Series Visualization

A time series visualization consists of a series of time slices, within a defined time window. The snapshot time identifies a particular slice, which can be highlighted further in separate visualizations.

The snapshot is highlighted on the time series visualization through the aid of a vertical grid line.

The snapshot can be selected to focus on particular spikes or abnormalities in the data through either:

- ☐ Moving the snapshot on the time filter
- ☐ Right-clicking on the graph, and selecting **Set snapshot here**

The snapshot will be set for the selected time.

Setting the snapshot can also be displayed on the associated Time Filter Box of a time series visualization.

You can also drag the snapshot line anywhere in the visualization. Hover your mouse on the snapshot line and move it either to the left or to the right.

## NOTE

The Set Snapshot Here option is only available in the time series visualization context menu when the *Snapshot Grid Line* is rendered or set to Dotted, Dashed, or Solid in the Time Axis variable.

Breakdown

Header controls may include:

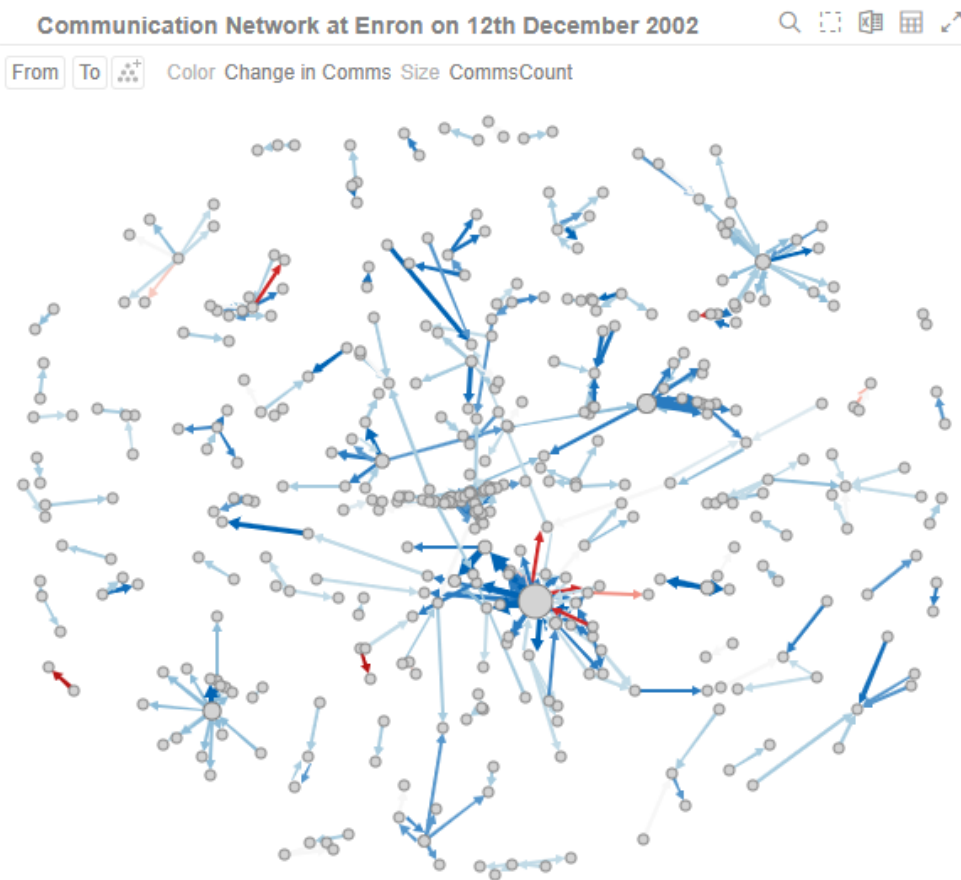

Header Control	Description
<a href="#">Rubber Band Zoom</a> 	Allows zooming in on multiple items of interest in a visualization.
<a href="#">Rubber Band Selection</a> 	Allows multiple items in a visualization to be selected or lassoed.
<a href="#">Export Excel</a> 	Exports static visualizations to a CSV-format file.
<a href="#">Toggle Display Mode</a> 	Displays a visualization as a table and vice versa.
<a href="#">Maximize</a> 	Maximizes the visualization to be displayed on the full dashboard area.

## Exporting to Excel (TSV-format) of Visualizations

Click the **Export Excel**  icon of a static visualization. A copy of the CSV-format tile is downloaded.

## Toggling Between a Visualization and a Table

Click the **Toggle Display Mode**  icon of a visualization.

It will be replaced with a Table visualization.

The Table details display the same breakdowns of the original visualization and all the visualization detail variables as visible members of the Table.

#### NOTE

The Table will default to displaying zebra stripes.

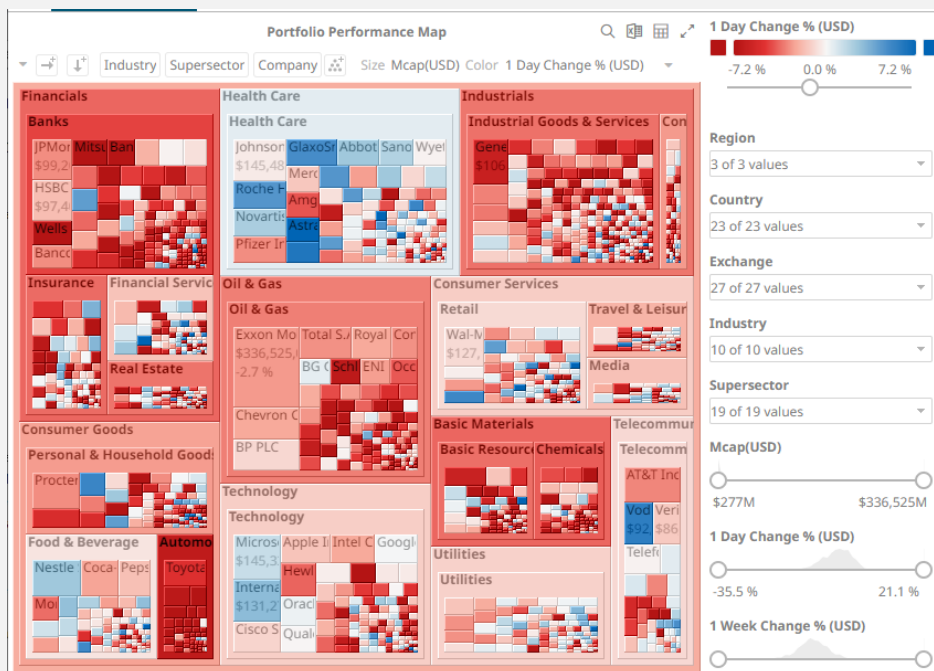

When the **Toggle Display Mode** icon is clicked again, the Table will toggle back to the original visualization.

#### NOTE

- Closing and opening the dashboard will revert to the original visualization.
- Changing dashboard tabs will revert to the original visualization.
- Applying filters on the dashboard will not cause the Table to be toggled back to a visualization but will display the filtered view of the Table. For example: Industry = Basic Materials and Telecommunications

Consequently, toggling back will then display the filtered view of the visualization. The example below will only display Basic Materials and Telecommunications.

## Maximize

Visualizations can be maximized to display the full dashboard area by clicking the **Maximize**  icon. To return to normal, click the visualization **Restore**  icon.

Before clicking Maximize

After clicking Maximize

## Drilling Into, Sorting, Removing, Adding, and Swapping Columns in a Breakdown and Cross Tab Points

If there are no available columns added as a breakdown  or cross tab Row  or Column , click the corresponding icon to display and select from the list of text columns available on the associated data table of the visualization.

For example:

Right-clicking on a *Breakdown* column displays this context menu.

Right-clicking on a cross tab *Row* or *Column* displays this context menu.

## Drilling into Hierarchy Displays

You can drill into cross tab columns, cross tab rows, and breakdown columns.

### Steps:

Right-click on a column, select **Drill** and then the level you want to drill down into.

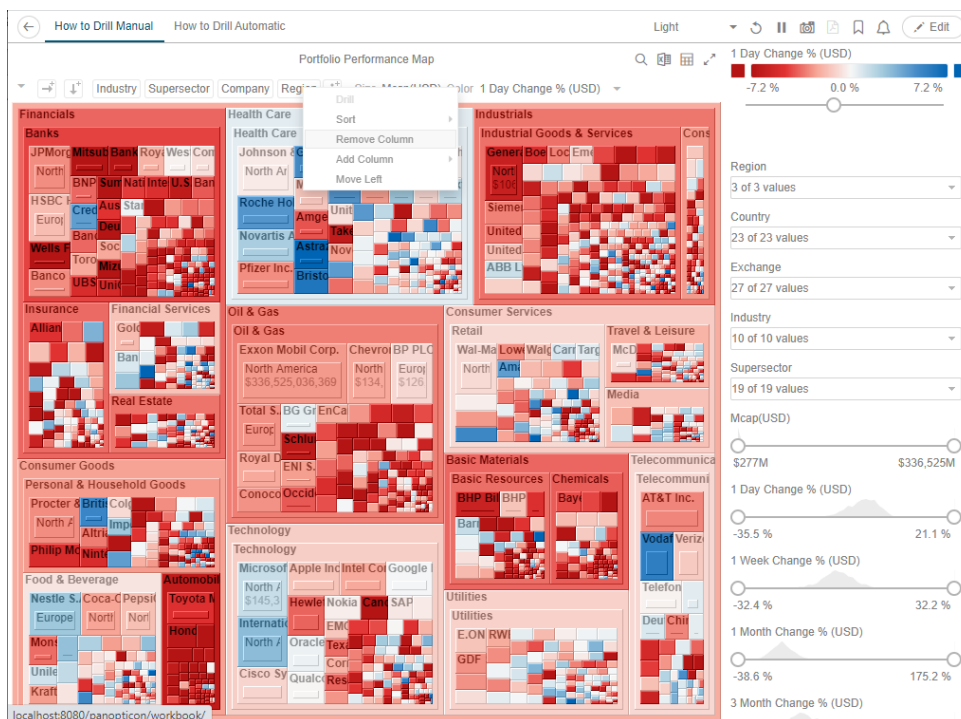

The selected level will appear gray.

Click the gray item to return to the default view that includes all categories in the data.

