RELEASE HISTORY

Altair Monarch

Version 2022.1.0

Data Prep Studio

Issue ID	Resolved Issue
DPS-8599	When copy-pasting a summary to Excel, the formatting from coloring and limits is not copied
DPS-8613	Hang under certain conditions when adjusting field after verification
DPS-8651	Object reference not set error when exporting to IBM Cognos
DPS-8681	Crash when trying to create a new Sort on Analyze Tab with no load plans
DPS-8702	"Illegal characters in path" error when exporting All Summaries by Files to Amazon S3
DPS-8714	XML/JSON - Viewing children of multi-file nodes other than reports leads to blank table and error state
DEPRECATION NOTICE	The following connectors will be deprecated in Monarch 2023.0: • JIRA • Zendesk • Sugar CRM • Google Sheets • Google Ads • Google Drive • Box

Altair Monarch

Version 2022.0.0

Monarch Classic

Issue ID	Resolved Issue
MOD-3642	Table Design: Alt+D not working when in some options
MOD-3767	Row position within group is not maintained when drilling
MOD-4031	Incorrect column names produced for QVX and TDE summary exports when duplicate column names are present.
MOD-4034	Conditional formatting limit unexpectedly resets to zero
MOD-4065	Open Web File Dialog: Filter Combobox selection does not filter files
MOD-4078	Temporary file doesn't get cleaned up after change to input options
MOD-4093	Excel Summary export with formulas included doesn't produce formulas for hidden columns added to support AVG measures
MOD-4107	Page Setup header or footer custom font color doesn't apply to Excel exports
MOD-4114	XML Summary Export - Grand total labels aren't exported and Subtotal labels only contain the key value
MOD-4144	Lookup Field - Input Values Pairs (Trailing Whitespace & Non-Trailing Whitespace) Should Be Considered Duplicates

Data Prep Studio

Issue ID	Resolved Issue
DPS-3324	MongoDB - display first available database after a successful connection
DPS-3773	Cannot insert alternate trap characters into mask using the "trap character" buttons when the model is set to use alternate trap characters.
DPS-4533	No username/password prompt when importing a DPRJ which references an ftp/http-password protected report
DPS-4547	Preview Data - Switching selected columns should update the preview grid
DPS-5769	When entering report design with no reports or opening it with a file which does not exist, the loading spinner for the preview grid spins indefinitely.
DPS-5890	Join type selected from Recommend Keys is not reflected in Join Configuration dialog
DPS-7072	Loading large PDF files takes longer than Monarch Classic
DPS-7368	Anomalous duplicate calculated column appears
DPS-7447	Time Column is displayed with Date when loaded in Prepare from Cassandra Datasource

Data Prep Studio

Issue ID	Resolved Issue
DPS-7681	Value Filter - Selecting rows and then scrolling allows you to enter a multi-selected state without holding CTRL or Shift if you then select other rows
DPS-7704	Excel Trapping - Stencil not aligned with selected cell after row resizing
DPS-7717	Unable to open table using Netsuite connector. "No column found" error message.
DPS-7757	Excel Trapping - Footers intersecting a multi-line detail trap do not apply correctly
DPS-7920	Failed to create query error message encountered when opening certain Business Objects tables.
DPS-7921	Incorrect Metadata error message encountered when opening certain Business Objects tables.
DPS-7939	Loading tables from preview data does not switch to Prep or uncheck preview items
DPS-8077	Excel Trapping - Error if trapping a dropped file hosted at an http address
DPS-8085	MongoDB - Selected database is reset when you click on Connect in Edit Table Info
DPS-8132	Open File in Open Data Dialog attempts to open workspace files normally instead of importing tables
DPS-8138	Tableau Server, ODBC, and OLEDB export passwords are stored in the Workspace even with credential storage turned off
DPS-8212	Google Ads - OK button should not be enabled if there's an error
DPS-8225	Excel Trapping - Multi-line indicator box not aligned on re-opening model
DPS-8226	Excel Trapping - Multi-line indicator box not hiding when expected
DPS-8236	Decimal points do not line up properly in Excel exports involving parentheses surrounding negative currency values
DPS-8240	DPS crashes after editing the file path to resolve the missing file error in a Monarch Classic project
DPS-8264	Excel Trapping - Stencil, selection, and multi line box disappear if you click the resize handle on a row or column
DPS-8276	Recent Files - Text report table loads into preview instead of prepare
DPS-8279	Lookup Field - Unable to define Input Value for different case when Case Sensitive is enabled
DPS-8292	Connectors: OK button not always disabled when an error exists in the dialog values
DPS-8358	Prepare - Closing app settings causes autosized rows to change size
DPS-8372	Change History grid splitter disabled upon first selection of a load plan with missing files
DPS-8392	Oracle Connector OK button does not get enabled when using TNS Names

Data Prep Studio

Issue ID	Resolved Issue
DPS-8395	Cannot open password protected network file when workspace credentials have been cleared
DPS-8400	Crash on editing XLSX filepath under certain conditions
DPS-8409	Active Measure combobox switches to first measure when confirming Edit Summary dialog
DPS-8437	File path status when file doesn't exist doesn't update after export is completed
DPS-8475	Lookup Field - Input Values Pairs (Trailing Whitespace & Non-Trailing Whitespace) Should Be Considered Duplicates
NEW FEATURE	Read/Write support for Amazon S3 and Azure Data Lake Storage Gen2
NEW FEATURE	Smart Grouping for Lookup Calculated Fields
NEW FEATURE	Support for Altair Licensing Activation System (ALAS)
NEW FEATURE	Support for Monarch Classic Project Exports in Project files
ENHANCEMENT	New Export Types for Analyze: Qlik .QVX, SAS Transport Format V5 .XPT, Tableau .TDE, MS-Access .ACCDB & .MDB, JSON, XML
ENHANCEMENT	New Export Type for Prepare: XML
ENHANCEMENT	Expanded support for Monarch Classic Advanced Excel export features
ENHANCEMENT	Information and warnings when importing Monarch Classic Models
ENHANCEMENT	Preview Data Redesign
ENHANCEMENT	Worksheet Design enhancements
ENHANCEMENT	Encryption/Password support in Datasource Library
ENHANCEMENT	Find & Replace Prep Operation improvements
ENHANCEMENT	Expanded support for Monarch Classic Summary functionality in Analyze
ENHANCEMENT	Performance and security enhancements
NOTES	Upgraded to .NET 4.8, decrease in Altair Unit Draw from 21 to 10 for interactive sessions, PowerBI identity changed to Altair
