

 RELEASE HISTORY

Altair Monarch 2025

New Features and Enhancements 2025.0

IMPORTANT: 32-bit operating systems are no longer supported. 32-bit Monarch is still supported on 64-bit operating systems.

IMPORTANT: The Microsoft Access Database Engine is no longer deployed by the installation program. If read/write functionality for MS-Access databases or DBF files is required, please ensure the Microsoft Access Database Components are deployed.

Classic	
Issue ID	Resolved Issue
MOD-4513	Improve tooltip wording for disabled summary key display width
MOD-4496	Tableau Export - Multiplicity and split exports do not publish
MOD-4469	Search button is disabled after opening a large report
MOD-4461	Certain import types leave line breaks in headers
MOD-4456	Unhelpful error message when exporting too many columns for Excel to handle
ENHANCEMENT	Support Tableau exports to Tableau Cloud via Personal Access Token authentication

Data Prep Studio	
Issue ID	Resolved Issue
DPS-11089	Improve performance of multi-selection of a multiple columns when using Shift-Click
DPS-11081	Export Settings - Some items have differing font size to others
DPS-11073	Legacy duplicates dialog items control header is hard to read in dark mode
DPS-11055	Salesforce Error Message Tooltip and Copy not working
DPS-11028	Export Settings - Certain UI items are disabled erroneously
DPS-11026	Remove metadata columns from preview grid in Excel and Delimited Text load options dialog
DPS-11021	JSON Export - null values should export as null rather than empty strings
DPS-10990	Join Analysis - two messages are displayed on top of each other when one or both tables are in error
DPS-10920	Statistics - File info section is hidden unnecessarily if change errors exist

Data Prep Studio

Issue ID	Resolved Issue
DPS-10910	Formula Expression Editor - Auto Suggest incorrectly displays all multi parameter functions
DPS-10908	Page Setup - Add ? button to certain checkbox settings
DPS-10907	Error when closing XML visualizer window when the schema tree is not yet loaded
DPS-10906	Google Sheets Connector: Blank rows displayed in Prepare screen
DPS-10894	Add 'Browse' button for Key File Path field in Google Sheets Connection dialog.
DPS-10888	German Localization: Edit button of the Edit Measure dialog > Coloring tab is clipped
DPS-10874	Excel file from WebDav fails to open in Worksheet Design when dropping a URL on the application
DPS-10873	Google BigQuery Connector: ODBC could not connect to Altair Google BigQuery DSN
DPS-10864	Snowflake Connector: No tool tip display for the missing JVM error message
DPS-10824	Table loaded in Prepare after extracting the table created from selection is not selected automatically
DPS-10750	Add default Tableau Server Password file path behavior to Application Default Settings
DPS-10706	UI freezes when resizing column on pivot with 65k columns and 65k rows
DPS-10508	HTML table importer may read first line as headers when all rows are <td> tags
DPS-10468	XML Explorer - Add option to import columns that have no data
DPS-10439	Delimited Text: Opening multiple files in bulk spawns an unnecessary number of loading spinners, affecting performance
DPS-10397	Improve the size/position of the table list in the Salesforce Connection dialog.
DPS-10376	Excessively long Enter Password dialog when opening a password-protected file with a long filename
DPS-10267	First row has column names and other Transform operations leave newlines in headers
DPS-10218	Connectors: The missing JVM warning message is truncated in 1600 x 900 resolution.
DPS-9652	Cannot open CSV from Amazon S3 which contains an escape sequence in the name such as %20
DPS-9406	Edit Credentials - Improve guidance when Access or Refresh token has been cleared
DPS-9303	Improve error reporting prior to launching the 'Edit Credentials' dialog
DPS-8245	Splunk Connector: Intermittent connection failure when reconnecting to Splunk server
DPS-4098	Text with single leading apostrophe is not displayed

Data Prep Studio	
Issue ID	Resolved Issue
DPS-1517	When importing a delimited text file with no text qualifier, the default is "Double Quote" instead of "None"
ENHANCEMENT	High Contrast Theme
ENHANCEMENT	New options in Workspace settings to include default metadata columns to include when loading data sources
ENHANCEMENT	Added Minimum and Maximum Aggregate Types for Data data type in the Group Transform
ENHANCEMENT	Performance enhancements