## Removing Breakdown or Cross Tab Columns

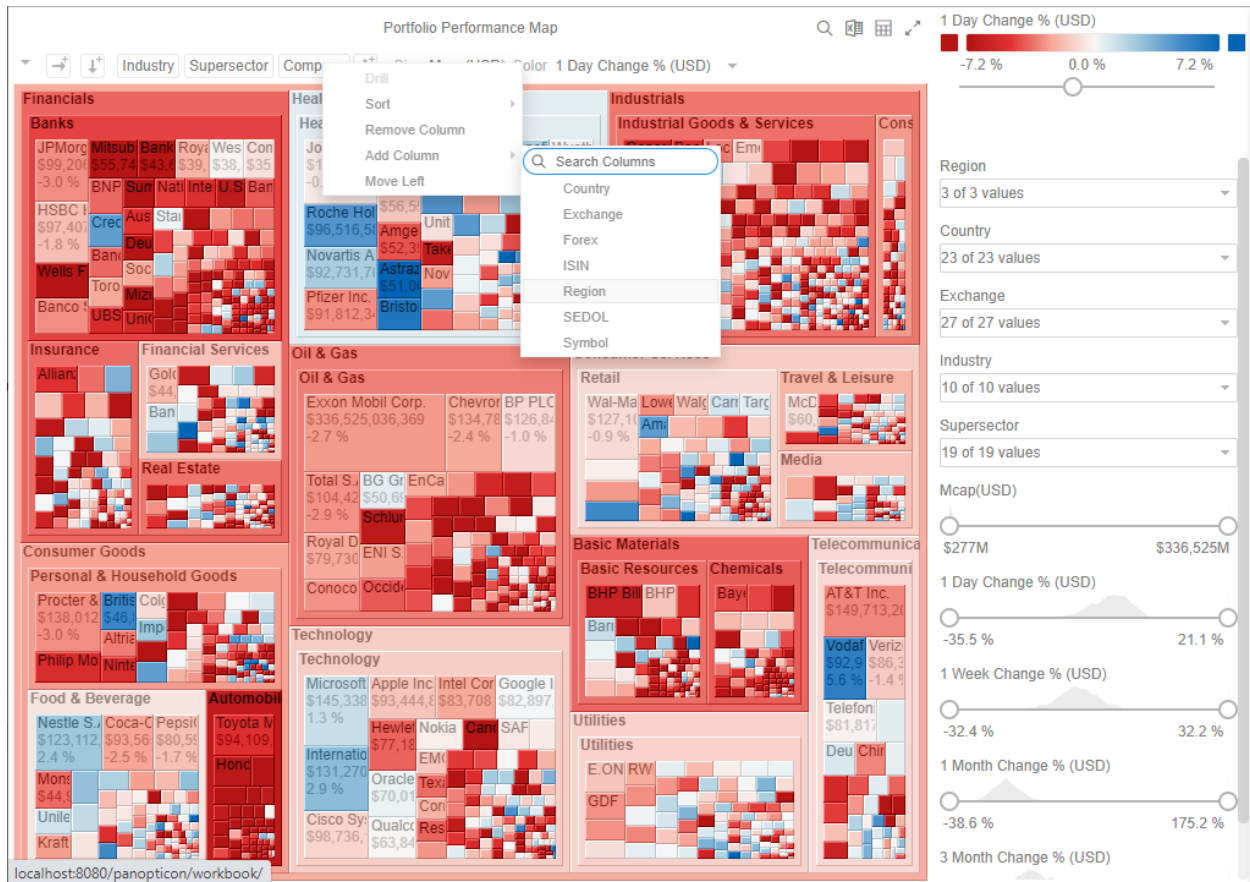

Right-click on a column and select **Remove Column** on the context menu.

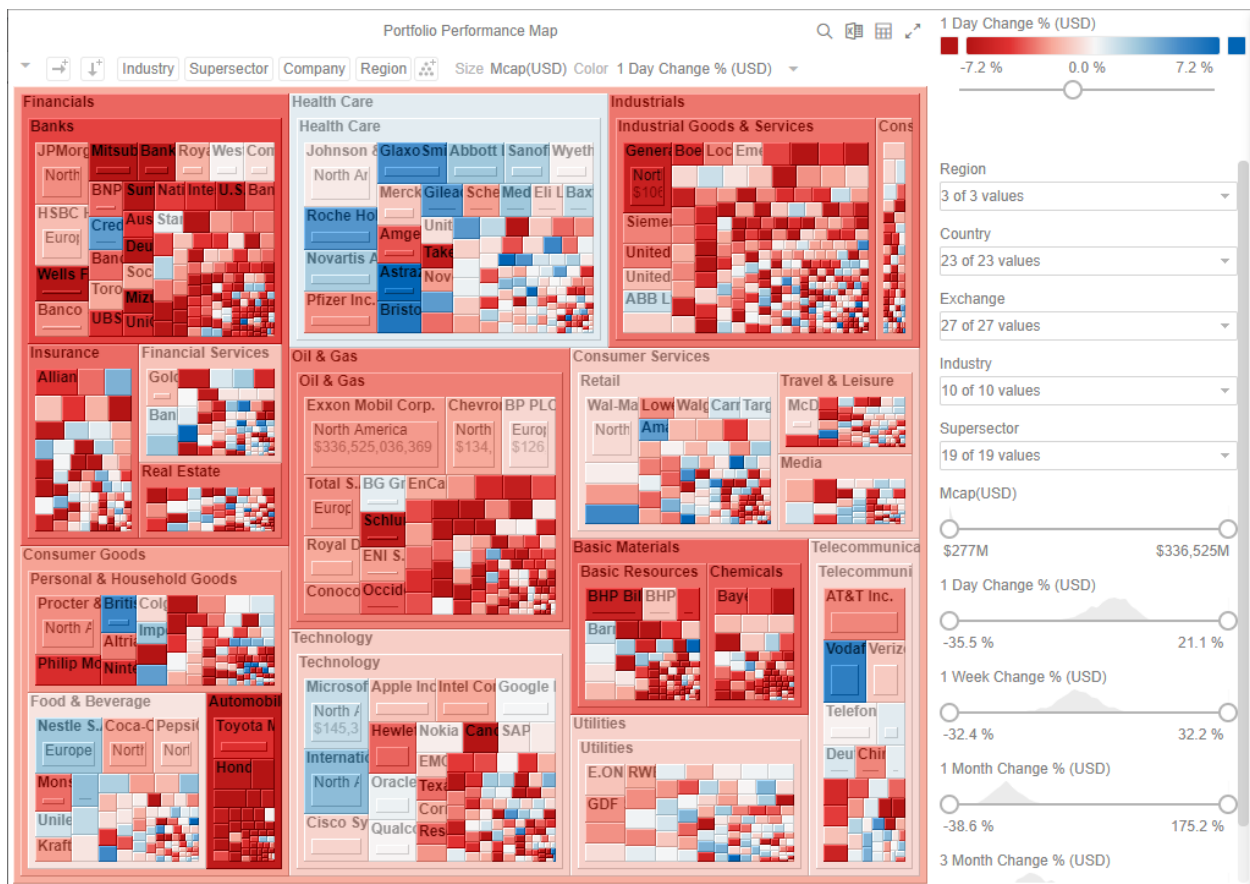

## Adding Breakdown or Cross Tab Columns

Right-click on a column, select **Add Column** on the context menu and then the column to add. You can filter the list by entering a column into *Search Columns*.

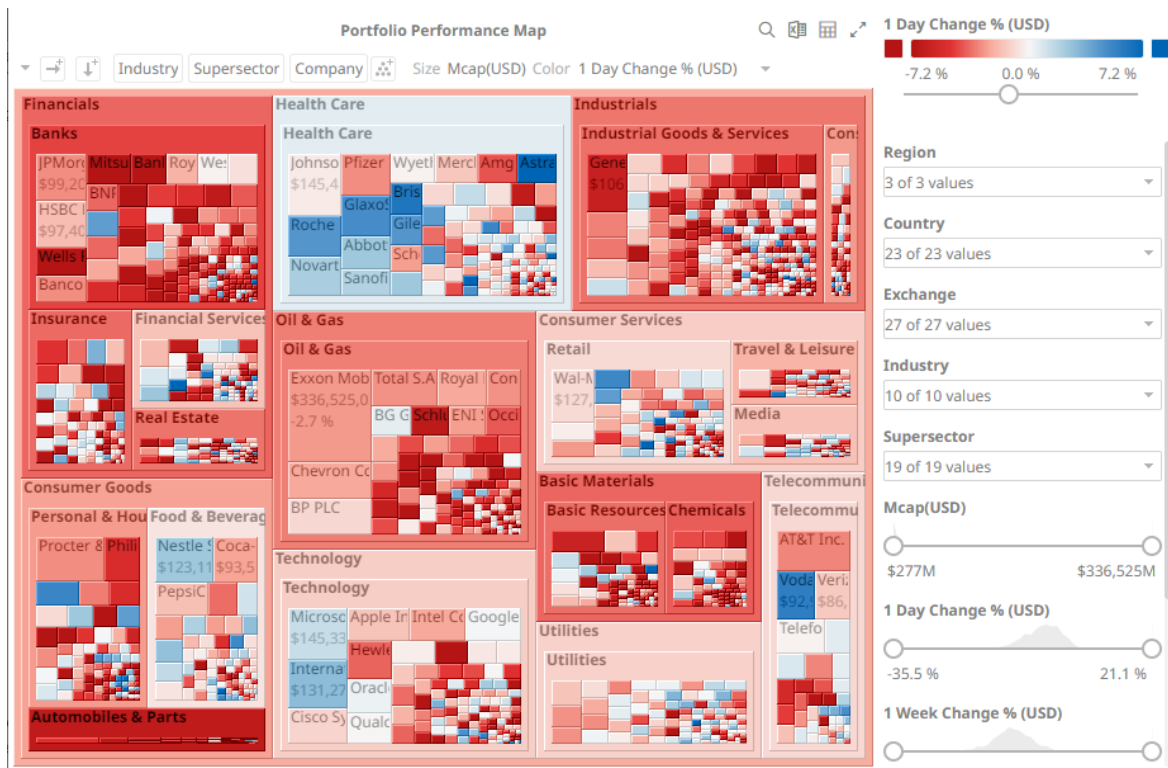

## Moving Breakdown Columns

The **Move Right** or **Move Left** options are only available when there is more than one breakdown column.

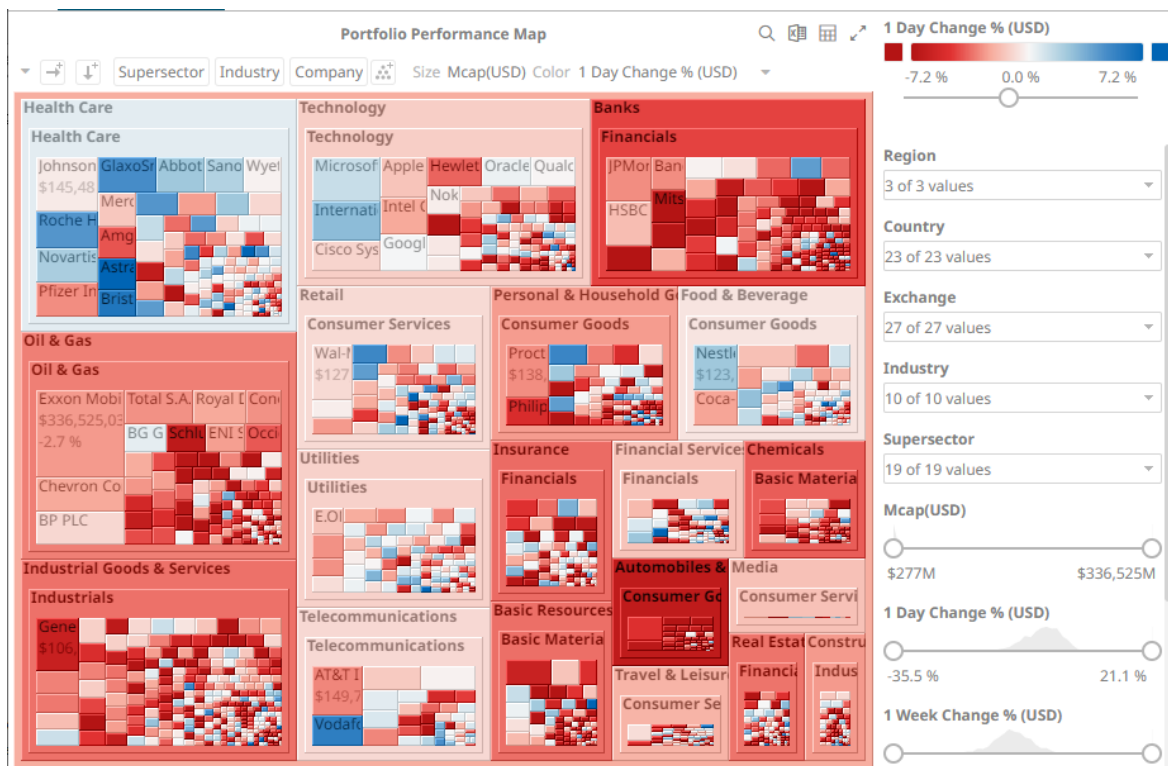

Right-click on a breakdown column and select **Move Right** or **Move Left** on the context menu.

You can also swap or move columns by selecting and dragging them to the preferred hierarchy level.

From: **Industry > Supersector > Company**

To: **Supersector > Industry > Company**

## toggling Between Rows and Columns of a Cross Tab

This feature supports the easy swapping between rows to columns, and vice versa in, the pivot points of a cross tab.

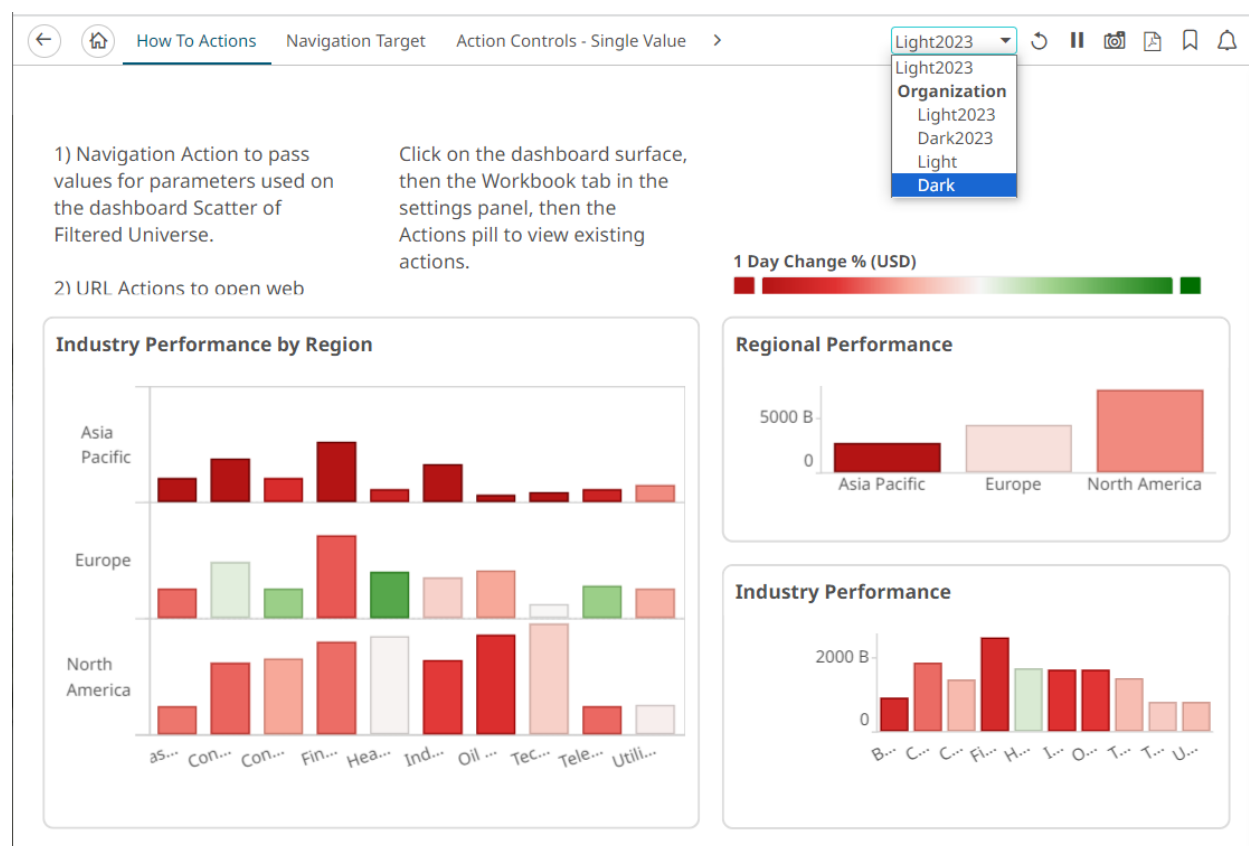

In a visualization that is cross tabbed, right-click on row or column and select **Swap Columns and Rows** on the context menu.

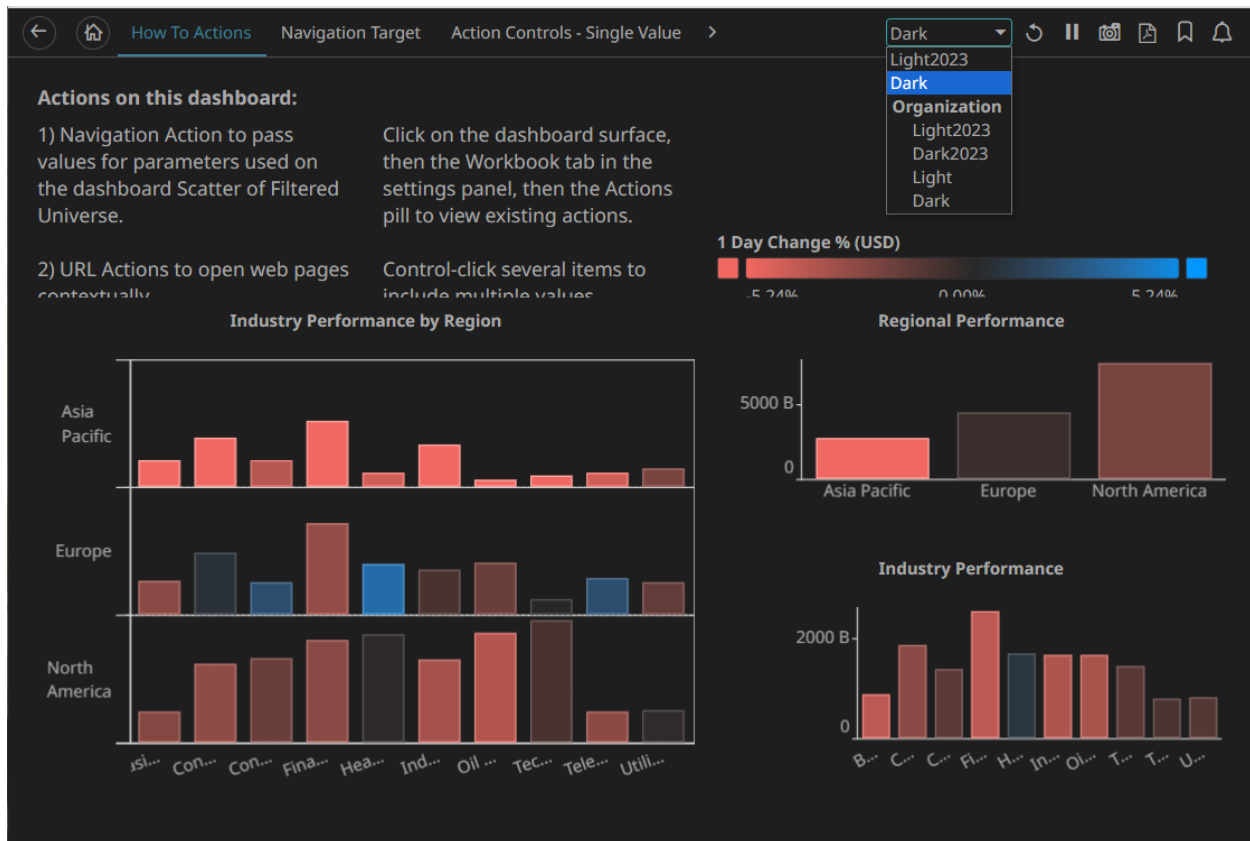

The rows and columns will be swapped in the *Columns* or *Rows* section of the visualization.

You can opt to revert to the original columns of the *Columns* and *Rows* by selecting the **Swap Columns and Rows** on the context menu.

## Dynamic Switching of Workbook Theme

You can dynamically switch to other workbook themes.

## WORKBOOK TOOLBAR

An opened workbook has several toolbar options:

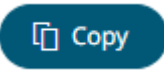

Toolbar Option	Description
Data Refresh 	Manually refreshes the data.
Pause Real-Time 	Clicking the icon changes it to  and pauses the streaming data sources.
<a href="#">Copy Image</a> 	Exports the whole dashboard image to the clipboard.
<a href="#">Create PDF Report</a> 	Set the dashboards that will be included in the PDF report.
<a href="#">Bookmarks</a> 	Add and manage bookmarks.
<a href="#">Alerts</a> 	Manage alerts and notifications.

## Copying Dashboard Image

### Steps:

1. Click the **Copy Image**  icon on the toolbar.  
The **Copy to Clipboard** button displays.

2. Click  to copy and paste the whole dashboard image to another application.

## Ad Hoc PDF Generation

Select the dashboards to be included in the generated PDF.

### Steps:

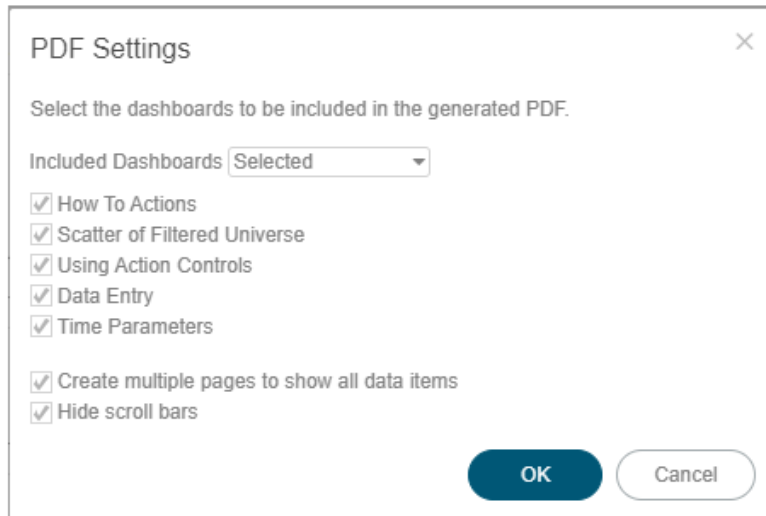

1. Click the **Create PDF Report**  icon on the toolbar.  
The *PDF Settings* dialog displays.

2. Select the dashboards to be included:

- All dashboards
- Current dashboard
- Selected

The check boxes are enabled and all the dashboards are checked by default.

Check only those that will be included in the generated PDF.

Some visualizations show a portion of the available content adding scroll bars. E.g., table, horizon graph, etc.

The final two options of the dialog relate to these visualizations.

3. To output all the content within a visualization that has scroll bars, for example, to output all the rows within a table, check the **Create multiple pages to show all data items** box.
4. To hide scroll bars from the output PDF pages, check the **Hide scroll bars** box.
5. Click  button to start the PDF generation.

This will allow the Panopticon Real Time to read all the datasets necessary to output the dashboard and produce the PDF file.

#### NOTE

Ad hoc PDF generation in the Web client using Google Chrome (or other browsers) may be hindered by the AdBlock Extension.

To remove the AdBlock Extension in Google Chrome, perform these steps:

1. Click the **Chrome Menu**  icon on the browser toolbar.
2. Highlight *Tools*, then click Extensions from the sub-menu.
3. Click **Remove** in the AdBlock Plus entry (e.g., uBlockOrigin).
4. Click **Remove** in the confirmation message that displays.

## Bookmarking

Bookmarks are saved configurations of the active dashboard and workbook. A bookmark can be added, by authenticating, and clicking on the **Bookmarks**  icon.

Bookmarks are not available with anonymous access workbooks.

Bookmarks do not save data, but do save the selected:

- ☐ Dashboard
- ☐ Parameters
- ☐ Filters
- ☐ Breakdowns, Hierarchies, Visible Depth, and Drill Level
- ☐ Variables (Size, Color, X, Y, etc.)

Consequently, although the underlying data may change, a specific view of that data can be specified and bookmarked for future usage.

Bookmarks can be added and are available to all authenticated users of the workbook.

Bookmarks also generate a unique URL, which can be sent to another individual with access, allowing them to see exactly the same view of the selected dashboard.

New bookmarks can be added by clicking the **New**  button.

A new instance of the bookmark is added under the My Bookmarks section in the Bookmarks pane. The bookmark is initially named **<Workbook> - <Dashboard> - Bookmark<number>**.

Shared With Me

+ New

Click **Modify**  icon to define the settings of the bookmark. The *Bookmark Settings* pane is displayed.

Property	Description
My Bookmarks	User's own bookmarks.
Shared Bookmarks	Bookmarks shared to the user.
Delete Bookmark	Remove the bookmark.

	 <p>Click <b>Yes</b> on the notification message to delete the bookmark.</p>
Search Bookmark	To search for a particular bookmark, enter it in the <i>Search</i> box. You can also enter one or more characters into the <i>Search</i> box and the suggested list of bookmarks that matched the entries will be displayed.
Modify Bookmark	Display the <i>Bookmark Settings</i> pane for the modification of the bookmark settings.
Update Bookmark	<p>Update the bookmark settings.</p>  <p>Click <b>Yes</b> on the notification message to update.</p>
Create Bookmark	Allows the creation of a new bookmark.
Close	Close the <i>Bookmark Settings</i> pane.
Name	Name of the bookmark.
Description	Description of the bookmark.
Dashboard Parameters	<p>Available dashboard parameters.</p> <p><b>NOTES:</b></p> <ul style="list-style-type: none"> <li>Excluding a parameter value sets its value in the bookmark to type Text and empty string value. This will allow the dashboard logic to dictate the parameter value that should be used when opening the bookmark. For example, if the dashboard contains an Action Date Picker that defaults to <b>now</b>, and that same parameter value is excluded from the bookmark, then the Action Date Picker default value will be the value when the bookmark is opened.</li> <li>Directly modifying the parameter value in the bookmark (such as entering <b>now</b>, <b>today</b>, or <b>yesterday</b>) is not supported.</li> </ul>
Save	Enabled when a change is made in the bookmark settings. Click to save.

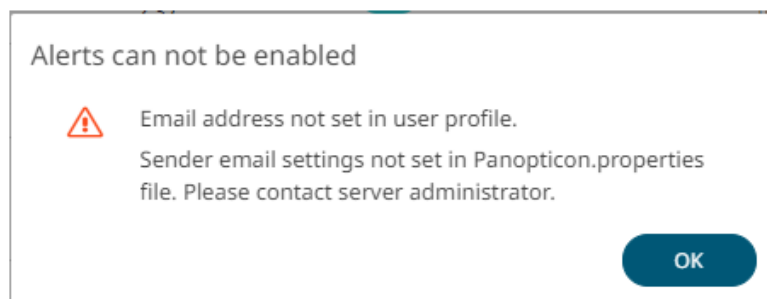

## [2] ALERTING

The Alerts function allows to notify you when the data in a visualization has met your predefined settings.

If alerts are required to be sent via email, the following properties must be configured first in the `Panopticon.properties` file.

<b>Property</b>	Alert
Attribute	<code>alert.creation.only.by.administrators</code>
Description	Enable or disable whether only Administrators can create alerts.
Default Value	<b>false</b>
<b>Property</b>	Alert
Attribute	<code>email.address</code>
Description	The email address where the alert will be sent from.
Default Value	
<b>Property</b>	Alert
Attribute	<code>email.password</code>
Description	The email password, if available.
Default Value	
<b>Property</b>	Email
Attribute	<code>email.host</code>
Description	The host name used by the email server.
Default Value	
<b>Property</b>	Email
Attribute	<code>email.port</code>
Description	The port number used by the email server.
Default Value	

Otherwise, when trying to enable an alert, this error will be displayed:

Save the updated file and restart Tomcat.

## Setting Up Alerts on the Web Client

Alerts can be defined against:

- ☐ Streaming data sources (including CEP Engines and message queues)
- ☐ Periodically refreshed data sources (like Oracle, SAP Sybase, SQL Server, and so on)

Alert definition can be done by right-clicking on a streaming numeric data in a visualization in the Web client and setting the limits, duration, what will be included, how many and when an email will be sent.

## NOTE

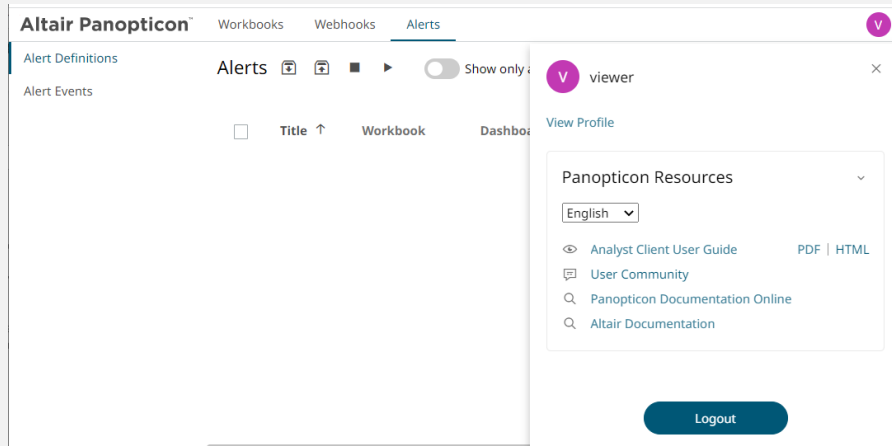

Before setting up the visualization alert, enter the email of the user or group who will receive the alert on the *User Profile*:

### Steps:

1. On the toolbar, click .

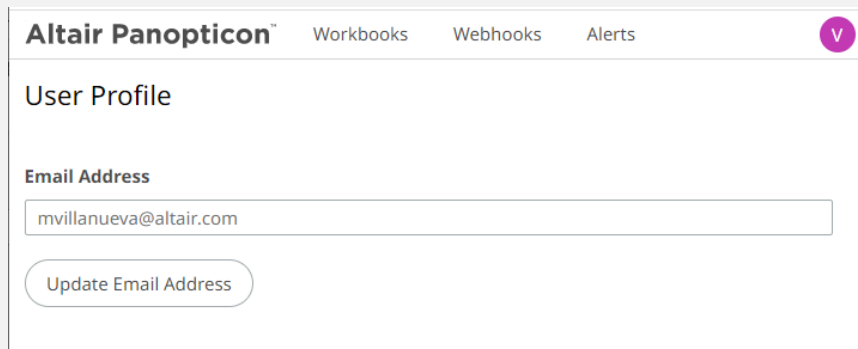

The drop-down menu displays.

2. Click *View Profile*.

The *User Profile* page displays.

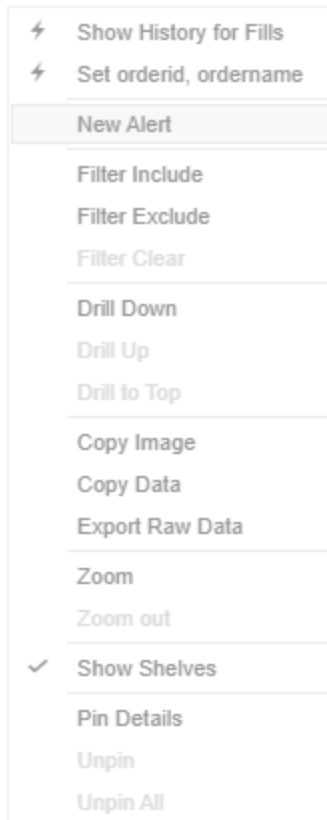

3. Enter the *Email Address*.

4. Click .

### Steps:

1. Open a workbook on the Web client and right-click on a streaming numeric data in a visualization. Select *New Alert* on the context menu.

The *Alerts* dialog displays with the name of the visualization where the alert will be set.

☒ Active Hours

from  to

☒ MONDAY ☒ TUESDAY ☒ WEDNESDAY ☒ THURSDAY ☒ FRIDAY ☐ SATURDAY ☐ SUNDAY

Show in Timezone

By default, the duration is from **9:00 AM** to **5:00 AM** on **Monday, Tuesday, Wednesday, Thursday, and Friday**.

- To modify the *Active Hours*, click .

The *Clock* settings display.

09	00	AM
10	01	PM
11	02	
12	03	
01	04	
02	05	
03	06	

- Select the *Hour*, *Minutes*, and *AM/PM* settings.
- To modify the *Active Days*, check the boxes of the desired days.
- To apply the active hours in another time zone, select the desired value from the *Show in Timezone* drop-down list box.

Once set, the *From* and *To* limits will be applied for that time zone. If not set, the server default time zone will be used.

- Tap the **Activated** slider to turn it on.

- Click . The new alert is added on the *Alerts* page.

#### NOTE

When creating alerts for grand total, ensure that no breakdown is set.

## Sorting Alerts

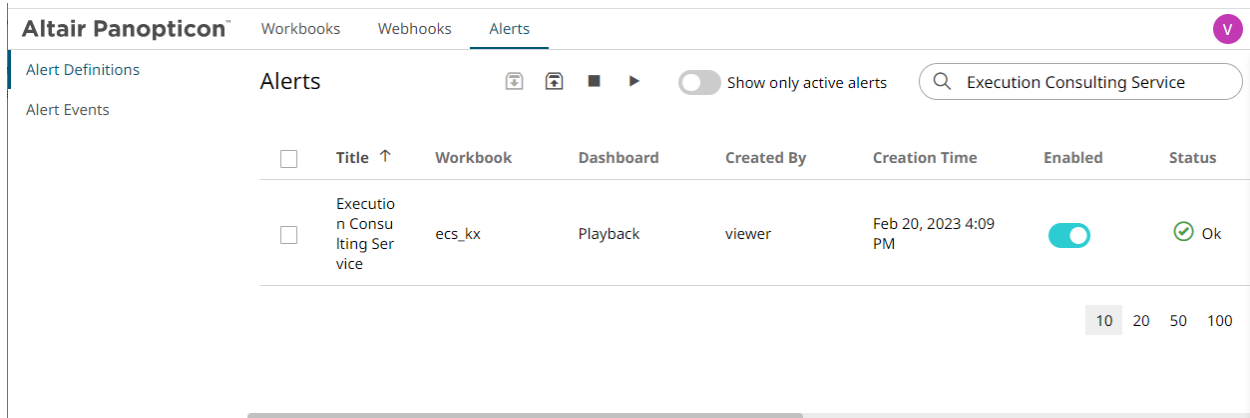

By default, the list of alerts is sorted by *Title* in ascending order. You can modify the sorting of the list by clicking the

button of the *Title*, *Workbook*, *Dashboard*, *Created By*, *Creation Time*, *Enabled*, *Status*, *Triggered*, or *Triggered Today* columns. The icon beside the column that was used for the sorting will indicate if it was in ascending or descending order.

## Searching for Alerts

To search for a particular alert, enter it in the *Search* box.

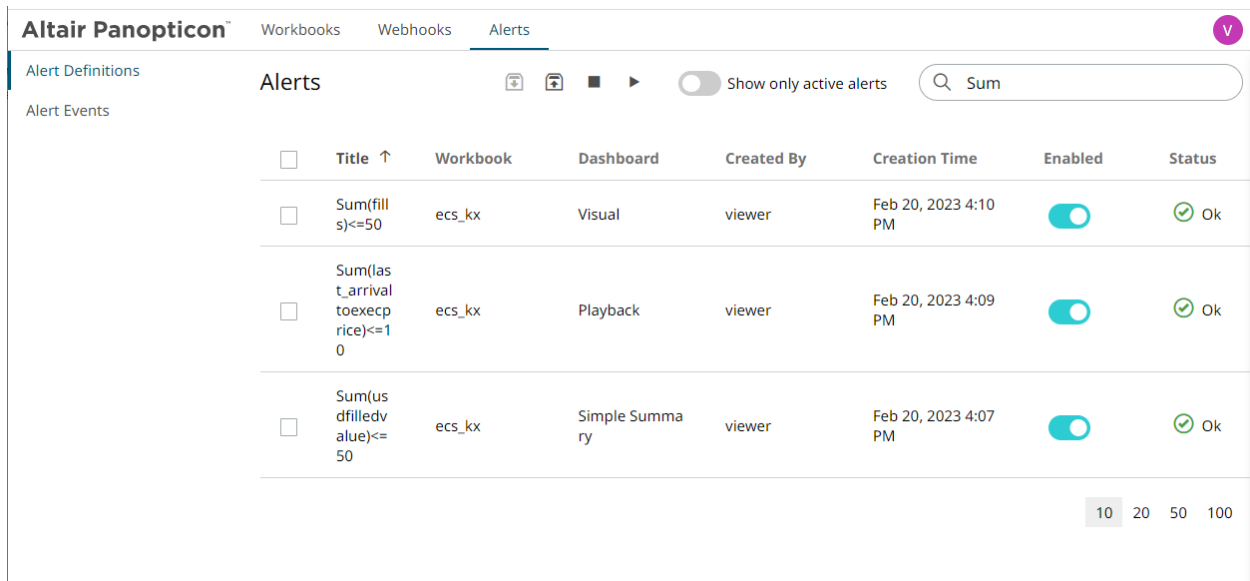

The screenshot shows the Altair Panopticon interface with the 'Alerts' tab selected. A search box at the top right contains the text 'Execution Consulting Service'. The table below displays a single alert entry.

<input type="checkbox"/>	Title ↑	Workbook	Dashboard	Created By	Creation Time	Enabled	Status
<input type="checkbox"/>	Execution Consulting Service	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>	✓ Ok

At the bottom right of the table, there are pagination controls showing '10 20 50 100'.

You can also enter one or more characters into the *Filter Applications* box and the suggested list of alerts that matched the entries will be displayed.

The screenshot shows the Altair Panopticon interface with the 'Alerts' tab selected. A search box at the top right contains the text 'Sum'. The table below displays three alert entries.

<input type="checkbox"/>	Title ↑	Workbook	Dashboard	Created By	Creation Time	Enabled	Status
<input type="checkbox"/>	Sum(fill s)<=50	ecs_kx	Visual	viewer	Feb 20, 2023 4:10 PM	<input checked="" type="checkbox"/>	✓ Ok
<input type="checkbox"/>	Sum(last_arrival toexpiration)<=10	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>	✓ Ok
<input type="checkbox"/>	Sum(usedvalue)<=50	ecs_kx	Simple Summary	viewer	Feb 20, 2023 4:07 PM	<input checked="" type="checkbox"/>	✓ Ok

At the bottom right of the table, there are pagination controls showing '10 20 50 100'.

## Enabling Alerts on the Alerts Page

Tap the **Enabled** slider to turn it on.

## Displaying Active Alerts

Tap the **Show only active alerts** slider to turn it on.

The screenshot shows the Altair Panopticon interface with the 'Alerts' tab selected. The 'Show only active alerts' slider is currently disabled (grey). The table displays five alerts, including both active and inactive ones.

<input type="checkbox"/>	Title ↑	Workbook	Dashboard	Created By	Creation Time	Enabled
<input type="checkbox"/>	Execution Consulting Service	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Sum(fill s)<=50	ecs_kx	Visual	viewer	Feb 20, 2023 4:10 PM	<input type="checkbox"/>
<input type="checkbox"/>	Sum(last_arrival toexecption)<=10	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Sum(usedfilledvalue)<=50	ecs_kx	Simple Summary	viewer	Feb 20, 2023 4:07 PM	<input type="checkbox"/>

At the bottom right, there are pagination controls: 10, 20, 50, 100.

Only the active or enabled alerts are displayed on the *Alerts* tab.

The screenshot shows the same Altair Panopticon interface, but the 'Show only active alerts' slider is now enabled (blue). The table now only displays the two active alerts from the previous view.

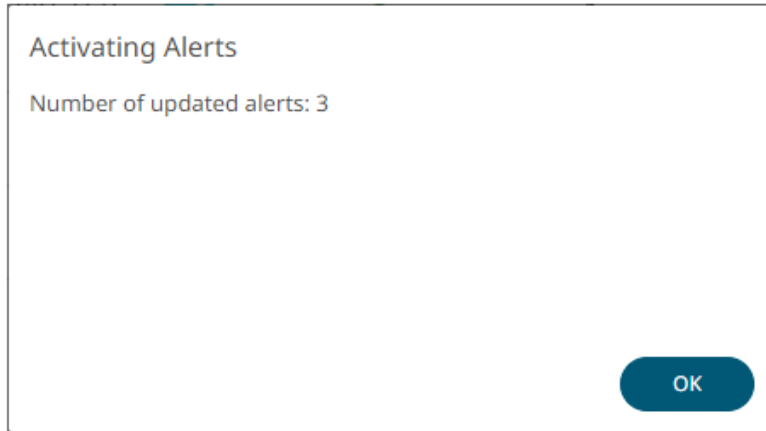

<input type="checkbox"/>	Title ↑	Workbook	Dashboard	Created By	Creation Time	Enabled
<input type="checkbox"/>	Execution Consulting Service	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Sum(last_arrival toexecption)<=10	ecs_kx	Playback	viewer	Feb 20, 2023 4:09 PM	<input checked="" type="checkbox"/>

At the bottom right, there are pagination controls: 10, 20, 50, 100.

## Activating or Deactivating All Alerts

Alerts can be activated or deactivated in one click.

To activate all deactivated alerts, click **Activate All** . All of the deactivated alerts are activated.

To deactivate all activated alerts, click **Deactivate All** . All of the activated alerts are deactivated.

Click  to close the dialog.

## Viewing Triggered Alerts

View the details of all the triggered events of [activated](#) alerts.

### Steps:

1. Click the **Alert Events** tab on the *Alerts* page.  
The *Alerts Triggered Events* page displays the following information.

Altair Panopticon™
Workbooks
Webhooks
Alerts

Alert Definitions
Alert Events

### Alerts

NOTE: Alert Events are recorded as long as the page is kept open in the web browser, closing, or navigating away from the page will clear the list.

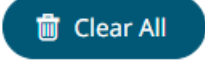

Clear All

Trigger Time	Title	Description	Workbook Name	Dashboard	
Jun 7, 2023 2:35:55 pm	Ordersize>=10	industry:Basic Materials, sym:O13075, ordername:L-RIO BUY 3000k, ...	PurchaseHistory\ecs_kx	Tabular	
Jun 7, 2023 2:35:55 pm	Pcntfilled	side:BUY, pcntfilled=93.54%	PurchaseHistory\ecs_kx	Simple Summary	

10 20 50 100

Property	Description
Trigger Time	<p>The Date/Time when the alert was triggered.</p> <p>Click  to display a multi-select checkbox list. By default, all checkboxes are selected (Select All). Selecting or deselecting items in the list controls the filter.</p>
Title	<p>Title of the alert.</p> <p>Click  to display a multi-select checkbox list. By default, all checkboxes are selected (Select All). Selecting or deselecting items in the list controls the filter.</p>
Description	Description of the alert.
Workbook Name	The workbook name where the alert was set.
Dashboard	The dashboard name where the alert was set.

2. You can also do any of the following options:

- Click  or  of a column title to sort the list.
- Click  to delete a triggered alert.
- Click  to clear the list.
- Click a **Title** link to go to the workbook where the alert was triggered.

## Importing Alerts

Allows you to import alerts shared by other others.

### Steps:

1. On the **Alert Definitions** tab, click the **Import Alerts**  icon.

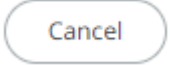

The *Upload Alert* dialog displays.

2. To upload an alert, do one of the following:
  - Drag the file from your desktop and drop on the dialog, or
  - Click **Choose alert** and then browse and select one on the *Open* dialog that displays.

3. Click .

A notification displays once the color palettes file is uploaded.

Click  to close the dialog. The uploaded color palette is added in the list.

## Exporting Alerts

You can download a copy of any of the alerts.

### Steps:

1. On the *Alerts* list, select the checkbox of the alerts you want to export.
2. Click **Export Alerts**  icon.

The selected alerts are downloaded.

## Modifying Alert Settings

### Steps:

1. Open a workbook with an alert and click on the **Alerts**  icon.  
The *Alerts* panel displays with the list of alerts.
2. Click an alert to modify.  
The *Alerts* dialog displays with the status.
3. Make the necessary changes then click **OK** to save them.

## Deleting Alerts

Alerts can be deleted on:

- ☐ The Alerts panel
- ☐ An Alerts dialog
- ☐ The Alerts tab

### Deleting Alerts on the Alerts Panel:

1. Open a workbook with an alert and click on the **Alerts**  icon.  
The *Alerts* panel displays with the list of alerts.
2. Check the box of an alert and click the **Delete**  icon. You can also check several boxes to delete multiple alerts.

### Deleting Alerts on an Alerts Dialog:

1. Open a workbook with an alert and click on the **Alerts**  icon.  
The *Alerts* panel displays with the list of alerts.
2. Click an alert. The *Alerts* dialog displays.
3. Click the **Delete**  icon.

### Deleting Alerts on the Alerts tab:

1. Go to the **Alerts** tab.  
The **Alerts** tab displays the list of alerts.

Altair Panopticon™

- Click the  of an alert to delete.  
A confirmation message displays.

Are you sure you want to delete this alert?

Yes

No

- Click **Yes**.

## Enabling Alerts

Alerts can be enabled either on:

- ☐ the Alerts panel
- ☐ an Alerts dialog

### Enabling Alerts on the Alerts Panel:

- Open a workbook with an alert and click on the **Alerts**  icon.  
The *Alerts* panel displays with the list of alerts.
- Tap the *Activated* slider to turn it on.

### Enabling Alerts on an Alerts Dialog:

- Open a workbook with an alert and click on the **Alerts**  icon.  
The *Alerts* panel displays with the list of alerts.

3. Click an alert. The *Alerts* dialog displays.
4. Tap the *Activated* slider to turn it on and click **OK**.

## Sample Email Alerts

An alert is generated when the alert set state changes from **Off** to **On** and recorded in the alert history.

An alert is only issued by email if the alert has not already been sent in the last 'n' minutes as defined in the *Alerts* dialog.

When an alert is issued, an email is sent to the defined email address.

The email includes:

- ☐ Link to the workbook or dashboard
- ☐ Condition and limit value
- ☐ Breakdown
- ☐ Name of the visualization where the alert was set
- ☐ PNG image of the visualization or dashboard

All items that do not match the criteria are excluded from the display.

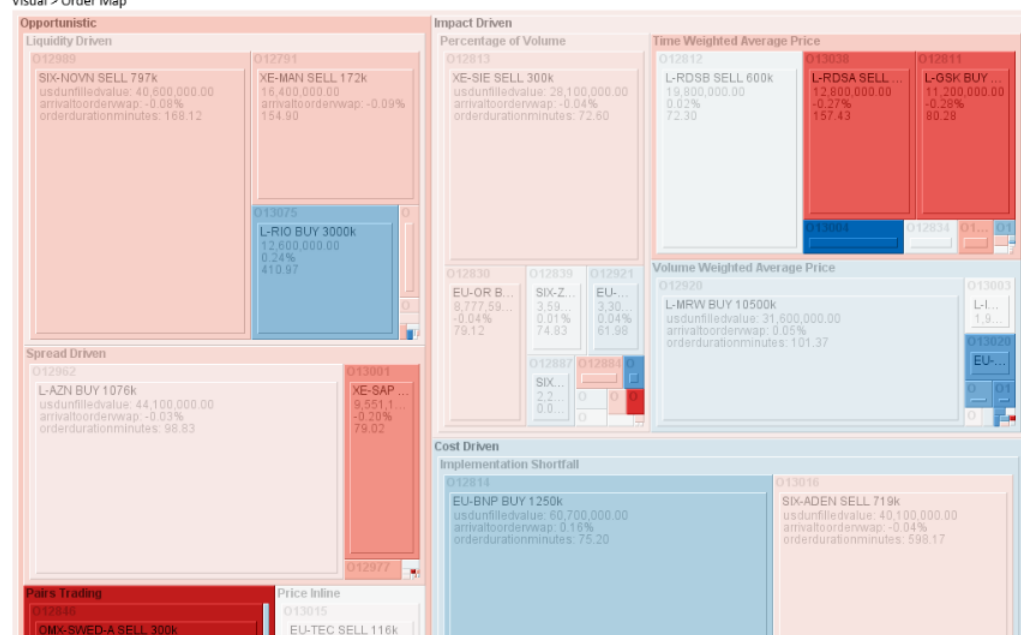

Dashboard: [http://localhost:8080/panopticon/workbook/#/ecs\\_kx/Visual](http://localhost:8080/panopticon/workbook/#/ecs_kx/Visual)

Condition: Sum(fills) >= 10.0

The alert was triggered by the following items:

algotype:Opportunistic, algoname:Liquidity Driven, sym:O12989, ordername:SIX-NOVN SELL 797k

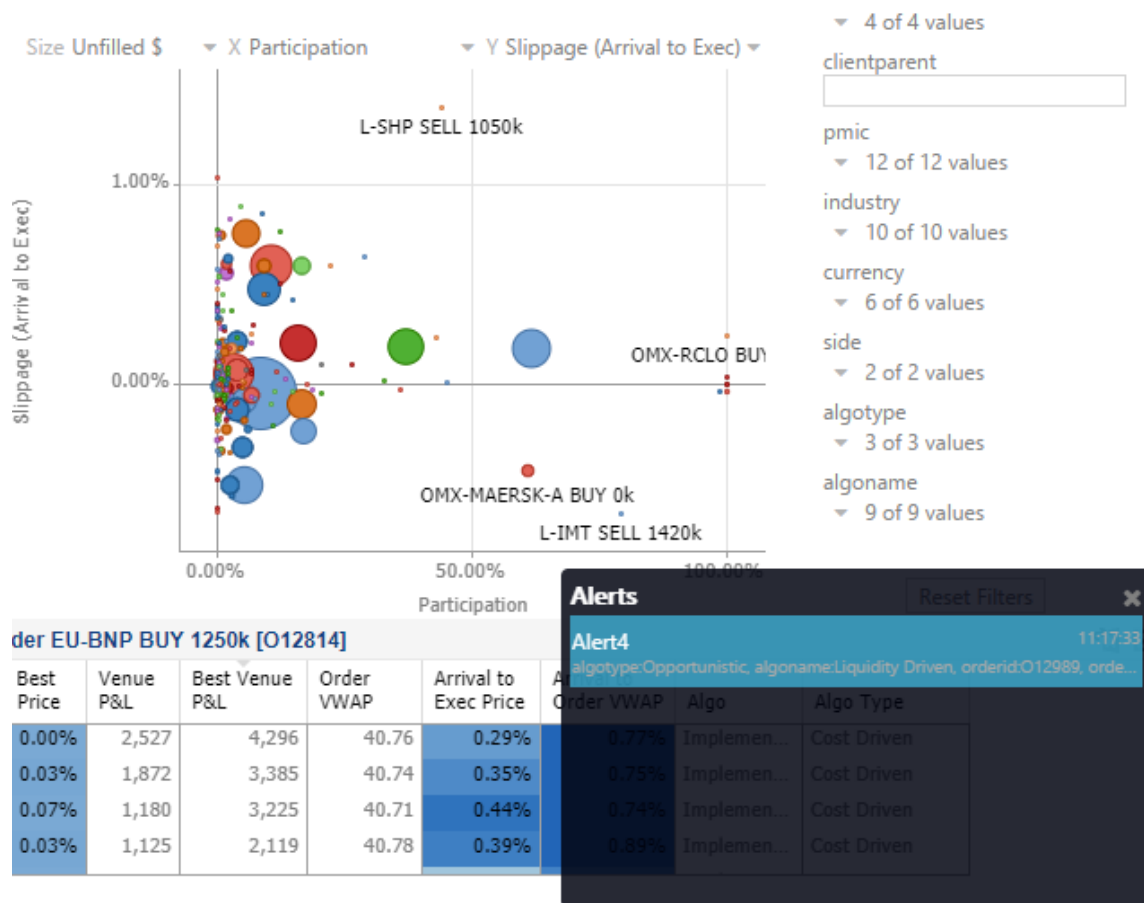

Visual > Order Map

## Sample Web Client Alerts

When an alert is triggered, aside from the email notifications, a visual indication or pop-up in active Web clients will draw attention to the alerting visualization or dashboard.

In the example below, an alert initially displays highlighted in blue:

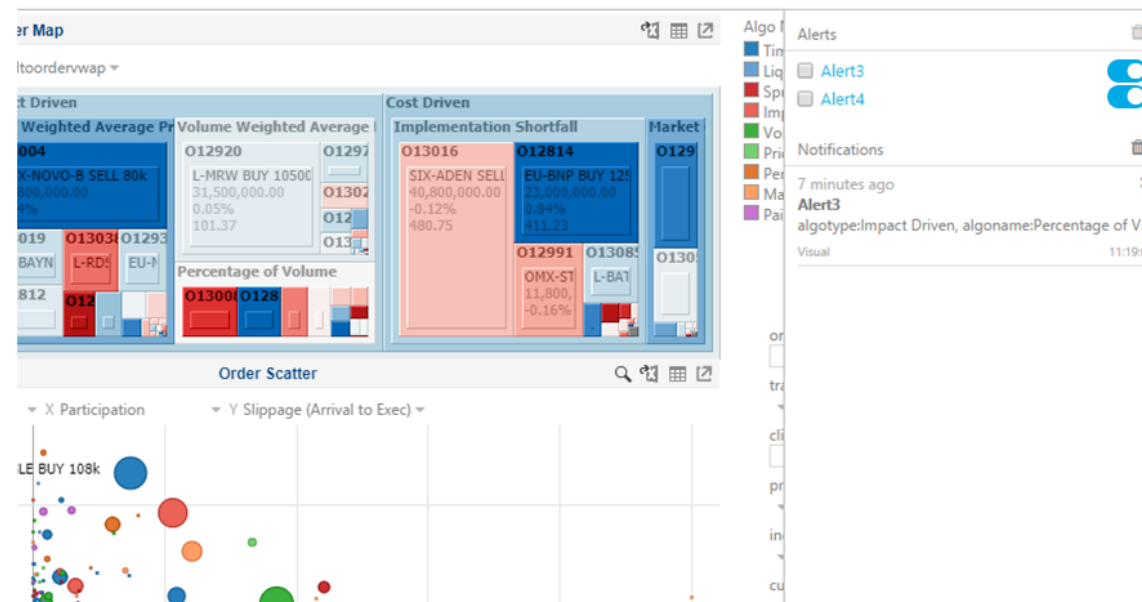

The alert eventually fades away and the pop-up screen fills up with the four latest triggered alerts.

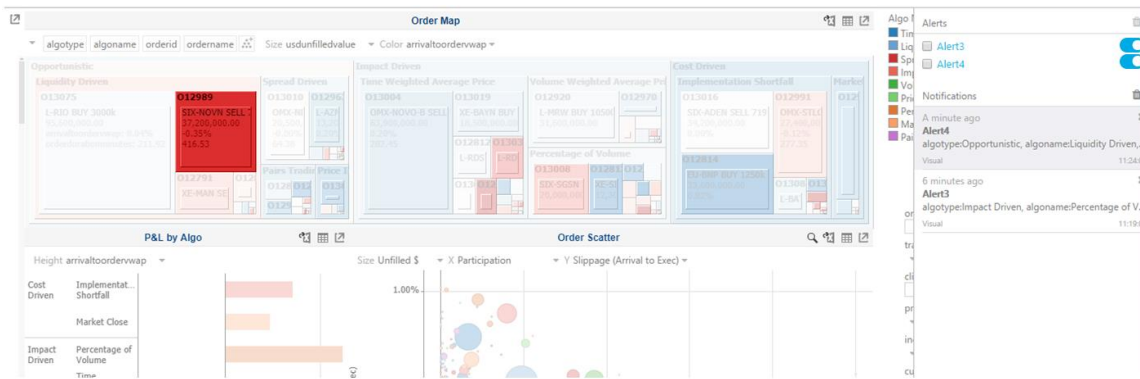

The pop-up stays on screen until it is closed by clicking the button.

Saved alert notifications can be opened on the *Notifications* panel by clicking the icon.

Clicking on a notification highlights the item in the workbook that triggered the alert.

Click the  button to delete a notification or click  to delete all of the notifications.

## [3] WEBHOOKS

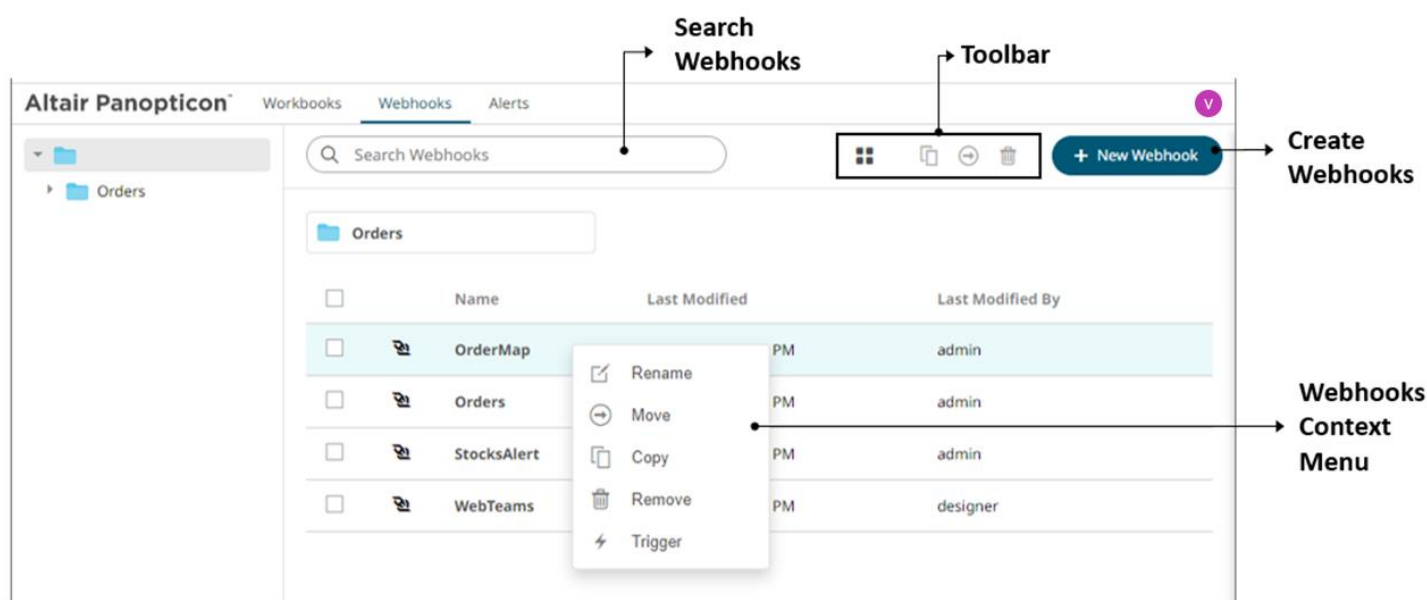

A webhook is a special URL that makes it possible to send a message from other systems into the system that issued the webhook. Webhook URLs should be treated with care and not shared publicly, since anyone with knowledge about the webhook URL will be able to use it.

Collaboration platforms such as Microsoft Teams, Slack, and many others, all have support for creating incoming webhooks. In Panopticon, outgoing webhooks can be added (based on incoming webhook URLs from other systems) and used as a channel for sending messages about triggered alerts, like how such messages can also be sent by email. Webhooks added to Panopticon are stored in the server folder structure and are subject to the same permissions model as workbooks.

An outgoing webhook in Panopticon can be used as the message channel for multiple different alerts in multiple different workbooks, due to the parameterization of the webhook request body. The exact structure and content that you should create in the request body of a webhook will be specified in the documentation of the system that issued the webhook.

### NOTE

Do not expect that the example [request body](#) shown below, will work as is.

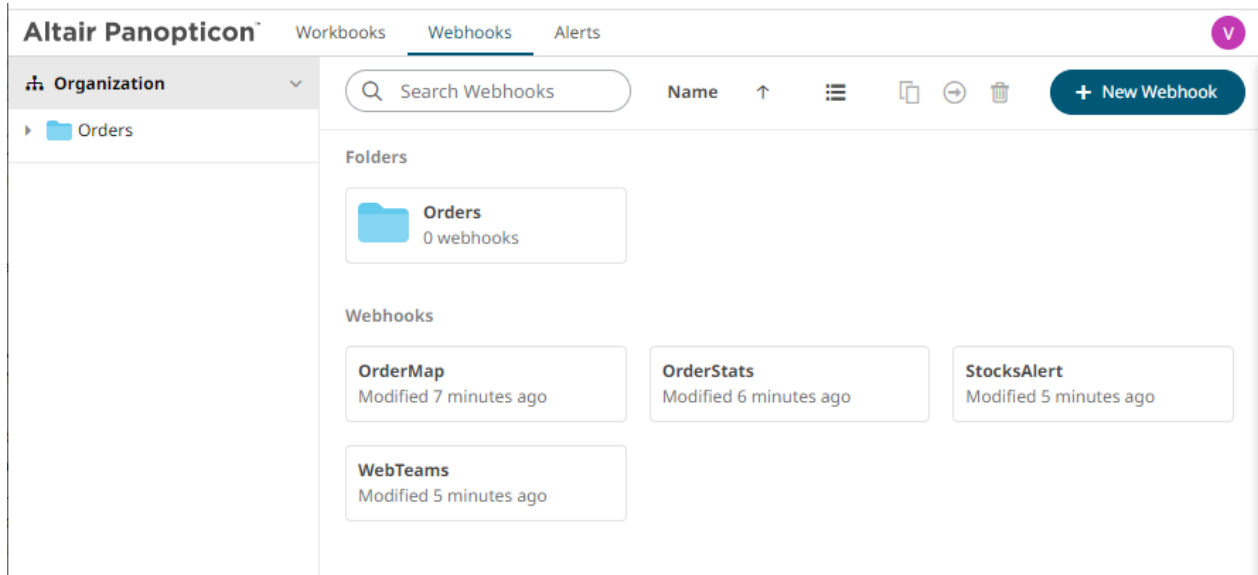

Property	Description
<a href="#">Search Webhooks</a>	Entering text will filter the webhooks.
<a href="#">Toolbar</a>	Allows copying, moving, and removing of webhooks. Also, to display the webhooks list either on <a href="#">List View</a> or <a href="#">Grid View</a> .
<a href="#">Create Webhooks</a>	Allows creating new webhooks.
<a href="#">Webhooks Context Menu</a>	Allows <a href="#">renaming</a> , <a href="#">moving</a> , <a href="#">copying</a> , <a href="#">deleting</a> , and enabling of the trigger of webhooks.

## Folders and Webhooks Display View

Webhooks can be displayed either on a *List* or *Grid View*.

On the *Toolbar*, click **Grid View** . The folders and webhooks are displayed as thumbnails.

Or click **List View** , the folders and webhooks are displayed in a standard listing.

On either display view style, clicking on a webhooks title or thumbnail displays the *Webhooks* page.

## Searching for Webhooks

On the *Webhooks* tab, to search for a particular webhook, enter it in the *Search Webhooks* box.

You can also enter one or more characters into the *Search Webhooks* box then click **Enter**. The suggested list of webhooks that matched the entries will be displayed.

Click on a webhooks to open and display.

To clear the filter, delete the text entry in the *Search Webhooks* box.

## CREATING WEBHOOKS

This section discusses the instructions and guidelines in creating webhooks.

### Steps:

1. On the **Webhooks** tab, click on a folder then  
The *New Webhook* dialog displays.

A dark blue button with a white plus sign and the text 'New Webhook'.

New Webhook

Webhook1

Create

Cancel

2. Enter the name of the webhook then click

The new webhook is displayed on the *Webhook* page.

Http Method

POST

▼

Timeout

10000

Content Type

application/json

Request Body

3. Enter or select the following webhook properties:

Property	Description
Description	Description of the webhook.
URL	URL of the webhook. This property is required.
Headers	A comma separated list of name=value pairs representing HTTP headers.
HTTP Method	Select the appropriate HTTP method for the request from the following options:

	<div> <div>GET</div> <div> GET POST PUT DELETE </div> </div> <ul style="list-style-type: none"> <li>• GET – To retrieve data.</li> <li>• POST – To add new data.</li> <li>• PUT – To replace existing data.</li> <li>• DELETE – To remove existing data.</li> </ul>
Timeout	Timeout (in ms) for reading a response from the URL.
Content Type	The content type of the request body. Default is <b>application/json</b> .
Request Body	<p>The request body to be supplied to the HTTP call.</p> <p>For example:</p> <pre>{   'Alert title': '{_alert_title}',   'Alert dashboard URL': '{_alert_dashboard_url}',   'Alert description': '{_alert_description}',   'Alert reason': '{_alert_reason}',   'Triggering items': '{_alert_triggering_items}',   'Timestamp': '{_current_time}',   'Folder': '{_workbook_folder}',   'Workbook': '{_workbook_name}',   'Dashboard': '{_dashboard_name}' }</pre>

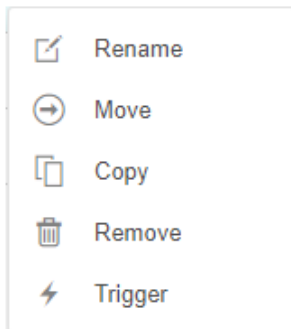

- Click  to save the new webhook.
- Click  to trigger the webhook. Any parameter in the request body will be replaced by its value when triggering the webhook request.  
For example:  
`{_current_time}` - 2021-07-01T12:34:56Z
- Click  to go back to the *Folders and Webhooks* list. The new webhook is added on the list.

## WEBHOOKS TOOLBAR AND CONTEXT MENU

Moving, copying, and removing webhooks can either be done using:

- ☐ Context menu

Webhook Context Menu

Webhooks Folder Context Menu

- ☐ Toolbar

List View

Grid View

The *Webhooks* toolbar options include:

Toolbar Option	Description
<a href="#">Sort By / Sort Order</a>	Allows sorting webhooks by <i>Name</i> , <i>Last Modified</i> , or <i>Last Modified By</i> .
<a href="#">Display View</a>	Display webhooks either by <i>List View</i> or <i>Grid View</i> .
<a href="#">Copy</a>	Copy webhooks to another folder or subfolder where the user has permission.
<a href="#">Move</a>	Move webhooks to another folder or subfolder where the user has permission.

<a href="#">Remove</a>	Remove webhooks.
------------------------	------------------

The *Context Menu* options include:

Context Menu Option	Description
<a href="#">Rename</a>	Rename the webhook.
<a href="#">Move</a>	Move webhooks to another folder or subfolder where the user has permission.
<a href="#">Copy</a>	Copy webhooks to another folder or subfolder where the user has permission.
<a href="#">Remove</a>	Remove webhooks.
<a href="#">Trigger</a>	Trigger the webhook.

## Sorting Webhooks

Sorting webhooks can be done by **Name**, **Last Modified**, or **Last Modified By**.

### Steps:

On the *Webhooks* tab, either:

- ☐ click the **Sort By** option on the *Toolbar* of the *Grid View*.

By default, the sorting is by **Name**.

- Name
- Last Modified

Then click the *Sort Order*:

- Ascending
- Descending

- ☐ click on the **Name**, **Last Modified**, or **Last Modified By** column header of the *List View*.

Then click the *Sort Order*:

- Ascending
- Descending

## Renaming a Webhook

Steps:

1. Right-click on a webhook then select **Rename** on the context menu.

The *Rename Webhook* dialog displays.

2. Enter a new name then click  .

## Moving Webhooks

Users with a Viewer role are allowed to move webhooks to another folder or subfolder where they have permission.

### Steps:

1. Check the box of one or several webhooks either on the *Grid View* or *List View*.
2. Then select either:

- the **Move**  icon on the toolbar
- **Move** on the content menu

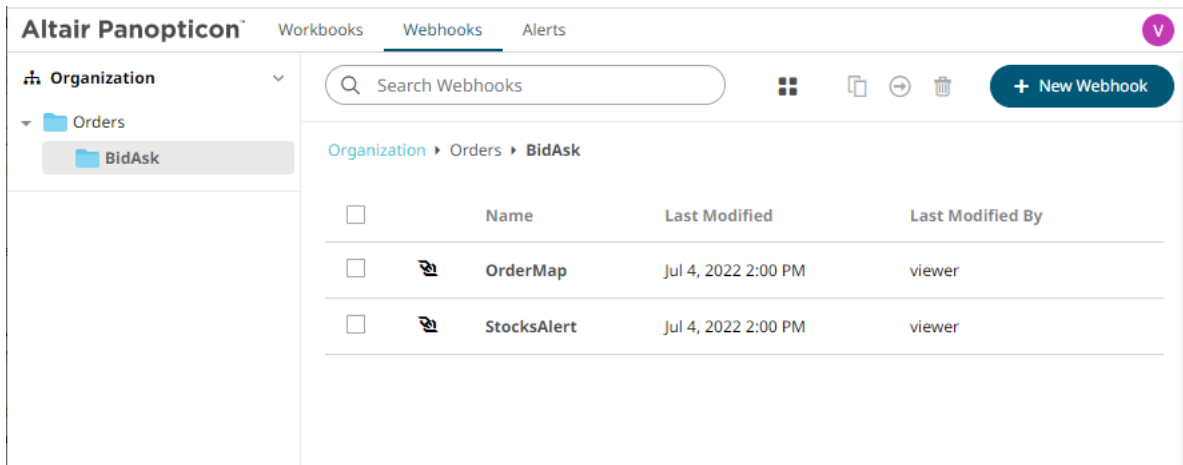

The *Move Webhook* dialog displays with the folder or subfolders that the user is allowed to move the webhooks. Select the folder or subfolder.

3. Click  .

The webhooks are moved and displayed on the selected folder.

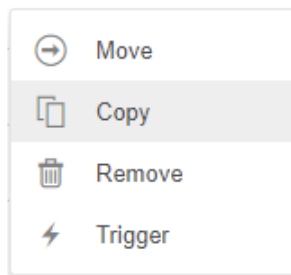

## Copying Webhooks

Users with a Viewer role are allowed to copy webhooks to another folder or subfolder where they have permission.

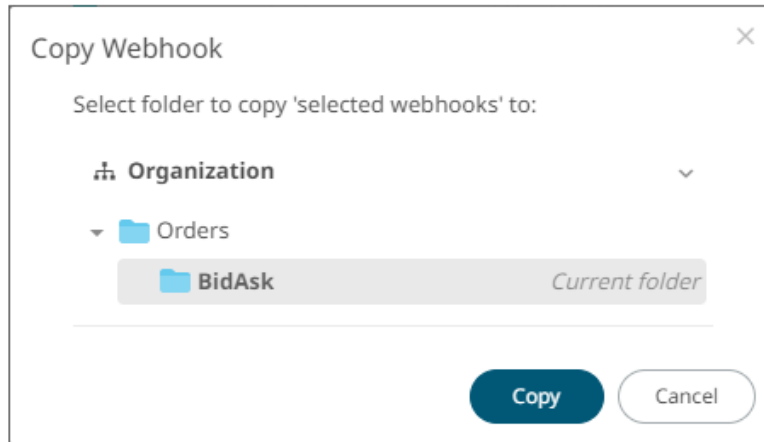

### Steps:

1. Check the box of one or several webhooks either on *Grid View* or *List View*.
2. Then select either:

- the **Copy**  icon on the toolbar
- **Copy** on the content menu

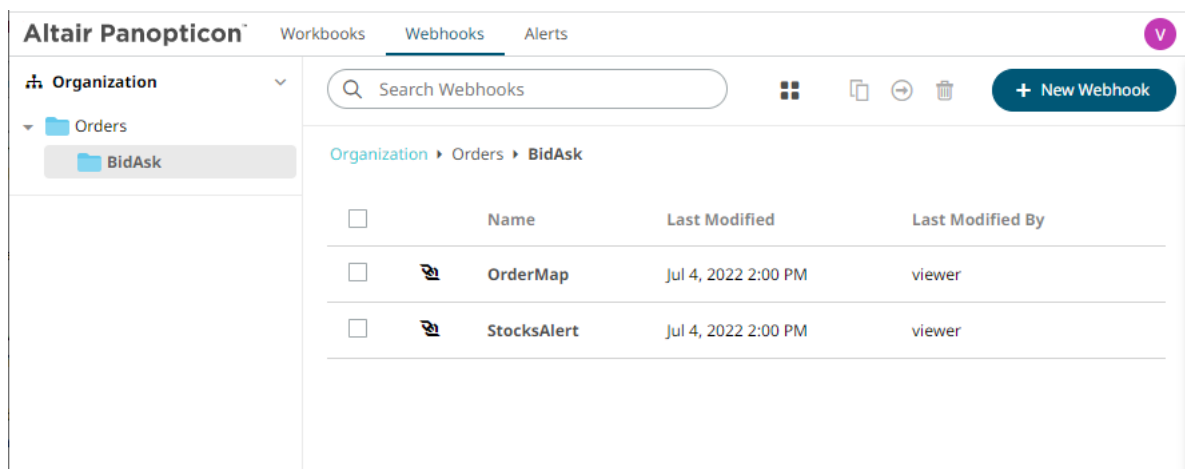

The *Copy Webhook* dialog displays with the folder or subfolders the user is allowed to copy the webhooks to. Select the folder or subfolder.

3. Click .

The webhooks are copied and displayed on the selected folder.

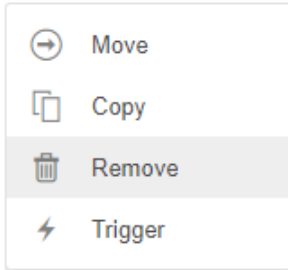

## Deleting Webhooks

Users with a Viewer role can remove webhooks.

### Steps:

1. Check the box of one or several webhooks either on *Grid View* or *List View*.
2. Then select either:
  - the **Remove**  icon on the toolbar
  - **Remove** on the content menu

A notification message displays.

3. Click  to remove.

## Triggering Webhooks

To trigger a webhook, right-click on it and select **Trigger** on the context menu.

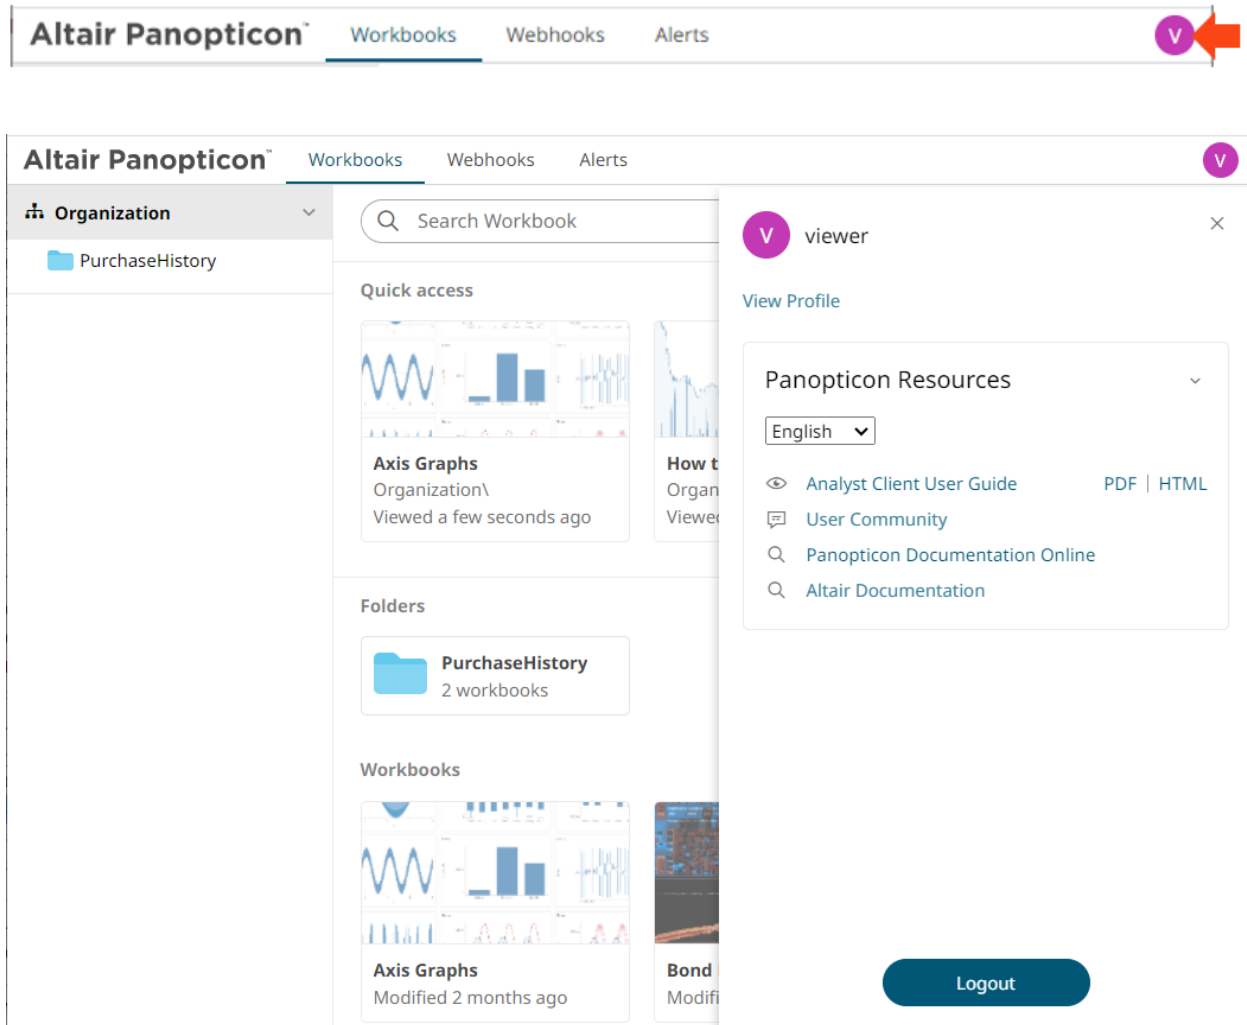

Any parameter in the request body will be replaced by its value when triggering the webhook request.

For example:

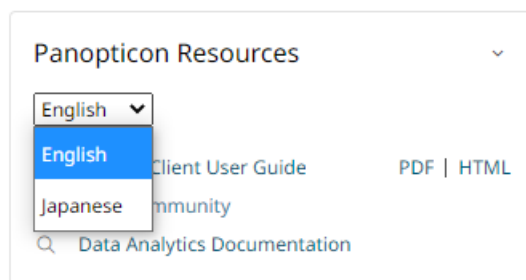

```
{_current_time} - 2021-07-01T12:34:56Z
```

## [4] PANOPTICON RESOURCES

Clicking  on the top right section of the toolbar displays the other Panopticon online resources that users with a Viewer role can access.

Select the *Language* on the drop-down list: **English** or **Japanese**.

Resource	Description
Analyst Client User Guide	<p>Panopticon Real Time documentation for users with a Viewer role which consists of:</p> <ul style="list-style-type: none"> <li>• viewing and analyzing of workbooks</li> <li>• creating, monitoring, and deleting of alerts</li> </ul> <p>Available upon installation.</p>
User Community	Link to the Panopticon User Community page.
Data Analytics Documentation	Link to the Altair Data Analytics Documentation page.
